THE BEST FOUR ROSES.

MAMAN COCHET. Everblooming; charming, rose Pink.
MAMAN COCHET. Everblooming; charming, soft White.
HELEN GOULD. Everblooming; the rich, Crimson Cochet.
ETOILE DeLYON. Everblooming; the rich, Golden Cochet.

EVERYBODY should have these Four Roses. All are perfectly hardy, healthy, vigorous, free-blooming and everblooming. All bear charming, pointed buds, which develop into enormous, faultless flowers, double, deep and full; exquisite in rich and lovely coloring; surpassingly beautiful in form and fragrance. They are the cream of the cream of all hardy everblooming Roses. If you grow but four plants they should be these Roses.

These 4 Roses Free.

Send a Dollar Order for Seeds selected from this GUIDE, to reach me by March 1st, 1906, and these four, well-rooted Rose plants will be mailed you early in May, in time for planting. After March 1st, the Roses will cost you 25 cents. This offer is to encourage early orders. Don't delay. Tell your friends of this liberal offer.

GEO.W.PARK, SEEDSMAN & FLORIST.
LAPARK, LANCAS TER CO., PA.
INDEX AND GERMINATION TABLE

It is important to know the approximate time required by seeds for germination in order to sow them with satisfaction and success. Many seeds are condemned and neglected before they have had sufficient time to start. Always divide the packages and sow at different times. You can then give them a second or third trial. Keep it the same time together. Do not let the soil dry out until the seeds have had ample time to germinate. Seeds are influenced by conditions, and the plants may appear 55 per cent, earlier or 20 per cent later than the table indicates, according to circumstances. The figures in brackets indicate the time needed for a variety with cold frames. The time needed for seeds, in the Football Guide which precedes this page, is 14 days. Pot And, if possible, for the types of soil in question. The key is the germination: a, 5 days; b, 8 days; c, 10 days, etc. The dagger (†) added means that the seeds may take much longer than stated, some being dormant for weeks or months, or a year before starting.

---

Always keep a record of the date of sowing, and refer to the above table to know approximately when to expect the plants. Hang this Guide up, that you may know where to find it when wanted. Those marked (†) are not sure to come up promptly. Nearly all shrubs might be soaked. For other information on seeds, plants and flowers see Park's Floral Magazine, published monthly on fine paper at 20 cents a year, or on cheaper paper at 10 cents a year.

INTRODUCTORY REMARKS.

THIRTY-SIX YEARS of constant service as a seedsman and florist, have drawn to me the esteemed patronage of more than half a million flower-loving people, many of whom have become lifelong friends. Every year I am greeted with their orders, accompanied with kind words, and often additional orders, solicited from flower-loving neighbors, thus affording pleasant, friendly intercourse, and an assurance that my efforts to serve them faithfully and well are appreciated. One-half of the business man's life is spent in his business, and the other half in his home, and happy indeed, is that life where both the business and home contribute to his happiness. The harmonious and genial nature of a man who love the beautiful makes the florist's life one of pleasure instead of drudgery, and thus the years come and go with him in a continuous round of satisfaction and enjoyment.

I need hardly tell my friends that I owe to, and give them the best attention and most faithful service at my command. Those who have dealt with me know this, and my growing trade will indicate it to others. My aim is to please and satisfy all who entrust me with their orders. I would always rather lose profits than a patron's confidence and trade. My business has doubled many times by the sons and daughters of the family growing up and establishing new homes, and bestowing their patronage where father and mother had been satisfactorily served for many years. And it has also been doubled many times by the good words of friends and the personal solicitation of orders among neighbors. I rejoice in the confidence thus manifested, and will ever guard and protect it as a sacred possession.

I try to so conduct my business that it is brought right to your home. My various Catalogues describe what I offer, and state the prices. Simply make out your order, enclose it with the amount, and mail to me. I guarantee the letter to reach me safely, and the seeds will be filled or expressed, and delivered at the residence of my choice, right to your door. If a mistake occurs, or if there is damage or loss in transit, I will make all good. If you are not satisfied complain to me at once, not to a friend or neighbor. You will find me ever ready to listen to any reasonable complaint.

Owning and operating the printing house and electrotype foundry where my publications are issued, as well as farms, gardens and greenhouses for the production of seeds, bulbs and plants, and having my expenses further curtailed by the use of a first-class water-power, I can profitably sell goods of the best quality, at prices that would ruin many a seedsman not so favorably provided. I never deal in or supply inferior seeds. I sell only the best. Park quality means the best quality, and I challenge comparison. And now, appreciating and feeling thankful for the favors of my friends in the past, I solicit and anticipate their continued patronage, and also trial orders from those who have not yet dealt with me. My offerings are all of the new crop, and of tested vitality, while I am assured that the quality is unsurpassed. I therefore await the pleasure of my friends, believing they will be more than pleased with the treatment they receive, and the success they will attain with the seeds, bulbs and plants supplied.

La Park, Lanc. Co., Pa., January 1, 1906. GEO W. PARK.

P. S.—Remit by Money Order, Express Order, Draft or Registered Letter. Sums of 10 or 25 cents send in stamps or coin.

PARK'S FLORAL MAGAZINE.—To further aid those who cultivate flowers, as well as to advance the general interests of floriculture, I publish a monthly Magazine devoted entirely to flowers. It was established in 1871, and has been continuously published ever since. It is not a text book on flowers, but contains the very best and most practical information for the culture, care and treatment of flowers, and has a circulation of over 400,000 copies monthly. It is original, practical, and fully illustrated, and is the favorite Magazine among amateur florists. Only 10 cents a year, or for the edition upon fine paper, 25 cents. Sample copies free upon request.

SPECIAL (Park's Floral Magazine, one year, 10 Cts. TOTAL, For 25 Cts. Seeds, your selection from Guide, value 25c, trial price, 15 c. 25 cts.

This offer is to encourage new subscriptions. The full subscription price (10c) must always be sent to get the seeds (25c worth) at the trial price of 15c. In other words, 25c either in stamps or coin must be sent with your order. Tell your friends of this offer.

TO INSURE SUCCESS.—With every package of seeds, bulbs and plants I send directions for culture, thus insuring success. I wish, however, to here impress the fact that many failures are due to lack of knowledge of the plants. Study carefully the preceding page to avoid failures from this cause. Always divide the packets and make several sowings.

SELECTING AND SOWING.—If you wish seeds to sow in a garden bed, or to present to children, or if you have had but little experience in raising flowers from seeds, select such flowers as Alyssum, Astern, Balsams, Calendula, Candytuft, Indian Pink, Gaillardia, Helianthus, Marigolds, Mignonette, Bedding Petunia, Pansy, Phlox, Ricinus, Scabiosa, Tropaeolum, Valerian, Verbena, Zinnia. For vines get Cobea, Cypress, Dolichos, Gourda, Humulus, Ipomea, Morning Glory, Mandevilla, Tropaeolum peregrinum and Thumbiergia. Even in sowing these it is well to prepare the bed carefully. A sunny exposure, place a low broad frame around it, and after sowing, water, and cover with a newspaper until the plants appear. If you sow seeds in the open and allow full exposure to rain and wind and sunshine, you should not complain if but few of the seeds become plants. In a protected bed sowing can be done earlier than in an open one, as extra covering of paper or boards can be placed on top of the seeds.

GET UP A CLUB.—Park's Floral Magazine one year, with a premium of ten packets of Choice Flower Seeds (my choice, See Magazine) will be sent for 15 cents. At this price subscriptions are easily obtained. For a club of 25 names ($1.50) I will mail a boy's or girl's nickel-plated watch; for 50 names ($3.00) I will mail a gold-plated watch; for 75 names ($11.50) I will mail a gold-filled watch, such as is usually retailed by Jewelers at $12.00. Send for blank lists and particulars.
Park’s Superior Flower Seeds.

Unequaled in Vitality—Enriched in Quality.

Park’s Primroses.
Mr. Park: My Primroses started in May, began to bloom November 15, and such beauties, all large, thick-flowered, and the tips of the blossoms as large as a 5-cent piece. Colors white, pink and the darkest crimson. I even got Margaret Armstrong, Dubuque Co., Ia., Oct. 11, 1905. This is the largest, brightest and best. See page 66, 67, 68.

Park’s Gloxinias.
Mr. Park: April 26, 1904, I sow-ed half of a 3-cent packet of your Gloxinias. September 3, 1904, my first blossom opened. It was over 3½ inches wide, beautiful cream white, with a deep purple edge. I raised 32 plants from that half, and this spring have 28 plants from the other half. Mrs. M. E. E. Gulf, Worce-ster Co., Mass., Oct. 12, 1905. See 56.

Park’s Cinerarias.
Mr. Park: My Cinerarias from your seeds were grand. Among others, one was richest purple, one deep crimson with yellow centre; the crowning beauty of all was a large crimson one, with white eye. They bloomed continuously, over two months. E. J. Bailey, Quebec, Can., Oct. 13, 1904. Park’s are the finest. See page 22.

Park’s Gaillardias.
Mr. Park: Last year I got a package of your Gaillardia seeds, and nearly every seed came up. The plants have been in bloom almost all the summer, and are still loaded with buds and blossoms. They are yellow and brownish-red and are useful made up with white flowers in bouquets. Mrs. R. E. Mower Co., Minn. Park’s improved. See page 18.

Park’s Asters.
Mr. Park: The Asters from your seeds were a grand sight, the wonder and admiration of all. Some were tall and stately, others dwarf and low; some blossomed early, others late; and the flowers were of every color, shade and hue—red, pink, purple, lavender, and white; some with incurved petals like a Chrysan-themum. Mrs. H. C. Galhoun, Washenaw Co., Mich., Oct. 11, 1904. Park’s Asters. See page 7.

Park’s Balsams.
Mr. Park: My Balsams from seeds were marvells of beauty. They were branched, and every branch became a wreath of bloom, every flower perfect. They filled simply regined queen of the garden, and everybody here is going to buy Balsams seeds of Park. Mrs. R. H. Preston, Mrs. J. W. Woodyard, Johnson Co., Mo., Nov. 9, 1905. Buy of Park. See 10.

Park’s Carnations.
Mr. Park: Your Carnations are beautifully colored, double, fragrant and as large as a dollar. I sowed them in March, and the plants began to bloom in four months. They like rich, moist soil and partial shade. They thrive on the east porch in Sum-mer and east window in winter. Walter Roundbush, Tippecanoe Co., Ind., Oct. 4, 1905, p. 12, 43, 46, 51.

Park’s Pansies.
Mr. Park: Your Giant Pansies were fine. Nearly every seed grew, and the blossoms were as large as a silver dollar. Next year I am going to have a lar bed, with each row a differ-ent color, and shall get Park’s Rosea’s Giant Pansies of you, as there are none better. Mrs. Roy Mead, Nobles Co., Minn., Oct. 10, 1905. See page 28.

Park’s Petunias.
Mr. Park: From one packet of your Petunia seed I raised some of the finest Petunias I ever saw. Many measured over four inches across, while the colors were beautiful and rich, ranging from pure white to dark purple, some handsomely veined and variegated. Mrs. A. D. Thompson, Fremont Co., Iowa. See page 26 and 27.

Park’s Phlox.
Mr. Park: I advise all to grow your Annual Phlox. I got a package from you last spring, and divided with a friend. We both had quite a bed, for it seemed that every seed grew. The plants began to bloom when quite small and continued a mass of bloom, in all the rich colors, until frosts in October. Mrs. Geo. Jewell, Isanti Co. Minn., Oct. 30, 1905. See page 27.

Park’s Ten Weeks Stocks.
Mr. Park: I had twenty or thirty Plants from the packet of Ten Weeks Stocks bought of you. I gave many plants to friends who admired them. They developed long spikes, very double and fragrant. For continuous blooming I have nothing that excels them. Annie Dobble, Norton Co., Kas., Oct. 8, 1905. See page 33.

Park’s Sweet Peas.
Mr. Park: The Sweet Pea seeds I bought of you last spring grew nicely, and the blossoms were exquisite—so many varie-ties and colors, and such large rich-scented blossoms borne on long stalks. They were by far the prettiest Sweet Peas I ever grew. Mrs. J. H. Owen, Wyoming Co., N. Y. Oct. 24, 1905. See page 70.

Park’s Verbenas.
Mr. Park: From a-cent packet of your large-flowered fragrant Verbenas I had many different colors, and the flowers were produced continuously. I set some in urn and they were a mass of fragrant bloom all summer. I have pot- ted one for my window box, delectable pink with a fragrance like Trailling Arbutus. Mrs. G. L. Clark, Bormie P. O., Mo., Oct. 9, 1905.

Park’s Zinnias.
Mr. Park: I got a packet of your Mammoth Zinnias in the spring, and they were a surprise—as double and showy as any dahlia, and more in March. They were the finest Zinnias in this part of the country. Some grew four feet high, and the flowers were of all colors. Every one who saw them admired them. May Preston, Douglas Co., Oct. 30, 1905. See p. 36.
Ageratum, New Large-Flowered.

Special Mixture, all colors, 4 packets 10 cents, 1 packet 3 cents.

Beautiful feathery clusters of blue and white flowers, continuously born throughout the season. Plants grow and bloom well in a sunny exposure, and are fine for edging and beds, also for pots. The new, large-flowered sorts are of especial beauty.

Large-flowered Dwarf, pure white, 8 inches high.......................... 5
Large-flowered Dwarf, deep blue, 8 inches high.......................... 5
Large-flowered Dwarf, light blue, 8 inches high.......................... 5
Large-flowered Dwarf, azure, white centre, 8 inches. 5
Large-flowered Dwarf, light yellow, 10 inches .................... 5
Large-flowered Dwarf, Blue Star, compact, 6 inches. 5

I can also supply tall Mexicanum, blue and white, Lasseaux, pink, and Little Dorrit, blue and white, at 5 cents each per packet. Special mixture, all varieties and colors, 4 packets, 10 cents; 1 packet, 3 cents.

Mr. Park—From a three-cent packet of Ageratum Seeds I had plants enough for myself and some for my neighbors. The border of my Canna bed was a sheet of blue.—Mrs. H. S. McWhorter, Seneca Co., N. Y. Nov. 1, 1905.

Abronia umbellata, a succulent, sun-loving. Verbena-like plant; husk before sowing .......... 3
Adonis, annual; plants grow a foot high; finely cut foliage and shining red flowers, mixed .......... 3
Ethionema grandiflorum, a handsome perennial, flowers rose, in long spikes ..................... 3
Agrostemma Coeli Rosa, 1 foot high, flowers rose and white, mixed ............................. 3
Anemone coronaria, showy flowers of various colors, mixed ..................................... 3
Anagallis, very pretty, free-blooming, half-hardy annuals. Like a dry, sunny place. Blue, crimson, scarlet, separate or mixed ........................................ 3
Anchusa, perennials with rich blue flowers, mix'd 3
Arnebia cornuta, new; showy golden yellow with brown spots................................. 3
Artemisia annua, grows 3 feet high with Fern-like, fragrant foliage; known as Sweet Fern ..... 3
Asperula azerea setosa, 9 in. high, branching, with pretty blue flowers in clusters............. 3
**Antirrhinum Giant Fragrant.**

*Special mixture, 4 packets 10 cts., 1 pkt. 3 cts.*

The new large-flowered, fragrant Antirrhinums or Snapdragons are very desirable garden or pot plants. They are easily started from seeds, and the plants soon come into bloom, branching freely, and every branch becomes a charming spike of large, scented, rich-colored flowers, the colors ranging through the splendid shades of white, rose, crimson, scarlet, orange, and dark purple, many varieties showing distinct variegations, as striped, spotted, biotched. These new varieties give great improvement upon the old-fashioned Snapdragons, and are superb bedding plants, blooming freely the entire season. They grow about two feet high. My special mixture contains all of the choice colors.

White 5 | Chamois 5
---|---
Scarlet 6 | Rose 6
Rich crimson 5 | Striped 5
Yellow 6 | Copper 6
Scarlet, gold and white 6
White, striped red 6
Scarlet with white throat 6
Yellow, striped red 6
Carmine with white throat 6
Yellow and orange 6
Pure White Queen Victoria 6
Golden Queen, rich golden yellow 5

Special mixture of all the above, 4 pkt 10 cts., 1 pkt 3 cts.

**Semi-Dwarf Varieties in special mixture, 4 packets 15 cents, 1 packet 5 cts.**

**Tom Thumb Varieties, very dwarf, for pots, edgings and beds; special mixture, 4 pkt 15 cts., 1 pkt 5 cts.**

Mr. Park: I had a fine bed of your new large-flowered Fragrant Snapdragons this year—so many rich and beautiful colors. They were splendid. I mean to have a large bed next year. They are so easily raised from seeds.—Mrs. M. C. Webster, Lewis Co., Wash., Nov. 25, 1906.

**Arotios grandis**, a new annual 3 feet high with large, lavender-white, daisy-like flowers. 4 pkt 10 cts., 1 pkt 5 cts.

**Special Mixture, all colors, 4 packets 10 cents, 1 packet 3 cts.**

---

**Acacia lophantha**, an easily-grown Fern-like plant of great beauty; it is of rapid growth, and makes a fine appearance either in a pot or a shady bed near the house. Always give plenty of root room. Pinch to promote bushy growth. See engraving. 4 pkt 10 cts., 1 pkt 5 cts.

**Alonsoa**, lovely pyramidal plants blooming profusely and continuously; flowers mostly shades of rich scarlet. A. gracilis, A. Warscewiczii, A. Mutisi, and A. myrtifolia, are all good for either pots or beds. See engraving. Mixed. 4 packets 10 cents, 1 packet 3 cents. The varieties separate, 5 cts. pkt.

**SWEET ALYSSUM. AMARANTHUS TRICOLOR.**

**Alyssum**, Sweet, Early, free and continuous blooming annuals; flowers white, in fine clusters, and deliciously scented; excellent for edging and baskets, and the sprays fine for cutting. See engraving. 4 pkt 10 cts., 1 pkt 5 cts.

**Amaranthus**, showy variegated-leaved plants of easy culture, useful for bedding, as well as for pots; like poor soil and a sunny situation. Joseph's Coat (or Amaranthus tricolor. See engraving.) Fountain Plant, Prince's Feather, Love Lies Bleeding, etc., belong here, and can be supplied at 5 cts. per pkt; all sorts mixed 4 pkt 10 cts., 1 pkt 5 cts.
These are splendid annuals for either beds or pots and deserve general cultivation. The plants are easily grown from seeds, and always bloom well in rich soil in a sunny situation. The flowers are very double, are borne on long stems, show the richer shades of red and blue as well as white, and are fine for cutting. My seeds are the product of German and French specialists, and are sure to yield the most satisfactory results. My mixtures are specially prepared, and contain the colors in fine proportion.

Mr. Park:—You should have seen my fine Asters this summer raised from your seeds. They were simply beyond comparison.—Chas. W. Brookens, Franklin Co., Pa., Oct. 4, 1906.

Mr. Park: Last Spring I bought Aster seeds of you, at prices so low I did not expect much, but the results were quite as satisfactory as from the more expensive seeds I bought of other florists. I usually raise a thousand plants. I had a very fine display this year. People come ten miles to see them.—Geo. D. Carrier, Chautauqua Co., N. Y., Oct., 1905.

Mr. Park: Out of a three-cent packet of mixed Aster seeds, I raised quite a large bed of the most beautiful Asters I ever saw. They were the wonder of the neighborhood, and were of every color I ever saw in Asters, and so easy to raise.—Mrs. Bertie Jewell, Isanti Co., Minn., Oct. 9, 1905.

Mr. Park: If your patrons wish something very fine they should try Park's Asters. A few cents spent in the different varieties will furnish an abundance of cut flowers, besides making a fine show in the garden.—Mrs. M. C. Bramhall, Bradford Co., Pa., Nov. 11, 1905.

Giant Victoria Aster.
A Grand Double Recurved Variety.
Special Mixtures, 4 pkts. 15 cts., 1 pkt. 5 cts.

This is one of the finest Asters, exceedingly showy and beautiful. Plants grow two feet high, branch freely, and each branch bears several huge, double, open flowers, as shown in the engraving. Set ten inches apart in a bed, they make a gorgeous display in autumn. Fine also for pots. I offer the choicest seeds in the leading colors, as follows:

- Pure white
- White, rose tint
- Peach-blossom
- Rose
- Light blue
- Special mixture, 4 pkts. 15c., 1 pkt.

Mr. Park: I bought a packet of your New Giant Victoria Aster seeds, and they did elegantly and deserve great praise. I had plenty of fine large flowers for myself, and could carry nice bouquets to my friends who were disappointed in theirs.—Mrs. E. C. Slade, Delaware Co., N. Y.

Giant Perfection Aster.
A Grand Double incurved Variety.
Special Mixtures, 4 pkts. 15 cts., 1 pkt. 5 cts.

The Improved Perfection Aster, is the most beautiful and showy of the incurved varieties. The plants are strong, of upright growth, two feet high, and bear magnificent, large, incurved flowers as represented in the above engraving. The colors are very rich, and some flowers are charmingly variegated.

- Pure White
- Crimson
- Azuré
- Dark blue
- Scarlet
- Light blue
- Special mixture of all colors, 4 pkts. 15 cts., 1 pkt.

Mr. Park: Your Perfection Asters are lovely, and so easily raised. My bed showed many colors, as white, pink, blue, purple, variegated, etc. I wonder how many of the floral sisters have tried them.—Augusta Oidfeld, McPhearson Co., Kans.
New Hohenzollern Aster.

Special mixture, 4 packets 15 cents, 1 packet 5 cents.

Perhaps the largest, most attractive and most beautiful of the Plume Asters is the New Hohenzollern race, which originated with the famous German Specialist, Mr. Frederick Roemer. The plants are of luxuriant growth, and bear freely enormous, perfectly double flowers, from five to seven inches in diameter, of the most charming colors, every flower twisted and curled as indicated in the engraving, thus forming a great, fluffy ball not unlike a Japanese Chrysanthemum. This is one of the glorious varieties, either for pots or beds, that everyone should have. I offer the choicest seeds, direct from the originator, Mr. Roemer, and they will be found far superior to the seeds of this variety mostly sold. My special mixture contains all the fine colors, and the packets are as liberal as such choice seeds can be offered. I hope all my friends will try this grand featherly Aster.

Blue white........... 5 | Rosy lilac........... 5
Bright rose........... 5 | Crimson........... 5
Dark blue........... 5 | Flesh color........... 5

Special mixture, all colors, 4 packets 15 cents, 1 packet 5 cents.

Park's Yellow Quilled Aster.

4 pkts. 10 cts, 1 pkt. 3 cts.

This is the best yellow Aster to date. Plants grow two feet high, and are covered with large double quilled flowers, which last a long time.

Mr. Park: All the Aster seeds I got from you last spring did well, but your Silver Cloud and Yellow Quilled Asters deserve special praise, for they were beautiful—so large and free blooming. Mrs. F. L. Calkin, Linn Co., Mo., Nov. 4.

Mr. Park: I bought of you a packet of Hohenzollern Asters, and of all the Asters I ever raised they were the finest. Such large blossoms, crimped and curled and such lovely colors, white, red, purple, pink, etc., Each plant was a bouquet in itself, with its big double fluffy blossoms. A friend had lots of pretty Asters, but mine were pronounced, by those who saw them, to be the best. Mrs. E. J. Putnam, Allegheny Co., N. Y., Oct. 10, 1905.

Cocardeau or Crown Aster.

Special mixture, 4 pkts. 10 cts, 1 pkt. 3 cts.

Grows 18 inches high, bearing large, full double flowers of rich colors, the centre pure white.

Rose, carmine, crimson, violet, blue and lilac, each 5
Special mixture, all varieties, 4 pkt. 10 cts., 1 pkt. 3 cts.

Mr. Park: Your Cocardeau or Crown Asters were just lovely, and were greatly admired by myself and friends. Anna Strain, Jasper Co., Ia. Nov. 26.

Dear Mr. Park: I can truthfully say that the Hohenzollern Asters which I purchased of you, are the finest in cultivation. They are the largest and most beautiful of all Asters, and very easy to grow. I have had great success with them, and advise all flower-lovers to get no other but Park’s Asters. Stanley Gibson Out., Oct. 10, 1905.

Mr. Park: I hear people complain of seeds proving unsatisfactory. I always advise them to send to Park, whose seeds never fail to mature, if properly attended to. Hazel Hamilton, King Co., Wash.
Park’s Fine Bedding Aster.

**Special Mixture, 4 pkts. 15 cts., 1 pkt. 5 cts.**

I offer a compact, dwarf Aster for beds, that cannot be surpassed. The plants are bushy, as represented in the small sketch, and when in bloom the bed is a glorious mass of exquisite flowers, exceedingly handsome whether grown in separate colors or in mixture. The plants are less than a foot high, and should be set six or eight inches apart each way. The engraving shows a bed of these Asters in mixed colors, with a border of Cerastium Biebersteinii. The packets of mixed Aster seeds, costing 15 cts., will make enough plants for a large bed, and two packets of

Cerastium, costing 5 cts., will yield plants for a thick border, the whole seed expense for the bed being 20 cents. Sow the seeds of both in boxes in April, and transplant in May. The plants do best in a sunny bed, mulched with fine stable litter, after the last hoing.

Pure white ......................................... 5
Light blue .......................................... 5
Dark blue .......................................... 5

Crimson ....................... 5—Rose .......................... 5

Special mixture 4 pkts. 15 cts., 1 pkt. 5 cts.

Mr. Park: I bought a packet of your Bedding Aster seeds last spring. It contained all the colors that belong to the Aster family. The plants produced the finest flowers I ever saw. I took a bouquet of them to a picnic and they were admired by every one present. I had to tell them where I got my seeds.—M. E. W., Chautauqua Co., N. Y., Nov. 10.

Aster, Park’s Ostrich-feather.

**Special Mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.**

The elegant plummy flowers of the Japanese Chrysanthemums are fairly represented in the splendid strain of Ostrich-feather Aster which I offer. The plants grow eighteen inches high, and in autumn produce enormous double flowers as shown in the engraving, and of all the rich colors from white to almost black, as follows:

Pure white .......... 5 Light yellow ...... 5
Peach-blossom ...... 5 Dark blue .......... 5
White ch'g to rose .1 Lisa .. 5
Rich crimson ...... 5 Azure ............ 5
Special mixture of all colors, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: The Ostrich-feather Asters from your seeds were of immense size, like Japanese Chrysanthemums, measuring five inches across, with long petals curiously curled, so as to give them a striking resemblance to the Chrysanthemum Eva Shipley Frances, Wheeler Co., Neb., Nov. 24, 1905.

Mr. Park: My Ostrich Plume Asters from your seeds are lovely, being the largest flowers and most delicate shades I have ever seen in Asters. I am much pleased with them. Mrs. Edwin W. Mace, York Co., Maine, Oct. 23, 1905.

Mr. Park: My Asters almost rival the Chrysanthemums. I wish you could have seen them in bloom. Lizzie B. Deisher, Berks Co., Pa., Sept. 16, 1905.

Queen of the Earlies.

**Special Mixture 4 pkts. 10 cts., 1 pkt. 3 cts.**

The earliest Aster. Flowers very double and of many colors. Fine for beds or pots.

White, rose, crimson, light blue, dark red, red lilac, scarlet, scarlet and white, each, ½ oz. 50c., per pkt. 5
Special mixture, all colors, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: My Asters, Queen of the Earlies, were perfection of their kind—plants an even height, color finely mixed, flowers perfectly double and all in bloom at one time. Mrs. John Henderson, Ont. Can.

Park’s Marvel Aster.

**Price 4 pkts. 10 cts., 1 pkt. 3 cts.**

Grows two feet high, bearing large globular flowers, pure white with a blood-red center. The color contrast is odd and grand.

Mr. Park: Your Marvel Asters were the handsomest flowers I ever raised. I think every seed grew. I had a fine bed. Alzina Martin, Erie Co., Pa., Nov. 7, 1905.

Park’s seeds are the best and cheapest. I thank you many times for letting us have the seeds at a small price. Lizzie B. Deisher, Berks Co., Pa., Sept. 16, ’05.
Park’s Silver Cloud Aster.

Pure White, 4 pkts. 10 cts., 1 pkt. 3 cts.

Those who wish a glorious bed of white bloom in autumn should sow a few packets of Park’s Silver Cloud Aster. The plants are graceful in habit and bear large, perfectly double flowers, delicate in texture, faultless in form, and held up by strong stems. Elegant for bouquets or vases when cut. I can also supply colors as follows: Lavender, Shell Pink, Crimson and Indigo Blue, at 5 cents per packet, or all in mixture, including the white, 4 pkts. 10 cts. 1 pkt. 3 cts. See engraving.

Mr. Park: My bed of Silver Cloud Asters is today a grand sight. It is 2 ft. feet and oh, such fine blossoms! They do not care about a little frost, so I did not try to get them earlier.—Mrs. C. E. Kinney, Pierce Co., Wash., Nov. 1, 1903.

Dwarf Chrysanthemum Aster

Special mixture, 4 pkts 10 cts., 1 pkt. 3 cts.

A splendid sort. Plant grows a foot high, and in late autumn are a mass of large double flowers of many colors. Fine for either pots or beds. Set 3 inches apart.

Pure white, light blue, dark blue, fiery scarlet, rose, each, ½ oz. 50 cts. per packet. 6
Twenty other colors, each. 6
All colors, special mixture, 4 pkts. 1 pkt. 3 cts.

Boltz’s Dwarf Bouquet Aster.

Mixed, 4 packets 10 cts., 1 pkt. 3 cts.

This is a very dwarf sort, the blooming plants appearing as little mounds of color, as shown in the engraving. Set plants five inches apart.

Shades of red, blue, white, scarlet and variegated, in fine mixture, 4 pkts. 10 cts., 1 pkt.. 3

Mr. Park: Your Bouquet Asters are truly named, as every flower is a separate one. I noticed a huge bouquet of white, pink, red, blue or purple. Every flower was so double they looked like little roses, and nothing could be finer.—Mrs. Lucinda E. Reynolds, Hart Co., Ky., Oct. 13, 1904.

New Victoria Aster.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

One of the best Asters, either for pots or beds, 16 inches high, well branched and bearing large, very double flowers, imbricated and of the richest colors.

White, yellow, rose, carmine, crimson, dark scarlet, amare, deep blue, indigo, crimson and white, each. 6
Special mixture, all sorts, 4 pkts. 10 cts. 1 pkt. 3

Parks Harlequin Aster.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

Beautiful. Flowers very double, graceful, and of many colors, checkered white. Eighteen inches high, free-blooming, odd and attractive. This curious and beautiful Aster is worthy of more attention. My patience is often given, but the result is glorious.

Crimson, deep violet, light blue, purple, rose and blackish blue, all mixed with white, each 5
Special mixture, all colors, 4 pkts. 10 cts. 1 pkt. 3

Mr. Park: I got a packet of Silver Cloud Aster seeds in the spring. The flowers were very large and extra fine. They were admired by every one. The plant blossomed freely and continuously till after the frost.—Mrs. Feller, Jackson Co., Mich., Nov. 1903.

Bartonia aurea, 2 ft. high, showy yellow flowers 5
Beet, ornamental, crimson, golden and bronze-leaved, mixed, 4 pkts. 10 cts. 1 pkt. 3
Borecole, ornamental cabbage, fine for an outdoor winter bed. 5

New Jewel Aster.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

Grows two feet high, with large, full-double flowers, globular in form and freely borne. A superb sort for garden or pot culture. Always greatly admired.

White, deep rose, light blue, dark blue, scarlet, scarlet and white, each, per packet. 6
Special mixture, all colors, 4 pkts. 10 cts. 1 pkt. 3

Miscellaneous Asters.

Comet Aster, frilled petals, mixed colors 6
Comet New Yellow, light yellow, new color 6
Dwarf German Aster, a foot high, mixed colors 6
Dwarf Queen, fine for pots or edgings, mixed colors 6
German Emperor, large flowers, mixed 6
Crimson mixture, 4 pkts 10 cts. 1 pkt. 3
Globe-flowered German, all mixed 6
Globe-flowered Pyramidal, all colors mixed 6
Globall Asters, very large flowers, mixed 6
Hedgehog, quilled flowers, dwarf, mixed 6
Lady, the most floriferous of Asters, mixed 6
Liliput, small flowers in profusion, mixed 6
Mignon, white, very fine for cutting 6
Mignon, mixed, like Victoria, fine mixed 6
New Dwarf Victoria, fine mixed 6
New Dwarf Peony-flowered Perfection, mixed 6
New Peony-flowered Globe, finest mixed 6
Princess, New floriferous, white 6
Quilled German, finest mixed 6
Red Quilled, all colors mixed 6
Rose Asters, very fine, all colors mixed 6
Schiller, very fine, mixed colors 6
Shakespeare, fine mixed 6
Victoria Needle, fine mixed 6
Vick’s Branching Asters, all colors mixed 6
Washington, large, all colors mixed 6
Mr. Park: I like your seeds. I have acted as agent for other firms, but when I want for my own use I send to you. I think your seeds always produce such fine specimens. Last spring I sent to a noted firm for Ostrich Plume Aster, also to you for the same. The plants I got from your seeds were much nicer, and the flower larger and more feebly-looking.—Mr. J. N. Fairbank, Hillsdale Co., Mich., Oct. 9, 1905.

Bidens atrorosanguinea, the “Black Dahlia,” showy, dark crimson bloom 6
Brachycome, Swan River Daisy, mixed colors 6
Brownallia, New Giant-flowed, blue pot plant mixd 5
Elata, large-flowered, white, blue, purple, mixed 5
**Park's Fine Double Balsam.**

**Special Mixture, 4 pkts. 10 cts., pkt. 8 cts.**

The Improved Double Balsam ranks among our best annuals. Any one can grow the plants from seeds, and they thrive in any garden soil. The plants are bushy, and become a dense mass of rich foliage and exquisite, waxy double flowers in the most charming and attractive colors. The plants are ever-blooming and the flowers are showy on the plant, and when removed make lovely plate bouquets. Started in early September and potted they bloom well in the window in winter. The finest of all Double Balsams is Park's Prize Camellia-flowered.

Plants of this splendid variety grow from two to three feet high, and show great wreaths of immense flowers as double as a Hermosa rose, and in all the most pleasing colors, as follows:

Mr. Park: Your Camellia-flowered Balsams were exceedingly fine, and took first premium at the fair. The flowers were very large and perfectly double. The colors ranged from pure white through several shades of pink to deep crimson. A pure glittening pink was especially admired.—Mrs. Cole, Ottawa Co., Mich.

Mr. Park: In April I bought a packet of your Prize Camellia-flowered Balsam, mixed colors. I planted them out in a bed in the yard, and such flowers as they produced I never saw before. Everybody admired them.—Mrs. H. D. Cunck, Putnam Co., Mo., Oct. 10, 1905.

Mr. Park: I had the finest and handsomest Balsams, from your seeds, that I ever raised. I am a great lover of flowers and wish everyone would try your Double Balsams.—Mrs. Daisy Fuller, Fairfield Co. Ck, Nov. 4, 1905.

**Other Varieties of Balsams.**

**Double Dwarf Balsams,** effective little plants. Twelve varieties of plain and six of spotted, each. ......................................................... 5

Mr. Park: Those who have never tried your Camellia-flowered Balsam as a pot plant have missed a treat. They are beautiful and bloom freely and continuously. M. K. B. Pike Co., Ind., Nov. 4, 1905.

Mr. Park: The grandest of all my flowers was a double white Balsam. It was carefully pruned to one stock, and all blossoms removed when faded; it kept shooting up and sending out new buds until late in October. It was magnificent. Mrs. Hattie W. Harris, Darke Co., Ohio.

**Browallia, Large Flowered.**

Splendid summer and winter-blooming pot plants of the easiest culture; showy and reliable. The kinds I offer are all large-flowered, but the new so-called Giant Browallia has larger and more attractive flowers than the others.

Mr. Park: I planted a packet of your Browallia seeds and the plants bloomed all last winter and even kept up their display throughout the entire summer. The rich blue trumpet-shaped flowers are very beautiful. Mrs. H. E. Lippencott, Burlington Co., N. J., Oct. 3, 1904.

**Daisy (Bellis).**

**Special Mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.**

The English Double Daisy is a dwarf edging plant, hardy, easily grown and continuous-blooming. I offer the best large-flowered strain, and my mixture contains all the sorts.

Calliopsis, New Floriferous.

Special mixture 4 packets 10 cts. 1 packet 3 cts.

For a graceful mass of bright bloom the New Compact Floriferous Calliopsis excels. The plants grow a foot high, begin blooming early and continue in bloom the entire season if seeding is prevented. Grouped in a bed, the flowers, borne on fairy stems, are a waving mass of rich color. Sow fall or spring in the bed where the plants are to bloom.

Brown and gold...5 | Yellow............. 5
Rich crimson..... 6 | Marbled.......... 6

The above compact sorts mixed, 4 packets 10 cts., 1 packet 3 cts.

Tall and perennial sorts, mixed, 4 packets 10 cts., 1 packet 3 cts.

Mr. Park: Last year I planted a packet of your mixed Calliopsis seeds, and both that year and this have enjoyed their bright velvety flowers. They were of beautiful shades of yellow and red, and so bright they dazzled the eye. From this on they are a must-have with me, and would be with all flower-lovers if they knew how bright and pretty they are. Belle Shelton, Wilson Co., Kan., Oct. 16, 1904.

Mr. Park: The Calliopsis raised from your seeds were just grand, the flowers being of such beautiful rich velvety colors. Mrs. M. D., Calaveras, Co., Cal., Oct. 19, 1904.

Mr. Park: My Calliopsis from your seeds has been a mass of lovely bloom all summer. Mrs. Wm. A. Day, Putnam Co., Ind., Oct. 12, 1904.

Park's seeds are the best. Park's service prompt. Mrs. N. P. Nelson, Minn.

Calandrinia in Variety.

Special mixture 4 packets 10 cts. 1 packet 3 cts

For a sunny bed in summer the finer varieties of Calandrinia are worthy of more attention. Sown early in Spring in six inch rows and thinned to five inches apart in the rows the plants will soon cover the ground and make a fine display of bloom. They are fleshy and of trailing habit, and the rose, white, crimson and violet flowers are borne profusely for a long time. 4 pkts. 10 cts., 1 pkt. 3 cts.

From the English Flower Garden: Calandrinias have slender stems much branched and prostrate. The flowers are from one to one and a half inches across, and of various colors from white to rose and crimson violet. They bloom continuously from June till September.

Calendula Grandiflora.

Special mixture, 4 packets 10 cts., 1 packet 3 cts.

The new large-flowered varieties of Calendula or pot Marigold should have a place in every garden. The plants bloom freely and continuously, and in the autumn, after most of the annuals have succumbed to Jack Frost, a row of these Marigolds in their gorgeous yellow hues is very attractive, rivaling the Autumn Chrysanthemums. Grown in pots they are fine for blooming in a cool window during early winter.

Large-flowered Orange........ 5 | Large-flowered White striped... 5
Large-flowered Sulphur........ 6 | Large-flowered Orange spotted.. 6

Special mixture, all colors, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: From one packet of your mixed Calendula seeds I had plants producing right shades of bloom, ranging from pale yellow to deep orange, some striped and others edged white. Mrs. C. F. Bailey, Yakima Co., Wash.

Callirhoe, Trailing Hollyhock.

Special mixture, 4 packets 10 cts., 1 packet 3 cts.

The various species of Callirhoe deserve more attention. The plants are of trailing habit, while the flowers are cup-shaped, bright in color and very showy. Borne freely and continuously they make a fine display in a bed, and are not injured by the hot sun.

Verticillata, a hardy perennial blooming the first season, flowers rich carmine, produced freely throughout the season.

Lineariloba, white and lilac.

Pedata and Compacta, each.

Special mixture, all varieties, 4 packets 10 cents, 1 packet 3 cents.
Canna, Gladiolus-flowered.

Finest mixture, 4 pkts 10 cts., 1 pkt 3 cts.

The New Crozy Gladiolus-flowered Cannas embrace a wide range of colors and varieties from white through the shades of red to deep crimson, and from cream to golden yellow or orange, many varieties showing handsomely spotted and blotched flowers. The foliage is beautiful, being rich green or bronze or variegated, broad and massive, and forming an admirable ground-work for the stately spikes of flaming, Gladiolus-like blooms. The seeds are large, and though somewhat tardy in starting, may be successfully planted by anyone. The plants begin to bloom in three or four months after they appear above ground. The roots are fleshy, and may be kept over winter in a rather dry frost-proof room. The seeds I offer were saved from the best varieties of the originator, Mr. Crozy, and will yield the finest flowers. The named sorts will mostly come true from seeds.

Mme. Crozy, fine scarlet
Merium Lombard, nearly white
Variegata, variegated foliage
Chas. Henderson, crimson
Jules Christien, fine
Queen Charlotte, yellow
Finest mixed of Crozy's large, early-flowering hybrids, 4 pkts 10c, 1 pkt 3c.

Mr. Park: From a packet of your mixed Gladiolus-flowered Canna seeds I had six different colors, and every one a beauty. I sowed the seeds and planted them in the house about the middle of March, and in May set the plants out in the garden, where they have been a delight for several months.—Mrs. Gust Johnson, Saline Co., Kan., Oct. 27, 1895.

Mr. Park: I would advise others to try raising your Gladiolus-flowered Cannas. Mine last year were beautiful. Both foliage and flowers were lovely. I am always pleased with your seeds.—Miss G. Hibe, Madison Co., Ia.

Mr. Park: What beauties I raised from a three-cent packet of your Crozy's Canna seeds! I cut in the hard shell, then soaked in warm water through the day. They all sprouted. The plants began to bloom in July. One was so pretty, a dark rose, looked like crap, and very large-flowered; only 1½ feet tall. One was yellow spotted red; another plain yellow, but very pretty. I was much pleased with them.—Mrs. N. Perry, Ontagamie Co., Wis.

Centranthus, New Semi-Dwarf.

Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

A charming annual rarely met with is Centranthus macrosiphon. It is of the easiest culture from seeds, which may be sown in the garden early, or in the nursery bed to be transplanted. The plants are of dense habit, rather succulent in growth, and bear the delicate little flowers in clusters in great profusion. The new semi-dwarf varieties I offer are especially valuable. They grow a foot high, come into bloom quickly, and make a continuous display throughout the season, until after severe frosts. This lovely annual has not received the attention it merits, and I bespeak for it a trial. It appears well in a hedge or border, and is also desirable as a pot plant. My mixture contains all the colors in good proportion.

M. Y. Flower Co., Madison, Wis.

Celosia, showy bedding and pot plants, much admired and highly prized; of easy culture. Special mixture of Feathered and Comb sorts, 4 packets 10 cents, 1 packet 3 cents.

Chrysanthemum, annual, continuous-blooming, attractive plants for beds or pots; flowers large, bright and attractive. Single and double in splendid mixture, 4 pkts 10 cents, 1 packet 3 cents.
Carnation, The Vanguard.

Special mixture, 4 pkts.
10 cts. 1 pkt. 3 cts.

I take great pleasure in offering my patrons a greatly improved Early-flowering Carnation, the plants of which bloom almost as early as those of the earliest Margaret race. The plants of The Vanguard Carnation are dwarf and bushy, stolting out into compact, very floriferous bushes, and are thus especially suited for pots in the window, as well as beds in a sunny place in the garden. The flowers are mostly full double, as shown in the engraving, are of very large size, exhibit a wide range of colors, and many are exquisitely marked and variegated. All are deliciously clove-scented. I feel that too much praise cannot be given this splendid race of Carnations. It certainly represents the most advanced type of beauty yet attained in this popular highly-prized garden and window flower.

White shades... 5 | Yellow shades... 6
Red shades...... 5 | Variegated...... 6
Finest special mixture, all varieties, 4 packets 10 cts., 1 packet 3 cts.

Mr. Park: Last spring I purchased seeds of you of the New Early-flowering Hybrid Carnations. Now I have twenty-five plants, most of which are budded. Two, a rich, dark red and a pink and white striped, have bloomed. Both have the delicious Carnation fragrance. Miss Edna Musser, Auglaize Co., Ohio, Oct. 21, 1904.

Centaurea, New Giant.

Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

The New Giant Imperial Centaurea, Corn Flower, or Sweet Sultan, is a rare, showy and beautiful annual, the result of a cross of C. Moschata (Sweet Sultan) with C. Marguerite. The plants start readily from seeds, soon begin to bloom, and attain the height of four feet, bearing very large, handsome, fragrant flowers, as shown in the engraving. This is one of the new annuals deserving general cultivation, and I am glad that I can supply my friends with the seeds in all the fine named varieties. My mixture is well proportioned.

Giant Alba, white..... 5 | Giant Favorite, rose... 5
Giant Armida, lilac... 5 | Giant Graniosa, purple 5
Special mixture, all colors, 4 pkts. 10 cts., 1 pkt. 3

Mr. Park: My Centaureas from your seeds were admired by all who saw them. They are easily grown and will well pay for their raising. They bloom until killed by frost and, as each flower lasts a long time, are excellent for cutting. Flora M. Booth, Wash. Co., Pa., Oct. 16, 1904.

Mr. Park: I planted a packet of your Centaurea seeds and I think every seed germinated. I used the plants as a border around a large Canna bed, to which the fine, feathery blooms formed a beautiful contrast. They bloomed all summer, the bed increasing in beauty daily, and is now, October 13, a mass of lovely Carnation-scented flowers. I never saw a flower to keep better when cut, and everyone admires them. I have never had finer flowers than those raised this year from your seeds.

Mrs. A. Bunkwitz, St. Clair Co., Ill., Oct. 13, 1904.
Cosmos, Early Large-flowered.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

Among the most striking and beautiful of annuals, and a favorite for the garden bed or for vase flowers for the living room, is the Hybrid Cosmos in its varied colors. Some where the plants are to stand, when the peach is in bloom, the growth is not retarded, and the buds develop early. The foliage is feathery and of a rich, greenish color, while the bright, graceful, long-stemmed flowers, showing in the breeze, have a charming effect; easily grown in any rich, sunny garden spot. The mammoth varieties will grow six to eight feet high and are especially handsome.

Mr. Park: The Cosmos were very fine. The colors were white, pink, and a rich velvety red. The flowers are very beautiful for vases, and last a long time after being picked. Bertha M. Knott, Dekalb Co., Ind., Nov. 2, 1906.

Candytuft, Annual.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

Beautiful, showy, hardy annuals; grow a foot high; sow early where plants are to bloom; appear best in masses.

Amara, white, oz. 10c.... 5 | Odorata, sweet, white... 5
Tom Thumb, dwarf, white... 5 | Rose Cardinal... 5
Rocket, white.... 5 | Carter's Carmine... 5
Lilac.... 5 | Dwarf hybrid, mixed... 5
Empress, large white... 5 | Flesh color... 5
Dark Crimson... 5 | New Giant Hyacinth-flowered, large, white... 5
All sorts, special mixed, oz. 10cts., 4 pkts. 10c., 1 pkt. 3.

Coxcomb, Celosia.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

Curious, showy and beautiful annuals for beds or pots. My strain is very superior.

Sanguinea, blood red... 5 | Glasshouse Prize, crimson... 5
Sulphura, yellow... 5 | Rose, mixed... 5
Violacea, violet... 5 | Purpurea, purple... 5
Empress, bright crimson... 5 | Cupreata coccinea, scarlet... 5
All the above Coxcombs, mixed, 4 pkts. 10 cts., 1 pkt. 3.

Caccia, Flora's'1 inch Brush; hardy annual; plants a foot high; owers yellow and scarlet, bushy-like, on long, slender stems, mixed...... 3
Caleolaria pinnata, pretty annual; yellow fr's 3
Campion, annual, Venus' Looking Glass; pretty summer flowers for beds; bloom early and freely; six inches high; white, blue, violet, mixed 3
Cannabis gigantea, giant Hemp; foliage plant; 8 feet high; seeds good for canary birds........... 3
Carduus Marianus, a thistle-like plant of easy culture, pretty, variegated foliage............ 3
Carmenella minicolor, the garden Saffron, five feet high, with showy, yellow flowers... 5
Centaura, Bachelors Button, double and single white, blue, rose, variegated, each... 5
The same, mixed, all colors, 6 pkts. 10c. 1 pkt. 3
Cerinthe, annual honey plants, mixed... 3
Chrysanthemum, annual, coronarium and cinerarinum, our bordering varieties, double, single plain, fringed, separate, per packet... 5
The same in special mixture, all sorts, 4 packets 10 cents, 1 packet.

Carnation, New Hybrid.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

Superb early-flowering pinks, blooming in from four to six months after sowing. Plants healthy and hardy, and flowers large, double, scented, of rich colors, and beautiful.

Balmes, new, large-flowered, very double, and of exquisite colors, mixed...... 5
Guuland, splendid, many with yellow tints and variegations, red.... 5
Comtesse de Paris, yellow, 10 seeds.... 5
Chabaud, very double, mixed colors.... 5
French Drumsticks, the new, very double, mixed....... 5
Earliest French Giant, large, new.... 5
Snowflake, pure white, double, very handsome.... 5
Yellow Cross, very beautiful, yellow-tinted, sort... 5
French Cucylus, showy, French hybrids.... 5
Margaret, very early; splendid, double, fragrant flowers; improved, compact strain, best mixed colors, 4 pkts., 10 cts., 1 pkt. 3...
Margaret, red, rose, yellow and striped, each.... 5
New Hybrid Carnation, compact mixture, 6 packets 10 cents, 1 packet.. 5

Capsicum Pepper.

Fine for a hedge or pot culture. I can supply all varieties at 5c. per pkt., mixed, 4 pkts. 10c. 1 pkt. 3.

Centaurium Drummondii, an annual a foot high, showy-flowers, grayish-green, very hardy.... 3
Clarkia, showy, easily-grown annuals of many colors, double and single. Special mixture 4
packets 10 cents, 1 packet 3
Cleome speciosa, purple, spider-like showy flowers at tips of branches, 3 feet high.... 3
Collinsia, half-hardy annuals a foot high; flowers in profusion, white and blue, very showy in autumn is beautiful; mixed colors.... 5
Collonnia, a handsome annual, scarlet flowers.... 5
Commelina cucullata, blue, white, mixed... 5
Commelina Sellowiana, very fine.... 5
Cosmifidum Burridgeanum, a composite plant with white and yellow flowers.... 5
Creps, rather showy, a very easily grown annual yellow, white and pink, mixed.... 3
Cotonia petchuita, Lobelia-like plants for pots or baskets, blue, white, etc., mixed, 4 pkts. 10 cts., 1 pkt. 3.
Cypoglossum linifolium, white, fine annual.... 5
Cypoglossum scutellatum, blue, fine bee plant... 5
Dahlia, Double and Single.

Special mixture, 4 pkts 10c., 1 pkt 3c.
The Dahlia is one of our most beautiful summer flowers, and is easily and quickly grown from seeds, the plants beginning to bloom early in summer, and continuing till frost. To have free-blooming Dahlia plants in a sunny bed of gravely soil, and mulch with suitable litter as hot weather approaches. I offer choice imported seeds of the finest quality, and believe they will delight all who try them.

Choice Double Varieties.
Cactus sorts, extra fine, mixed colors...... 10
Dwarf, superb strain, finest mixture...... 5
Liliput, small-flower'd, extra mixed from named sorts 5
Tom Thumb, very dwarf, many colors in mixture..... 5
Double Dahlia mixed, all the above, 4 pkts. 1 pkt 3.

Choice Single Varieties.
Brilliant, bright scarlet, 5 | Striped and spotted.. 5
Cactus varieties, mixed... 5
Golden Yellow, fine..... 3
White Queen, fine white's
Pinks, mixed, single, double..... 5
Lastrous Carmine, double, splendid.... 5
Pure White, double white.... 5
Rosalie, double, very bright..... 5
Complete mixture, embracing the above choice Single varieties, in splendid mixture, 4 pkts 10c. 1 pkt 3.

Mr. Park: From the 5-cent packet of mixed Double Dahlia seeds I raised as fine Dahlias as I ever saw, no two alike, and not a single one in the lot.—Mrs. H. S. McWhorter, Seneca Co., N. Y., Nov. 1st, 1905.

Mr. Park: I shall never buy Dahlia plants or tubers again, when I can get seeds. From the 5-cent packet bought of you last spring I have all colors and kinds, no two alike.—Mrs. J. H. A., Case Co., Neb.

Mr. Park: My Dahlias from your seeds grew finely, and began to bloom before those from tubers. I had both double and single, and such beautiful markings and colors. They are easy to grow from seeds.—Mrs. J. Hagerman, Sag. Co., Mich., Oct. 26, 1905.

Delphinium—Annual Larkspur.

Special mixture, 4 pkts 10 cents, 1 pkt 3 cents.

Improved old-fashioned hardy annual of great beauty, and of easy culture. Now early, where plants are to bloom.

Dwarf Candelabrum-formed, mixed...... 6
Emperor, Double, finest mixed............. 5
Giant Dwarf Rocket, double, mixed..... 5
Tall Rocket, double pure white, fine..... 5
Double, Finest mixed.................. 6
Ranunculus-flowered, double, mixed..... 5
Stock-flowered, branching, double, mixed 5
Lastrous Carmine, double, splendid.... 5
Pure White, double white.... 5
Rosalie, double, very bright..... 5
Complete mixture, 4 pkts 10c., 1 pkt 3.

Mr. Park: Seeds of your Stock-flowered Larkspur have produced since July, a sheet of bloom, in all shades of pink, red, purple and lavender.—Mrs. E. H. Mace, York Co., Me.

Dianthus, Imperial and Japanese Pinks.

Complete mixture, Single and Double, all colors 4 pkts 10c., 1 pkt 3.

These bloom the first season, and are hardy and free-blooming. The flowers are both single and double, are of very rich, attractive colors, and are produced throughout the season. For Dianem Pinks, are especially fine in markings.

Diadem Pink, dark colors, immense double flowers, rich dark variegations..... 5
Light colors, like the preceding, but of lighter hues; also New Dwarf, each... 6
Splendid special mixture of Diadem Pinks, 4 pkts 10cts., 1 pkt 6

Imperial Pinks, d'ble white, white striped, crimson, spotted, red striped, each 5
New Dwarf, double, white, crimson, copper, rose, each... 6
Imperial Pink in special mixture, all sorts, 4 pkts 10cts., 1 pkt 3

Indian Pinks, double white, rose, each 3

Japanese Pinks, Hedewigii, single, white, crimson, blood red, mixed with purple eye, each 5
Hedewigii, double, white, crimson, red bordered white (See engraving) 5
Laciniatus, single, fringed, white, salmon, blood red, each 5
Double, fringed, white, purple, striped, blood red 5
Hedewigii and Laciniatus, single, mixed, 4 pkts 10cts., 1 pkt 3
Hedewigii and Laciniatus, double, mixed, 4 pkts 10cts., 1 pkt 3
Nobilis, the large-flowering Royal Pinks, each 6

Striped Pinks, mixed, splendid, double striped varieties, 4 pkts 10cts., 1 pkt 6
Superb, single, very deeply fringed varieties, mixed 5
Double, fringed, very handsome, mixed colors 5
Stellars, narrow petals, star-like flowers, mixed colors, 5
Zonalis, bright salmon-red with a broad ring, or zone 5

Complete mixture of all the above single and double varieties, 4 pkts 10cts., 1 pkt 3

Datura Wrightii, Fastuosa, f. pl., Huberiana mixed, Cornucopia, Chlorantha f. pl., each... 5
All varieties mixed, 4 packets 10cts., 1 pkt 3

Diascia Barbers, a new, handsome annual 5
Didiscus coriulene, pretty annual, blue umbels 5
Dracunculus vulgaris, Moldavicum, Bee Balm, myst'd 5
Dianthus, Large-flowered Double.

The new large-flowered double Japanese Pinks are exceedingly rich and beautiful garden flowers. The seedlings started in spring begin to bloom by mid-summer, and from that time till after severe frosts, the dwarf bushy plants continue to make a fine display of exquisite flowers, double to the centre, of great size, and wonderfully rich in colors and markings. Many varieties showing flowers striped, spotted, ringed and margined in the most picturesque and attractive manner. The colors range from fine white to dark velvety crimson, including salmon and rose shades, heretofore unknown in this class of Pinks. For a bed in a sunny place these splendid Pinks are hardly surpassed. Their culture is easy, and the plants never fail to grow and bloom with great freedom, and call forth ardent expressions of admiration from all who see them in bloom. Showy in the garden, they are also prized for bouquets or for vases for table decoration. Offer these Pinks only in mixture, but the seeds are first-class, and will not only yield the finest double flowers, but show a wide range of new and novel colors and variegations. Price, finest mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: My Japanese Pinks from your seeds gave unbounded satisfaction. They began to bloom in July and are now covered with beautiful flowers, no two alike, and all so lovely there is no choice between them.

Mr. Park: From a packet of your Dianthus seeds I raised thirty or more fine plants. The blossoms are of all shades of red and pink, white, cream, blotched, striped and spotted, and the double flowers were as large as Zinnias. They were a mass of beautiful bloom all summer, and are so easy to raise that I shall never be without them again.

Mrs. Susie Holden, Greene Co., Ind., Oct. 6, '04.

Mr. Park: From one three-cent packet of your Dianthus seeds we had a large bed of fine plants that bloomed all summer. There were flowers of almost every color, and they were simply beautiful. I would advise the sisters to try them.

Mr. Park: I bought a three-cent packet of Dianthus seeds from you last spring, and they came up nicely and the plants grew rapidly. They were soon in bloom and their beauty was indescribable—so many lovely colors and markings. We counted twenty-four differently colored flowers in the bed. It is the 6th of October and we have had several hard frosts, but the bed is still covered with flowers and new buds are forming and opening daily. I keep the seed pods picked off.

Mary J. Baumgartner, Lehigh Co., Pa., Oct. 8, '04.

Delphinium, Park's Early-flowering.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Here is a race of Perennial Delphinium or Larkspur, compact in habit and bearing large, handsome flowers in profusion the first season. It is especially useful for beds and borders, and the flowers are fine for cutting, the colors being rich blue, azure blue and pure white. The plants, fairly represented in the engraving, are hardy, and bloom for several years. Cut the flowers freely to prevent seeding, which exhausts the plants and weakens their vitality. This is one of our finest garden flowers, as delicate as an Orchid, showy and generally satisfactory.

Early-flowering blue.......... 5 Early-flowering white.......... 6
Early-flowering azure........ 5 All, mixed, 4 pkts. 10c. 1 pkt. 3

Mr. Park: My perennial Larkspur from your seeds were beautiful beyond description. They were so much admired by everybody that I never want to be without them again.

Erysimum, New Bedding.

Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

I offer seeds of the New Compact Bedding Erysimum. Sown in spring or early summer the plants will show a wealth of rich golden bloom in the autumn, will endure the winter, and bloom again freely the next season. The plants grow ten inches high, are of dense, bushy habit, and each branch is terminated by a large cymous cluster of rich orange, Wallflower-like flowers, dazzling the eye with its golden display, and filling the surrounding air with delicious perfume. The seeds may be sown also in the fall for spring and summer blooming the next year. It is a near relative of the Wallflower, and will please all who find the Wallflower a favorite. Its culture is very simple. The seeds are sown in rows eight inches apart, and the plants thinned till they stand six inches apart in the row. See engraving.

Note—Erysimum, New Bedding, is a charming early-flowering biennial, indispensable for spring bedding, literally covered with golden yellow flowers. Sown early in the year, bushy little plants bloom in the succeeding autumn, and again burst into full beauty in early spring.—English Notes.

I can also supply seeds of Erysimum Perovskianum and Erysimum Pulchellum. Price 5 cents per packet. The New Erysimum, however, is the best.

Eschscholtzia in Variety.

Special mixture, double and single, 4 pkts. 10c., 1 pkt. 5c.

This is the State flower of the Golden State, California, chosen because a species with rich, golden flowers appears in great patches upon the landscape. The plants grow a foot high, are dense and silvery, the foliage being deeply cut. The large, cup-like flowers are born above the foliage on long stems. The florist has developed many colors, and also double flowers, and as a border or low hedge the plants are very effective. Sow where you wish the plants to bloom, and thin to six inches apart. See illustration.

Single, white, rosy white, orange, carmine, deep orange, striped, separate, each color, per pkt. 5c.
Single, mixed, 4 pkts. 10 cents, 1 packet 3 cents.
Double, yellow, white, rose and deep orange each 5c.
Rose Queen, fine rose 5c.
Merta, Cross, handsome yellow 6c.
All sorts, single and double, mixed, 4 packets 10 cents, 1 packet 3 cents.

Gordita in Variety.

Beautiful annuals. The flowers large, shades from white to crimson, many blotted. Plants grow a foot high, and in a sandy soil bloom profusely. Special mixture, 4 packets 10 cents, 1 packet 3 cents. See illustration.

Mr. Park: For show and bloom all summer long, rain or shine, plant Eschscholtzias. They hold up their yellow faces to the sun as if to say "we love you." Plant where they are to stand. I planted a row on the garden walk, and we had hundreds of blooms all summer—Dessa Berry, Wise Co., Tex., Oct. 6, 1905.

Erodium Cruceanum, a plant of the Geranium family, with hygrometrical seeds 5c.
Eupatorium, clusters of Ageratum-like flowers, white, fine for cutting 5c.
Euphorbia variegata, showy, green foliage, with distinct white margin 5c.
Heterophylia, 2 feet high, rich scarlet bracts surrounding the autumn bloom 5c.
Eutroch viscosa, blue and white flowers, showy and in great profusion; annuals a foot high 5c.
Eucaridium, pretty annuals, deserving more attention; pink, dark rose, white, new rose, m'd 5c.
Fedia corniculata, a little Valerian-like annual rarely seen; flowers dark rose, in clusters 5c.

Fenstia dianthiflora, a profuse-blooming annual with rose, white and pink flowers, mixed 5c.
Feverfew, grows 1½ feet high, with double white flowers in profusion 5c.
Gannolepis, Tagetes, a yellow-blooming annual 5c.
Gomnanthes gentianoides, a very dwarf annual; flowers yellow, marked red 6c.
Gaura Lindheinerti, a tall annual, with long spikes of pretty white bloom 6c.
Glaucoma corrullatum, a graceful, silver-foliated annual, with red bloom 6c.
Geranium hybrida, a Pentstemon-like perennial blooming the first year 6c.
Gaillardia in Variety.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Gilias are graceful and beautiful border and edging plants of easy culture. The flowers are in clusters, are mostly white and shades of red and blue, though some show yellow variegations. Sow the seeds either in spring or fall, when the plants are to bloom. They bloom freely and continue until after severe frosts.

Achillea foíla, blue, white and rose, mixed........................................... 5
Capitata, grows 18 inches high, and appears well in masses; blue and white, mixed.............................................................. 6
Dicheloma, new; a very free-blooming sort, with lovely white flowers............................................. 6
Laciniata, Liniflora, Minimi and NFLatis, separate or mixed......................................................... 5
Tricolor, white, violet and rose, separate or mixed (See engraving)......................... 5
Tricolor nano compacta, very dwarf, dense, and profuse blooming; one of the very best for edgings........................................... 5
Complete mixture of the above sorts, 4 packets 10 cents, 1 packet................................. 3

Mr. Park: My Gilias from your seeds were very beautiful— they had such fine foliage, and such modest little flowers. Those in partial shade were the finest.—Mrs. Wilson, Garfield Co., Okl., Oct. 20, 1905.

Helianthus-Sunflower.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Sunflowers are large, coarse plants, and some varieties bear enormous flowers. They are, therefore, among the most showy of garden flowers, and appear well in groups or borders in the background, also as hedges or screens. Their free culture is said to promote the health of a pianotic place, while their large, cheerful flowers, facing the sun, dispel the gloom and are a happy attraction. The new varieties of H. Cucumerifolius are free-blooming garden plants, and the blooms are fine for corsage flowers. All are of easy culture, and can be sown as soon as the ground can be worked in spring.

Primrose-colored, 6 feet high; creamy yellow flowers
Cucumerifolius, small single flower, bushy plant 4 feet high................................................................. 5
Stella, a hybrid of the above; flowers golden yellow, the petals long and the centre small and dark............................... 5
Orion, similar to Stella, but with rolled petals, like a Cactus Dahlia............................................. 5
Diadem, like Stella, but with light ciron petals and dark centre................................. 5

The flowers of the new Hybrid Sunflower are all borne on long stems, and are fine for cutting.
Hebenstreitia Comosa.

Price, 4 pks. 10 cts, 1 pkt. 3 cts.

From South Africa we have a novelty under the above name, which might be properly termed "African Mignonette." The plant grows eighteen inches high, and produces numerous spikes of curiously formed flowers, as shown in the engraving, the ground color white, upon which is laid blotches of bright orange scarlet. The spikes of bloom are exquisitely scented, and excellent for use in bouquets. The plant is successfully treated as a half-hardy annual, and the seeds may be sown in a sheltered garden bed when the apple is in bloom. As yet the seeds are mostly sold in this country at 25 cents per packet, but, I have been able to secure a lot of choice seeds which I offer at a popular price, four packets 10 cents, one packet 3 cents. The plant is worthy of a trial.

A Rare Sweet-scented Annual—A rare annual flower has come to light, which, if we mistake not, will be sought after in the future. It bears the terrible name of Hebenstreitia Comosa. It is pretty in the daytime, but on a warm summer evening a nutty scent floats over the garden. It comes from the Hebenstreitia, and many will agree with the writer that a mingling of perfumes distilled from Mignonette, Rose and Virginian Stock, and such a fragrant flower as the Hebenstreitia gives a new joy to the garden when the flowers are in darkness. A whiff of Hebenstreitia perfume is delicious. The flowers are on a slender spike, and have just the dull shade of white that even the best Mignonette possess. The seeds may be sown outdoors in April.—Viator in the Garden.

Hibiscus, Park's Giant Primrose.

An easily grown and very beautiful and showy flower is the New Giant Primrose Hibiscus. Started early the plants will bloom well the first season, and if kept over and planted out the second season, will form elegant, branching trees, ten or twelve feet high, every branch swaying lovely Primrose-yellow flowers of enormous size, opening fresh every day throughout the season. Patrons who have tried the grand flower report their success and pleasure with it in the highest terms, and I believe it will delight all who try it.

Mr. Park: This year seeds of Park's Primrose Hibiscus were sown in the open ground in only moderately rich soil, but the plants grew over six feet high. Our blossom measured over eight inches in diameter. The flowers are a clear sulphur yellow, with a rich dark center.—L. J. Crawford Co., Ill., Nov. 8, 1905.

Mr. Park: I raised two Primrose Hibiscus from a 3-cent packet of your seeds, started in a window box early in spring. One is seven feet high, the other taller, and the beautiful yellow flowers are charming, as large as saucers, and of the most lovely shade of yellow I have ever seen, like a Hollyhock, but much more beautiful and graceful. I advise all to try it.—Dillie R. Billings, Kansas City, Kans., Oct. 12, 1905.
Kochia-Belvidere Cypress.
4 packets 10 cents, 1 packet 3 cents.

This is an old but rare foliage plant, easily and quickly grown from seed. As a pot plant, or for a low screen or foliage border it is very desirable. The dense and feathery foliage is useful for room or table decoration, when cut, or if grown in pots the plants can be used from time to time for that purpose, as desired. When well grown the plants rival the choice kinds of Asparagus while they are easier grown.

Mr. Park: I do not often see that interesting little plant Kochia. I took first premium at our Fall Fair for collection of Foliage plants, of which one was a beautiful specimen of Kochia, it is now a bright crimson, and much admired.—Mrs. F. C. Jones, Ont., Can. Oct. 28, 1903.

Note.—Few more charming plants have been added to the gardens of recent years than the half-hardy foliage annual which bears the above name of Kochia Scoparia. It is, indeed, a remarkable plant, and is as easy to grow as the commonest of annuals. All that is needed is the same treatment as an Aster, and if planted out at the end of May, it will grow two feet higher and present throughout the summer a mass of graceful greenery; nor is the summer beauty of the Kochia Scoparia its only feature, because in the autumn the foliage assumes a pleasing shade of crimson. Last year I tried the experiment of lifting and potting plants with great success, as for weeks they were highly effective in a conservatory. A first class certificate was given to Kochia Scoparia when it was exhibited before the Royal Horticultural Society, and it was richly deserving, as this is a plant no garden should be without.—G. H. R., in the English Garden, May 9, 1903.

Lavatera Trimestris.
Special mixture; 4 pkts. 10 cts., 1 pkt. 3 cts.

These are beautiful showy annuals, not unlike dwarf Hollyhocks. Plants grow three feet high, branch freely, and bloom all summer. They are fine for hedges, or beds, and of the easiest culture. See eng.

Hunnemannia, Mexican Poppy, a fine annual
Impatiens glanduligera. Giant Balsam; six feet high, crowned with clusters of showy red and white flowers; mixed, 4 pkts. 10 cts., 1 pkt.
Sultan. Zanzibar Balsam; easily grown from seed; ever-blooming; mixed, 4 pkts. 10 cts., 1 pkt.
Jonospidium acutile, charming miniature for a carpet about pot-plants, or for edging; known as Diamond Flower; 4 pkts. 10 cts., 1 pkt.
Kaufmannia arnoldioides, a pretty annual, six inches high; Daisy-like; many sorts mixed.......

Kentworth Hy., a splendid basket plant, mix'd
Lagia elegans, fine annual for beds and cutting;
Leptosyne Stillmanni, new compact; pretty yellow bloom; very early flowering ..

Leptomis, very free-flowering, beautiful dwarf annuals; many varieties, mix'd...
Lunaria, fine plants for beds and pots; many sorts, mixed.

Lupinus, showy plants of easy culture; often 3 feet high; many sorts mixed..

Lychnis, scarlet, rose or white flowers in profusion; fine mixed; all sorts; 4 pkts. 10 cts., 1 pkt.
Linum grandiflorum, scarlet flowers, a fine annual, a foot high.
Lobelia, Annual Varieties.

Complete mixture of all varieties and colors, 4 pkts. 10 cts., 1 pkt. 3 cts.

These are very graceful and beautiful flowering plants for out-door edgings and for indoor pots and baskets. Seedling plants begin to bloom in a few weeks after they are started, and bloom freely and continuously for several months, until exhausted. The flowers are of various shades of white, red and blue, often with a conspicuous eye, as shown in the engraving, and always bright, delicate and attractive. Started in mid-summer the plants are handsome for pots and baskets in winter, and in the sunny window of a cool room will bloom in the spring.

Barnard’s Perpetual, a very fine variety, compact in habit, and in bloom through the season; flowers dark blue with a distinct white eye. Fine for pots, and beds, 4 pkts. 10 cts., 1 pkt... 3
White Lady, large flowered white. 5
Pumila alba, dwarf, compact, white 5
Pumila splendid, dark blue, with white eye, compact. 5
Emperor William, light blue 5
Royal purple, white eye, fine 3
Crystal Palace, blue, for edgings 5
Kermesina, crimson-flowered 5
Prima Donna, velvet maroon 5
Pearl, white, with blue margin 5
Dulplex, double, mostly true 5
Golden Queen, yellow band 5
Ramona, red, white and blue, mix’d 3
All varieties, mix’d, 4 pkts. 10 cts., 1 pkt. 3

Mr. Park: From a packet of your Lobelia seeds I have myriads of delicate little flowers of heaven’s own blue. A spray hanging over the window box on the porch calls forth many exclamations of praise and delight.—Miss Belle Fenque, Avoelles Parish, La., Oct. 17, 1906.

Mr. Park: Tell your patrons if they want a pretty edging to try Lobelia. Of your mixed 3-cent packet I think each seed bought 20 plants. And such a mass of tiny blooms as they were. From a distance they looked like a blue ribbon.—Mrs. J. W. A., Cass Co., Neb., Oct. 12, 1906.

Mr. Park: I am delighted with the three-cent packet of Lobelia seeds I received from you last spring. The plants are faultless. They are now in bloom and are perfect little beauties.—Mrs. A. E. D., Cocks Co., Texas.

Marigold in Variety.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Marigolds (Tagetes) are old-fashioned flowers, but are not to be despised. There are fewer flowers brighter or more attractive. Even a child can start the plants, and they quickly come to bloom, and are a show of brown or golden flowers throughout the entire season, until after severe frost. Every garden should contain a bed of these flowers. The Double African kinds are as showy as Dahlias, and more free-blooming. The French Marigolds are not so large, but are more delicate, and quite as attractive. The single bicolored dwarf varieties are now fashionable, and are fine for edging and borders. A bed of Marigolds is very attractive.

African Marigold, double, (see engraving above) orange, sulphur, quilled yellow, (El Dorado), and all mixed, 4 cleansing each... 4
Tall African mixed, 4 pkts. 10 cts., 1 pkt 3
Dwarf African mix’d, 4 pkts. 10 cts., 1 pkt. 3
French Marigolds, orange, gold-margined, dark brown, striped, sulphur, grandiflora, tall or dwarf... 5
Tall French mixed, 4 pkts. 10 cts., 1 pkt. 3
Dwarf French mix’d, 4 pkts. 10 cts., 1 pkt. 3
French Lilliput Marigold, small flowered, brown, gold and sulphur, separate or mixed... 5

French Dwarf Single, (see engraving, Legion of Honor, gold margin, yellow, sulphur and striped, each... 5
French Dwarf Single mixed 4 packets 10 cents, 1 packet... 3
Tagetes signata pumila, beautiful edging, nine inches high, dense, fern-leaved, and smothered with golden flowers, 4 packets 10 cents, 1 packet... 3
Complete mixture, French, African. Single and Signata, carefully proportioned, containing seeds of all the sorts, price 4 packets 10 cents, 1 packet... 3

Mr. Park: Our African Marigolds are still bright and cheerful. No other flowers will stand as much abuse and neglect, and still bloom and brighten.—Josephine O’Mealey, Lucas County, Ohio. November 25, 1903.
Mignonette, Sweet, in Variety.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Sweet Mignonette is a favorite on account of the delicious fragrance of its flowers, which are produced in large spikes, all the season. The seeds start quickly and the plants soon come into bloom. The new varieties I offer bear various colored flowers, the spikes are very large, and the plants compact. They will be found much finer than the old-fashioned sorts. In some places across Mignonette are sown for hedge purposes, for which purpose the flowers are hardly excelled. For field culture I can supply seeds at $1.00 per pound, or 8 cents an ounce, postpaid.

Grandiflora improved, large flowered............. 3
Golden Queen, yellow flowers, compact habit........ 3
Bismarck, new, improved Machet................ 3
Gabriel, robust, large spikes of Grandiflora........ 3
Gigantea pyramidalis, splendid large-flowered..... 3
Goliath, new, very large trusses of red flowers... 6
Miles Spirai, splendid sort......................... 3
Machet, thick spikes of reddish flowers; excellent for pots......... 3
New Golden Machet, large yellow................. 3
Ruby Machet, coppery scarlet flowers............. 3
Pumila erecta, dwarf compact, fine for pots........ 3
Spiral Defiance, new, strongly developed middle spike........ 5
Victoria red, dark red, fine...................... 3
Common Sweet $.100 per pound, 8 cents an ounce............. 3

Special mixture of all the above sorts, 4 pkts 10 cts., 1 pkt........ 3

Mr. Park: My Mignonette from your seeds is exceptionally pretty with dark green foliage, and flowers of bright red, and its delicious fragrance prevades the whole garden. It is in full bloom now, and I appreciate it so much—Mrs. Ethel Kirby, Jasper Co., Mo., Oct. 1, 1904.

Matricaria—Golden Feather.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

I offer two beautiful varieties of Matricaria or Golden Feather, one bearing white flowers and the other golden ones. The plants have lovely foliage, which shows nicely early in the season, but later the double flowers are borne in such profusion that a plant appears as a globe of bloom, the foliage being hidden almost entirely by the flowers. Fine for borders, edgings or beds. Give the plants a rich soil and sunny situation.

Golden Ball, double golden .......... 5 | Snow Ball, double white .......... 5
Special mixture of white, 4 pkts 10 cts., 1 pkt.................. 3

Mr. Park: The plants that I raised from your Matricaria seeds are lovely. The flowers are very double and handsome. The foliage is a pretty shade of green with finely cut leaves. They are always the admiration and praise of all who see them—Mrs. E. A. Perry, Iowa Co., Wis.

Mimulus—Monkey Flower.

Special mixture, all sorts, 4 packets 10 cents, 1 packet 3 cents.

Pretty plants for pots or baskets; plants grow six to eight inches high, and are covered with showy flowers, many spotted and blotched. They like sandy, moist soil and partial shade.

Choice Gloxinia-flowered Mimulus.

Pardinus, tigred and spotted........ 5 | Pardinus grandiflorus, very large, richly spotted flowers, best quality....... 5
Duplex finest hose-in-hose............. 5 | Grandiflorus, Fire Ring, very bright.... 5
Albus, white—grandiflorus............. 5 | Grandiflorus in fine mixture.......... 5
Albus duplex, hose-in-hose............ 5 | Complete special mixture, of all Gloxinia-flowered Mimulus, 4 pkts 10 cts., 1 pkt 3
Nanus rosaceus, new, superb sort........ 5
Grandiflorus duplex (see engraving), 5

Other fine kinds of Mimulus.

Cardinals, orange........... 5 | Cupreus, Bismarck, dwarf........ 5 | Quinquevulnerus, mixed........ 5
Grandiflorus, red........ 5 | Pictus, red and gold............. 5
Mimulus, Cupreus duplex........ 5 | Moschatus, malk................. 5 | Quinquevulnerus, mixed........ 5
Pictus, red and gold............. 5 | Duplex, hose-in-hose............ 5
Hose-in-hose Mimulus, Cupreus duplex., 5 | Red; golden yellow............. 5
Complete special mixtures of all the above Gloxinia-flowered and Miscellaneous Mimulus 4 pkts 10 cts., 1 pkt 3

Mr. Park: Mimulus is so easily raised from your seeds and the plants so constantly covered with their lovely varied bloom that it is strange they are not more generally grown.—Mr. E. J. Tabor, Niagara Co., N. Y.

Malope. Grandiflora, hardy annuals, one foot high; showy, cupped flowers, white, purple and rose........ 3
Malva crispa, 6 feet tall, crisp leaves, showy........ 3
Malva crispa, 6 feet tall, crisp leaves, showy........ 3
Maritana, rose, veined.................. 3
Minuta, scarlet, very pretty............. 3
Moschatas, perennial, rose and white, mixed........ 3
Complete mixture, all sorts, 4 pkts. 10 cts., 1 pkt........ 3

Matthiola bicornis, sweet evening Stock.................. 3

Maritnya fragrans, red with yellow throat; Lutea, orange-yellow; Proboscidea, lilac; each........ 3

Malvaviscus Aphyllus, Ice Plant, Dev Plant, and Tricolor, separate or mixed........ 3

Mimosa pudica, Sensitive Plant........ 3

Matthosaic spinosa, large, curious calyx........ 3
**Mycositis, Forget-me-not.**

*Special mixt., 4 pkts. 10 cts., 1 pkt. 3 cts.*

The Forget-me-not is a charming little flower, modest, delicate, exquisite in color, graceful and fragrant. No intelligent person can help admiring it. With some its admiration is almost a passion. Lately it has been greatly improved, and the plants now grow so compactly and bloom so freely that they appear as a globe of soft, rich color. Started in spring the plants bloom in autumn; started in August, they bloom early the next season. They like a moist, rather shady situation.

Alpestris, bienniel, of compact habit, and bears a mass of large flowers in dense clusters. Blue, white, indigo, rose and striped, each. ..... 5

The colors mixed, 4 pkts. 10 cts., 1 pkt. 3 Alpestris, elegantissima, handsome, semi-dwarf sort of pyramidal habit, fine for garden or window, mixed. ..... 5

Alpestris, variegatis, golden foliage. ..... 5

Victoria, one of the best for pot culture ..... 5

Nana compacta, blue, white and rose; superb; separate or mixed. ..... 5

Stricta, erect, pillar-like racemes of bloom; highly recommended; royal blue, rose and white, each. ..... 5

Stricta, in special mixture, 4 pkts. 10 cts., 1 pkt. ..... 5

Mupicola, Love Star, a beautiful, large-flowered dw. sort, excellent for pots; very fine blooming; blue; see engraving. ..... 5

*Mr. Park: My hanging basket of Myosotis from your seeds thrives wonderfully, and is so full of bloom it resembles a patch of blue sky.—G. C. Jaycox, Lorain Co., Ohio, Oct. 10, 1904.*

**Mirabilis, Four-O-Clock.**

*Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.*

An old but favorite annual. Plants grow to dense, globular bushes a foot to three feet high, and are covered every evening during summer with large, delicate, beautiful flowers which make the garden air redolent with perfume. The dwarf varieties are especially handsome, and have blotted foliage, which is very ornamental. Tall white, yellow, red, white and yellow, crimson; violet, lilac, white and rose, each. ..... 5

Tall varieties mixed, 4 pkts. 10 cts., 1 pkt. ..... 5

Dwarf white, yellow and red. white and yellow, yellow. ..... 5

Dwarf varieties mixed, 4 pkts. 10 cts., 1 pkt. ..... 5

*Complete mixture, tall and dwarf, in all colors, 4 packets 10 cents, 1 packet 3 cents.*

*Mr. Park: The Mirabilis seeds received from you last spring produced fine, thifty plants. The blossoms were of a great variety of colors, including red, red and white, pink, pink and white and purple. They made a very showy and handsome bed.—Hazel Benson, Polk Co., Mo., Oct. 4, 1904.*

**Nemesia, New Hybrids.**

*Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.*

The Nemesia Hybrids are beautiful annuals, excellent as pot plants, and showy in the garden. The plants grow a foot high, are of dense, compact habit, and bloom very freely throughout the season. The hybrids of N. Strumosa, a new species from South Africa, are especially handsome, and greatly admired in Europe.

*Floribunda compacta alba* ..... 5

*Compacta, bloalon, blue and white* ..... 5

Compacts, coccile, blue. ..... 5

Strumosa, new, large-flowered, mixed. ..... 5

Novae.—Nemesia Strumosa bears flowers of various March begin to bloom in June and continue until late in September. The flowers are of various colors, including red, rose, yellow, and white. They are very showy and nicely scented. In April I transplanted them into the garden, and they bloomed continuously in June and continued in bloom until late in October. They were as handsome as Phlox Drummondii, and were greatly admired by all who saw them.—Mrs. Wilson, Garland Co., Okla., Nov. 1 1894.

*Nemophila, hardy annual a foot high; flowers white, red and blue, often spotted; sow in spring or fall; mixed, 4 pkts. 10 cts., 1 pkt.* ..... 3

Nierembergia gracillima, a profuse-blooming plant, blooming in winter in pots when sown early in spring; lilac. ..... 3

**Palustris semperflorens, everblooming marsh Forget-me-not** ..... 8

Semperflorens grandiflora, Water-witch; new, large-flowered. ..... 6

Asorica, fine for pots. Blue and white, separate or mixed. ..... 6

Oblongata, perfecta, new, large-flowered, very long blooming, splendid. ..... 6

Disutvata, perennial, large-flowered, true white, blue and perfection blue, separate or mixed. Each 5

*Myosotis, Forget-me-not, in complete special mixture, all varieties, 4 pkts. 10 cts., 1 pkt.* ..... 3

*Strumosa nana compacta grandiflora, new hybrid, mixed, 4 pkts. 10 cts., 1 pkt.* ..... 3

Versicolor, pretty and free blooming. ..... 5

Complete special mixture, all varieties, 4 pkts. ..... 10

Shades from white to crimson, and seedlings started in the autumn. Bed out in May.—Book of Gardening.

*N. jaycoxii,* a little trailing plant with blue and white flowers; fine for pots and baskets; mixed colors. ..... 3

*Nigella damascena, growing a foot high, bearing double white and blue flowers, known as Love in a Mist; mixed, 4 pkts. 10 cts., 1 pkt.* ..... 3

*Nolana,* a little trailing plant with blue and white flowers; fine for pots and baskets; mixed colors. ..... 3
Nicotiana, Ornamental.
Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

Valuable plants for foliage and flowers. Some make grand beds upon the lawn, both foliage and flowers being attractive. All are of easy culture. Give the plants rich, moist soil, warm, sunny exposure.

**Atropurpurea** grandiflora, very large, semi-tropical leaves, and clusters of rosy flowers; six feet high and rather coarse, but useful for a clump in the back-ground. 6

**Colossea**, very showy as a semi-tropical garden plant; five feet high with immense foliage. 5

**Mamphylla gigantea**, six feet high, bearing enormous leaves and tresses of tubular flowers; appears well in the back-ground, or among shrubbery. 5

**Coburn fol. variegatis**, a small per centage bears foliage blotched with white; very handsome. 5

**Affinis**, white, blooming freely in the evening throughout the summer; delightfully fragrant; blooms well in the winter when cut back and potted early in autumn; 4 packets 10 cents, one packet. 3

**Sylvester**, tall-growing, with fragrant, drooping flowers that remain open throughout the day; 4 packets 10 cents, 1 packet. 5

**Acutifolia**, white, fragrant. 5

**Sandersae**, the new and beautiful sort of recent introduction, shown in the large engraving; grows three feet high, and is a mass of rich bloom throughout the season, the colors varying from white to rich crimson; fine for bedding as well as for pots; a grand acquisition. Seeds direct from the originators Sanders & Son, mixed colors, 4 packets 15 cts., 1 packet. 5

Complete special mixture of all sorts, 4 packets 10 cents, 1 packet. 5

Nasturtium—Tom Thumb.
Dwarf Nasturtium, special mixture, 4 packets 10 cents, 1 packet 3 cents.

These are bright, beautiful and very fragrant annual flowers, desirable either for beds or pots. Anyone can grow the plants from seeds, and they thrive in any soil or situation. They grow a foot high; and are a mass of splendid flowers throughout the summer and autumn, especially when kept from seeding. White, scarlet, crimson, yellow and spotted are the best for bedding, and I can supply these separately for that purpose at 35 cts. an ounce.

- **Yellow and Scarlet** 5
- **White** 5
- **Crystal Palace Gem** 5
- **Crimson** 5
- **Empress of India** 5
- **Scarlet** 5
- **Yellow Marbled Scarlet** 5
- **Yellow** 5
- **Scheuerianum cocineum** 5
- **Spotted** 5
- **Golden King** 5
- **Rose** 5
- **Lady Bug** 5
- **Chameleon** 5
- **King of Tom Thumb** 5
- **Coeeruleum** 5
- **Cocineum fol. aureus** 5
- **Beauty** 5
- **Special mixture, oz. 15 cts., 4 pkts. 10 cts., 1 pkt.** 3

Nycterulus, Fragrant.
Beautiful annuals, becoming a clustered mass of sweet-scented flowers; showy, easily grown, and deserve general cultivation.

- **Capsella, white, and Selaginohes, lilac, each** 5
- **Both kinds in special mixture, 4 pkts. 10 cts., 1 pkt.** 3

Nasturtium—Tom Thumb.
Pansy, Roemer's Giant Prize.
Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

Doubtless the most popular herbaceous perennial flower in cultivation is the Pansy, and it deserves all the praise it receives. From earliest spring until the snows of winter appear it delights us with its large, bright, delicate-textured, fragrant flowers in all the shades of the rainbow, and in the most striking and beautiful variegations as well as self colors. The popularity of the Pansy has led many florists to give it special attention, and this competition has wonderfully improved it, so that the flowers of to-day far surpass in size and gorgeous coloring those of a decade ago. After a trial of the high-class strains I have decided that there is nothing in Pansies that can surpass Roemer's Giant Prize varieties. Mr. Roemer is a German who gives his great specialty, the Pansy, his best thought and care, and those who plant his seeds can depend upon getting something extra. I have pleasure in offering my friends seeds direct from his hand. Pansy seeds start from June on to August; and plants begin to bloom in a few weeks. If not exhausted the first year, they will bloom the second and often the third season. The plants like a partial shade and moist but well-drained soil. Plants started in mid-summer make a spring bed that rivals the Dutch bulbs in their gorgeous beauty. I offer Roemer's seeds in mixed shades, but can supply almost any variety in cultivation, especially the choice new ones. The diversity is so great in Pansies that I believe the mixture of shades preferable in buying, and I therefore confidently recommend them.

**Red in variety**, embracing bright red, rosy red, rich scarlet, and red with tints and shadings, etc., 4 pkts. 10 cts., 1 pkt. 3 cts. 3

**Blue in variety**, embracing dark blue, dark violet, blue, dark violet blue, jet black, purplish black, etc., 4 pkts. 10 cts., 1 pkt. 3 cts. 3

**Yellow in variety**, embracing rich pure yellow, golden yellow, yellow with eye, yellow with spots, yellow shaded, 4 pkts. 10 cts., 1 pkt. 3 cts. 3

**Striped and Flaked**, embracing a great variety of colors, all distinctly striped, flaked and splashed, 4 pkts. 10 cts., 1 pkt. 3 cts. 3

**Bloated and Spotted**, embracing pure ground colors, with blotches and spots showing in peculiar and striking contrast; marvelous in size, form and odd markings; 4 pkts. 10 cts., 1 pkt. 3 cts. 3

**Shaded and Margined**, embracing all of the leading colors, margined and shaded and rayed in superb and charming contrast; many light and dark shades; 4 pkts. 10 cts., 1 pkt. 3 cts. 3

**Axure in variety**, embracing lovely new shades of light blue, azure, ultramarine and lavender blue, some strikingly marked and tinted; 4 pkts. 10 cts., 1 pkt. 3 cts. 3

**Mixed color**, embracing a variety of superb shades and markings not included in above offerings, as plain and fancy faces of orange, bronze, peacock lilac, violet, etc.; many rare varieties mixed, 4 pkts. 10 cts., 1 pkt. 3 cts. 3

Complete mixture of all shades, colors and markings carefully prepared, 4 pkts. 10 cts., 1 pkt. 3 cts. 3

Mr. Park: Your Roemer's Giant Pansies were just grand. The colors were variegated, red, yellow, white and purple, and I never found, anything equal to them in size. A. Taylor, Burl. Co., N. J., Sept. 30, 1906.

Superb Named Giant Pansies. Each, per Packet 5 Cents, or in Complete Mixture with others, 4 Pkts. 10 Cts., 1 Pkt. 3 Cts.

Aeonium, Royal Purple, Bright Golden Yellow, Bronze Shades, Black Blue, Emp. William, Five King, Golden Queen, King of Blida, Light Blue, Lord Beaconsfield, Pres. McKinley, C. x Enigma, Prince Bismarck, Queen, color, Rosy Lilac, Snow Queen, Striped Perfection, Violet Blue, Candidissima, Golden Gem, Marbled Yellow, White with eye, Yellow with eye, Ruby Red, Caesars Giant, Hortense Rose, Giant Spotted, Masterpiece, Freya, Snowflakes, Peacock, Emperor Frederick, Fairy Queen, Mourning Bride, Pres. Carnot, Purple Violet, Red Riding Hood, Psyche, Victoria, Wallflower Brown, Violet margined White, Gold-margined, Meteor, Mahogany-color, Cardinal, Atrosanguinea, Giant Parisian, Marbled Yellow and Marbled White, each 5 cents per packet.

Oxalis, valuable plants for pots and baskets, and useful in bedding. Floribunda, mixed; Rose, mixed; Sensitiva, white-leaved; Tropocladetis, brown foliage, yellow bloom, for beds; each. 5

Oenothera, Evening Primrose; large yellow, white and rose flower opening in the evening. Acaulia, Laxandra mamon, as deep as Fraserr, Johnsoni, etc., separate. 5

Special mixture, of all sorts, 4 pkts. 10 cts., 1 pkt. 3 cts. 3
**Papaver, Annual Poppies.**

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

The poppy is an old garden flower, but it still retains its place as a useful, showy and beautiful annual. The flowers are always bright and attractive, and a bed of the plants is gorgeous. Few hardy annuals are of easier culture, and few, if any, colors are more brilliant in character. The seeds in autumn, or early in spring, where the plants are to bloom, and thin out until they stand six inches apart. The newer varieties are grand, and never fall to please. By all means sow a bed of the improved Poppies. You will never regret it.

**PARK'S DOUBLE-FLOWERED GIANT POPPIES.** (See Eng.)

This is a race of Poppies growing from 2½ to 3 feet high. The foliage is massive, beautifully crimped, and of a lovely silver-green color. The flowers are perfectly double, of immense size, and produced on long, strong stems. The plants are admirable as single specimens, and grand when massed in a bed. I offer the following splendid colors:

**Pentstemon, Gloxinia-flowed.**

**Special mixture, 4 packets 10 cents, 1 packet 3 cents.**

The new Hybrid Pentstemons have large, showy, Gloxinia-like flowers of all shades, from rose to scarlet, from white to rose and lilac, and from lavender to blue and violet. Plants grow two to three feet high and bloom throughout the autumn. Give them a sunny bed.

Mr. Park: How I wish all flower-lovers could have seen my bed of Gloxinia-flowed Pentstemons raised from a 3-cent packet of your seeds. I had eleven plants—all different colors. Some were striped and spotted, and a white and rose mixture, showed off the flower as a rose. I sowed the seeds in a box, set the plants out the last of May, and they began to bloom in August. They were greatly admired, and I want a large bed next year.

Mrs. N. Perry, Outagamie Co., Wis., Oct. 7, 1894.

Ms. Park: The large-flowering Petunias, (single), were beautiful. There were several colors and all were unusually large and finely shaped. They are covered with bloom now, and I shall keep them in the window for the winter. I had good success with all the seeds ordered, but those mentioned were unusually fine. Bertha M. Knott, Dekalb Co., Ind., Nov. 2, 1905.

**Park’s Hybrid Bedding Petunias.**

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

These are exceedingly free-blooming. The plants branch and soon cover the bed with a rich, fragrant flowers, continuing so throughout the season, if not exhausted weaving. The flowers are not large, but show great diversity in colors, and elegant contrast in variegation. They are among the most useful and beautiful of our bedding annuals.

| Pure white. | 5 Venosa, velevet. | 3 Dark velvet-red. |
| Carmine, white throat. | 6 Yellow-throated. | 5 Mixed colors, 4 packets. |
| Pure white. | 6 Ruffled-grown. | 9 Mixed colors, 4 packets. |

Bedding Petunias, finest double, first quality, 4 packets 10 cents, 1 packet. 3 cts.

Mr. Park: From a three-cent packet of your single, bedding, mixed Petunias I had enough for a large bed, and it was a great success. I never saw so many different shades and markings in Petunias. I had pinched off the tops of some of them, and have rooted them in water for the house. One, I especially admired, was a color I never saw in Petunias before, a dark, velvety maroon, shaded black, very odd and beautiful. Mrs. G. F. Clark, York Co., Me., Oct. 9, 1905.

Mr. Park: I sent last spring and got a three-cent packet of Petunias. They were “Ruffled Giants”, sure enough. They were great beauties. All who love flowers should try them. Mrs. Vena B. Heffner, Braxton Co., W. Va., Oct. 25, 1905.

**The New and Beautiful Dwarf Edging Petunias.**

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

These are of compact growth, and excellent for pots and beds. The flowers are not as large as the robust kinds, but are very freely produced, and are of the leading colors. They are always satisfactory.

| Brilliant, rosy carmine. | 5 | Stellaris, rosy stripe, white | 5 | Snowball, pure white. | 5 | Multiflora, striped. |
| These dwarf sorts mixed, 4 packets 10 cents, 1 packet. | 5 | Multiflora, striped. |

Mr. Park: I would advise anyone who has a bed of dry soil to try Park’s New Hybrid Petunias. My bed is a handsome sight, such rich, velvet-looking flowers. Miss L. Bogards, Greene Co., N. Y., Aug. 1, 1905.
Phlox Drummondii, Improved.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

One of the most desirable of annual flowers is the Phlox Drummondii. Seedling plants begin to bloom in a few weeks after starting, and continue to increase in size and floriferousness until cut down by the severe frosts of winter. The flowers are in large clusters, are bright and varied in color, and exceedingly showy, while their fragrance scents the entire garden during the summer evenings. As bedding plants, as well as for pots and edging, Phlox Drummondii is at present in a prominent place. The great improvements in form and color recently brought about by enthusiastic florists make the varieties now offered far superior to those grown some years ago. Set plants six or eight inches apart. I offer first-class seeds of the following splendid races:

**New Large-flowered or Grandiflora Phlox.**

This race has very large, showy flowers in huge clusters, and the diversity of color and variegations is nameless. The plants are robust, bloom abundantly, and make a grand display in a group or bed. My collection of all Phlox is complete, and all the sorts are included in my special mixture.

| Alba, pure white                      | 5 |
| Oculata                                | 5 |
| Atropurpurea, purple                   | 5 |
| Albo-oculata                           | 5 |
| Striata                                | 5 |
| Brilliant                              | 5 |

**New Hortensia-flora Phlox.**

(BRILLIANT-FLOWERS.)

**Special mixture, 4 pkts. 10 cts., 1 pkt. 3c.**

These are not so large in the size of the individual flowers, but the clusters are very graceful and very abundant. For pots as well as for showy beds, they are desirable, the plants being of dense growth, and the colors brilliant, varied and beautiful.

| Rose                          | 5 |
| Chamomile rose                | 5 |
| Pink, white eye               | 5 |
| Triumph                       | 5 |
| Rose, white eye               | 5 |
| Purple                       | 5 |
| Scarlet                      | 5 |
| Complete special mixture      | 4 pkts. 10 cts., 1 pkt. 3 c. |

**Complete Special Mixture.** Including all varieties described above, 4 pkts. 10 cts., 1 pkt. 3 c.

**Cuspidate and Fringed Phlox.**—The flowers of this class have cut and fringed petals. They are much admired by some persons. Alba, white; Cocinea, scarlet; Blue, marbled; Purpurea, purple; Rosae; Salmonia, salmon, and Violeacae, each 5 cts. All colors in special mixture, 4 pkts. 10 cts., 1 pkt. 3 c.

**Semi-double Phlox.**—These bear semi-double flowers of the leading colors. They are fine for pots or garden beds. Dark Red, Pure White, Bright Scarlet, Pale Yellow, Brown Red and Crimson, each 5 cts. Special mixtures all colors, 4 pkts., 1 pkt. 3 c.

**Compact Dwarf sorts.** Mixed 4 pkts. 10 cts., 1 pkt. 3 c.

色情 by Order.

Mr. Park: I received a free packet of your Phlox Drummondii and they surely are great beauties. They are the prettiest I ever raised. They are all different colors. They don't mind the frost, for they are blooming as prettily now as in midsummer, although this is the twenty-sixth of October.—Mrs. Vena E. Hefner, Braxton Co., W. Va., Oct. 26, 1905.

Mr. Park: I know of nothing that will give more satisfaction than the common Phlox Drummondii, with its good blooming qualities and variety of colors. I had a border of them that attracted more attention than anything else. They are so easily cultivated. J. E. Glossie, Butte Co., S. D., Oct. 24, 1905.

**Polygnum.**

**Special mixture, 4 pkts. 10 cts., 1 pkt. 3 c.**

Oriental, dwarf white... 5

Dwarf red... 5

Variegated foliage... 5

Special mixture, all colors, 4 pkts. 10 cts., 1 pkt. 3 c.

Oriental varieties are annually blooming the first season. The others are hardly perennials blooming the second season. All are graceful and handsome.

Mr. Park: I first bought seeds of you eleven years ago, and since that time have had ample opportunity to be convinced that no one else sells better or cheaper seeds. Your liberal premiums, extras, sample packets and special cheap collections, in connection with the reliable quality of both seeds and plants produced therefrom, are always sure to give entire satisfaction.—Mrs. A. H. Bowdoin, Otero Co., N. M., Oct. 17, 1904.

**Phacelia.**

**Special mixture, 4 pkts. 10 cts., 1 pkt. 3 c.**

Congoza, mauve... 5

Campanularia, bright... 5

Tanacetifolia, blue... 5

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 c.

The first two are excellent for bee pasture, as well as showy in the garden. Phacelia campanularia is new, has large flowers and blooms early and for a long time. It is beautiful.
Portulaca, New Double and Single.

Complete mixture of all colors, single and double, 4 packets 10 cts., 1 packet 3 cts.

The New Large-flowered Portulaca is hardly excelled as a garden annual. The little silvery seeds may be sown as soon as the ground can be worked, and in a very short time the plants will appear, grow rapidly in the hot sunshine, branch freely and show a mass of large, bright flowers every morning. They are low and spreading, and if set six inches apart, they will completely cover the bed. I have seen magnificent circular beds of Portulaca, the center being raised, and the colors planted in rings of white and rose, and scarlet and gold. The double-flowered varieties are even more attractive than the single, but all are fine. I offer the best quality of seeds, and my complete mixture contains all the varieties of both double and single kinds in fair proportion. See engravings.

Note.—For carpet beds nothing is finer than Portulaca. By sowing separate colors designs may be produced with ease. Plants are dwarf and dwarf resistant and produce freely quantities of brilliant flowers; white, pink, rose, magenta, red, cream, yellow, orange, and striped. Fancy shaped beds may be sown with mixed seeds. Square beds may show in strips of colors or round beds in rings. They will be ever visited with admiration when in bloom. Sandy soil should be selected for the beds.—Clifford N. Raynor.

**Double Varieties of Portulaca.**

- White
- Golden yellow
- Rose, striped red

**Single Varieties.**

- Straw color
- White striped
- Sulfur
- Rose, striped

SPECIAL MIXTURES OF DOUBLE VARIETIES, 4 pkts. 10c., 1 pkt. 3c.

Singular Portulaca flowers and plant.

Ricinus.

*Special mixture, 4 pkts. 10c., 1 pkt. 3c.*

- Borbon, arboreus
- M Miranda
- Sanguineus
- Zanbariensis
- Enormis
- Maculatus
- Niger
- Picturatus
- Splendid semi-tropical annuals. R. arboreus grows 11 ft. high, and is very showy in a group. R. sanguineus, 6 ft. high, has reddish foliage, and R. mirabilis 3 ft. high, bronze foliage. The three make a fine group. R. Zanbariensis grows 4 ft. high, with large leaves. All are very fine for a hedge or back-ground. Grown as easy as corn.

Mr. Park: My Castor Oil Beans grew ten feet high, and the leaves were very large and graceful. I wish they might live and grow all the year.—Mrs. Henry Moore, Fortage Co., Ohio, Oct. 27, 1905.

Rudbeckia.

*Special mixture, 4 pkts. 10 cts., 1 pkt. 3c.*

- Bicolor Superba
- Semi-plena
- Special mixed 4 pkts. 10c., 1 pkt. 3c.

A free-blooming, showy annual. Plants grow a foot high, and bear single and semi-double flowers. Seedlings are easily grown, and begin to bloom early. This plant is a near relative of H. laciniata, or Golden Glow, but grows only two feet high. It forms a showy group or bed.

Saponaria, Scarlet Queen, 5c; Calabria, mx’d, 5c; Ocymoides splendens, 5c; special mix., 4 pkts. 10c, 1 pkt. 3c.

Scarlet Queen is a low, compact annual, fine edging, bearing innumerable rosy-scarlet flowers. Calabria is similar, pink and white. Ocymoides is an elegant, trailing perennial, for mounds, rockeries or cemeteries; rose.
Salpiglossis, New Emperor.

Special mixture, all sorts, 4 packets 10 cents, 1 packet 3 cents.

The New Emperor Salpiglossis is an exceedingly attractive annual. The plants grow three feet high and become swaying masses of very large Petunia-like flowers with a rich velvety texture, and in the most gorgeous colors, as royal purple, crimson, rose and sulphur, many of the flowers showing distinct pencillings of gold, carmine and violet. Indeed only those who have seen these superb flowers can have any conception of their richness and beauty. The plants are of easy culture from seeds, and should be set ten to twelve inches apart in a sunny bed. The size of the flowers will be improved during hot weather by a mulching of stable litter. The plants bloom from July until frost, if not allowed to seed. This is a splendid annual and cannot be too highly praised. I freely recommend it.

Mr. Park: Last spring I bought some Salpiglossis seeds of you and the plants have given me so much pleasure that I must tell you about them. I have tried Salpiglossis seeds on other soils, and plants were always straggly and unsatisfactory. These from your seeds, however, were compact in growth and bore many large flowers, which were beautifully colored and marked. We have had some hard frosts, but they are still blooming.

Mr. Park: If those who cultivate flowers would try a packet of your Salpiglossis seeds the coming spring they would be well repaid. Those I raised were of many colors, with petals like violet, elegantly veined and penciled. They blossom freely for several months. Mrs. C. E. Davis, Hampshire Co., Mass., Nov. 15, 1895.

Salviias in Variety.

Special mixture, all sorts, 4 packets 10 cts. 1 pkt. 3 cts.

Salviyas are beautiful and very showy flowers, the prevailing colors being blue and scarlet. Salvia patens has exquisite blue flowers. Salvia scabra makes a graceful and attractive display when the plants are massed. The most attractive kind, however, is Salvia splendens, commonly known as Scarlet Sage. I offer improved, large-flowering, robust varieties, which are a blaze of rich color throughout autumn. They like a sunny place and plenty of moisture while growing. Fine for beds.

Mr. Park: Tell your patrons who wish a fine blue flower to try Salvia Patens. It is a lovely shade of dark blue, that color so rare in a flower. I find it a valuable addition to the flower bed. Mrs. C. E. Davis, Hampshire Co., Mass., Nov. 15, 1895.

VARIETIES OF SALVIA SPLENDENS.

- Grandiflora, large spikes of scarlet flowers
- Alba, spikes of large white flowers
- Pendula, drooping spikes of scarlet flowers
- Prostrata, new, scarlet

OTHER VARIETIES OF SALVIA.

- Carduus blue
- Coreopsis, scarlet, fine
- Eremocarpus, blue flowers, tuberous
- Patens, blue flowers, tuberous

Mr. Park: I wonder that the Scarlet Sage (Salvia splendens) is not generally known. It was the brightest, most showy plant in my garden, and everyone who saw it asked its name. It is easily transferred to pots while in bloom. I gave a number to neighbors for winter bloomers, but those left in the ground continued to bloom after nearly everything else was cut down by frost. J. E. Glossett, Butte Co., S. D., Oct. 24, 1905.

Silene, Compact.

Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

The compact varieties of Silene are charming, hardy annuals for beds and edgings. Seeds may be sown either in fall or spring. The flowers are mostly white and pink, and produced so abundantly as to hide the foliage.

- Sanvitalia, double, compact, a fine dwarf, low-flowered edging plant
- Sedum, cornus, blue & one Crop; dwarf, free-blooming plants for crockeries or beds
- Sensitive Plant, (Mimosa pudica) a curious leguminous annual, leaves droop and close when touched, fine for pots

Mr. Park: I ask that you please order the following:
- Rose Queen, fine rose-colored flowers
- Bonneti, double, purple, fine
- Schizopetalum, Walkeri, white, fragrant, pretty
- Shortia, California, 4 ft, Daisy-like yellow bloom
- Sphondyline speciosa, a foot high, flowers Daisy-like, yellow with brown...
Scabiosa, New Large-flowered.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

The improved varieties of the old-fashioned Scabiosa, or Mourning Bride, should be found in every flower garden. They are beautiful. The plants are bushy, as indicated in the engraving, and the large, globe-like flowers are produced in abundance throughout the entire season, if freely cut. The improved varieties not only develop full-double flowers nine inches in circumference, but appear in a marvelous diversity of shades—from white to yellow, azure to black-purple flesh-color to fiery-scarlet, etc. I know of no other annual that will give better satisfaction than this new race of Scabiosa. The plants grow from two to three feet in height, bear their huge flowers on long, sturdy stems, and thrive in any garden, while the flowers are showy in beds and excellent for bouquets. The dwarf compact kinds are fine for winter blooming in pots.

Schizanthus—Butterfly Flower.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

The varieties of Schizanthus are useful alike for either pots in the house, or beds in the garden. The plants are easily started, begin to bloom early, produce their flowers in wonderful profusion, and are showy for a long time. The flowers are rich and graceful, borne upon slender stems, and at a distance appear as if floating in the air, hence are often called Butterfly Flowers.

Mr. Park: I had not a more satisfactory annual in my gardens than the beautiful airy Schizanthus from your seeds.—Mrs. Alice Willis, Phillips Co., Kas., Oct. 7, 1904.
Ten Weeks’ Stock in Variety.

Few persons are aware of the great beauty and usefulness of the superb double varieties of Ten Weeks’ Stock. Hardly one desirable requisite of a first-class flowering annual can be named that they do not possess. Good habit, handsome foliage, free and continuous blooming, showy spikes of large, double flowers, rich and varied colors, delicious fragrance, easy culture and freedom from insects are all attributes of this grand annual. The plants are beautiful either in garden beds or pots in the house. Do not let the plants crowd in the seed-box, and transplant with care, that they do not become stunted. Mulch the bed with stable litter as hot weather approaches. The seeds I offer were saved only from selected pot plants by German specialists, and will produce a large percentage of perfectly double flowers. The mixture contains the finest colors well proportioned.

Dresden Perpetual or Branching.

These grow 1/2 feet high, and have from June till September an abundance of large, rossette-like, double flowers on long spikes.

Apple Blossom............. 5
Canary yellow............. 5
Crimson..................... 5
Dark blue.................. 5
White....................... 5

Dwarf Early Large-flowering, a fine class for garden beds. The plants are of dwarf, bushy habit, bloom early, and show very large, double flowers in many colors. Special mixture, 4 pkts 10 cts., 1 pkt.................. 3

Victoria Bouquet, each plant grows symmetrically in pyramidal form, and becomes a bouquet of lovely double flowers of many colors. Mixed, 4 pkts 10c, 1 pkt

Large-flowering Wallflower-leaved, an excellent class with deep-green foliage, and large, double flowers in brilliant colors. Fine mixture, 4 pkts 10c, 1 pkt

Large-flowering Dwarf Pyramidal, of pyramidal growth, bearing huge spikes of full-double flowers. Many rich colors mixed, 4 pkts 10 cts., 1 pkt

Princess Alice, a splendid branching Ten Weeks’ Stock; plants of good habit, have large spikes of snow-white, double flowers; fine for pots. 4 pkts 10c, 1 pkt.

Princess May, wallflower-leaved sort, bearing charming Primrose-colored double flowers in fine trusses; plants come into bloom early, 4 pkts 10 cts., 1 pkt...

Triumph, very double, brilliant crimson flowers; plants grow a foot high and become a mass of rich color. 4 packets 10 cents, 1 packet

Celestial, pyramidal in growth, every branch terminated with a fine truss of sky-blue flowers. 4 pkts 10c, 1 pkt

Giant Perpetual White, one enormous spike of flowers 1 ft. in length; early-blooming. 4 pkts 10c, 1 pkt

Complete Special Mixture of all the above fine sorts, 4 packets 10 cents, 1 packet

Mr. Parks: Among my annuals nothing has been finer than Park’s Ten Weeks’ Stock. The white, the yellow and the rose colors are my favorites, and they certainly are fine.—Mrs. Samuel Currie, Walsh Co., N. Dak.

Mr. Park: I had beautiful Ten Weeks’ Stock I raised from your seeds this year. Some are in bloom now. They look like small roses, they are so double, and some are a beautiful violet color. I like those the best.—Mrs. Smith, Berne Co., Vt., Oct. 12, 1905.

Mr. Park: I had nine plants from a packet of Ten Weeks’ Stock received from you. Only one of them had single flowers, and no two were alike. There were pure white, cream, bright pink, two shades of salmon pink, several shades of red and one dark, nearly a violet shade.—Mrs. F. C. E., Humboldt Co., Cal., Nov. 8, 1903.

Valerian, Fragrant.

Special mixture of all colors, 4 pkts 10 cts., 1 pkt. 3 cts.

The Fragrant Valerian grows a foot high, is branching habit and develops panicles of fragrant little flowers of various colors. Although hardy perennials, they bloom the first season. The clusters are fine for cutting for bouquets, as well as showy in the garden. Often called Garden Heliotrope.

White.......... 5 | Scarlet........ 5 | Red........ 5 | Rose........ 5
Special mixture of all colors, 4 pkts 10 cts., 1 pkt

Note.—This is a handsome, hardy, border plant producing stout, erect stems, terminated in bold clusters of numerous small flowers. It begins to bloom in June and continues throughout the summer. It requires only ordinary garden soil, and occasional lifting and cutting in. It grows well on the crumbling wall of an old ruin, and is useful for planting on dry rockwork.—Flower Garden.
Verbena, Large-flowered Fragrant

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Verbena is readily raised from seeds, and seedling plants are healthy and vigorous, begin to bloom in a few weeks, and keep up the display until late in the autumn. For beds they are very desirable, as the flowers are produced abundantly and are of rich and varied colors, while the varieties I offer have a fragrance that is, perhaps, unequaled by that of any other garden flower. Indeed, a few blooming plants will perfume the whole garden during a summer evening. In a sunny window in winter pot-grown Verbena bloom freely and make a fine display.

**Improved Fragrant Verbena.**

Auriculiflora with eye... 5 Oculata, coccineae, eyed... 5
Black-blue with white eye 5 Corydalis, blue with eye 5

Defiance, bright scarlet... 5 Striata, richly striped... 5
Defiance, purple, fine shade... 5 Red shades, striped... 5
Variegatis, golden foliage 5 Special mixture of all the
Several, pale to yellow. 5 above, 4 pkts. 10c., 1 pkt. 3
These form dwarf, compact, erect bushes, and are fine for pots, beds and edgings. Scarlet striped, scarlet, eye, pure white, rich scarlet, violet, carmine, purple with eye striped, each... 5

New Compact Verbena, mixed, 4 pkts. 10 cts., 1 pkt. 3

**New Mammoth Verbena.**

Vigorous plants with very large clusters of large flowers. My strain of these fine Verbena is not surpassed.

Dark scarlet shades, rose and crimson shades, purple shades, white and Fre-fly, each... 10
Mammoth Verbena in special mix. 4 pkts. 10c., 1 pkt. 3
Complete special mixtures of all classes and varieties. 4 packets 10 cents, 1 packet 3

Mr. Park: I wish to recommend your Verbena seeds to all who want beautiful flowers of many colors. From one 3-cent packet of seeds I raised seventeen fine plants, nearly every one different, and their bloom was so profuse it was almost impossible to count the flowers. Some were pink, some purple, some white, and almost every shade of red with white centers and edges. They have been blooming since June, and now, October 12th, they are just covered with bloom.

Mr. Park: My Mammoth Verbena from your seeds are grand. I have a great variety of colors from one packet of seeds, and such large clusters! The plants are blooming yet.—Mrs. Jacob Kain, Morris Co., N. J., Oct. 3, 1903.

Mr. Park: My Mammoth Verbena from your seeds were all beauties—bright red, pink, white, purple, some almost blue—the nearest to that color I ever saw.—Mr. W. B. Putman, Wash., Co., Iowa.

Mr. Park: From a three-cent packet of your Large-flowered Fragrant Verbena, I had several different colors, and such free flowers! I planted some in an unoccupied corner where a mass of fragrant bloom all summer. One I have taken up for my window garden, a delicate pink shade with a fragrance like the 'Trailling' Arabust.—Mrs. G. L. Clark, Co., Me., Oct. 5, 1905.

Viola Hybrids = Tufted Pansies.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Tufted Pansies are beautiful, Pansy-like flowers which succeed well wherever a Pansy can be grown. The seedlings start in from ten to fifteen days, begin to bloom in a few weeks and if cut freely will bloom till the snows of winter appear. The colors are varied, and a mixed bed is very attractive. The flowers have the delicious violet fragrance which everybody admires.

Dark blue.............. 5 | Mauve.............. 5 | Yellow............. 5
Light blue............. 5 | Pure white........ 5 | Rich purple........ 5

Special mixture, all varieties, 4 pkts. 10 cts., 1 pkt.

Mr. Park: My bed of Tufted Pansies from your seeds was a beautiful sight, indeed. The colors were exceedingly handsome and everyone admired them, thinking they were the most beautiful they had ever seen.—Mrs. Hannah Wilson, Fairfield, Co., Ohio, Oct. 24, 1904.

Mr. Park: I raised a bed of white Tufted Pansies from your seeds and they are now in full bloom. They are exceedingly sweet and pretty.—W. T. Burbank, Butler Co., Kas., Sept. 30, 1904.

**Veronica** fugax, a neat, free-blooming, trailing plant; flowers yellow, covering the plant........ 5
**Veronica** edging plants, with spikes of blue and white flowers; mixed...................... 5
**Phlox** rosea, lovely pot and bedding plant; Phloxlike flowers; white, rose and eyed; each 6c, m't'd 3

**Virginia Stock.** pretty, free-blooming annuals; white, crimson and yellow; each 6 cts., mixed... 3
**Wallflower.** early Parisian, a beautiful variety blooming freely the first season; flowers yellow and brown, large and delightfully fragrant. Fine for bedding or pots. 4 pkts. 10 cts., 1 pkt...

**Whitharia** pockholled, annual, 1 foot; lovely blue and white bell-flowers, mixed.............. 8
Zinnia, Improved Double.
Complete special mixture, 4 pkts. 10 cts., 1 pkt. 5 cts.

The Double Zinnia is one of the easiest grown and most showy of garden annuals. The plants come quickly from seeds, are easily transplanted, and make a fine display in a bed or border or among shrubbery. Each flower lasts for several weeks, and the plants bloom abundantly un damaged by frost. The new, improved double varieties I offer are as showy as Dahlias, as varied in color, and bloom more profusely.

New semi-dwarf Zinnias, superb bedding sort, growing fifteen inches high and blooming very freely; perfectly double. Colors white, scarlet, golden yellow, crimson, striped, violet, purple, salmon, each..................5

The colors mixed, 4 pkts 10c., 1 pkt....................3

New Mammoth Joss, g. g. Z, large-flowered, high, bearing huge, double flowers. Queen Victoria white, gold striped, scarlet, sulphur, striped, purple, each....................5

Special mixture, 4 pkts 10c., 1 pkt..................3

New Lilliput, scarlet, gold, lilac a n d
White, each........................................5

Mixed colors, 4 pkts 10c., 1 pkt......................3

New Crispa, with wavy petals..........................5

New Fringed, white-flowered, double................5

Zinnia, all varieties, mixed, 4 pkts 10c., 1 pkt..........................3

Mr. Park: I think for the busy housewife no flower will give better satisfaction and stand neglect better than Park's Semi-dwarf Bedding Zinnias. They are of such compact, bushy form, and of so many bright colors never seen in old-fashioned Zinnias. — Mrs. W. B. Slater, Tompkins Co., N. Y., Nov. 31, 1893.

Mr. Park: I think for every person who does not like Zinnias could see my Lilliput Zinnias from your seed. They are beauties—some red, some white, and some with green streaks in the petals. 'Youth and old-age' is the grandmother name, a very appropriate one, as the flowers are babies when they begin to bloom, and increase in beauty with age. I have tried Zinnias, but never succeeded in this locality until I received seeds from you—Marie Ferguson, Tuolumne Co., Calif., Oct. 28, 1906.

Mr. Park: The Zinnias from your seeds were just lovely, and are still in bloom. I never cared for Zinnias, thinking them stiff and ungraceful, but I have learned to love them.—Mrs. W. J. Gilbert, Hartford Co., Conn.

EVERLASTINGS AND GRASSES.
Mixture of Many Kinds, Large Packet 10 cents, 3 Packets 25 cents.

These are mostly annuals with straw-like flowers that keep their form and color for years. With few exceptions they should be cut just as the buds begin to expand. Hang in the shade, stems upward, till dry. The grasses are fine for bouquets, either green or dry. All are easily started from seeds, and attractive in the garden as well as useful for bouquets.

Acroclinium, graceful and pretty, half-hardy annuals; flowers nodding, an inch across, mostly rose and white, and for drying should be cut before the buds expand; Plants slender, with linnin-like foliage; 1 foot high; pretty either in beds or pots. Double rose and double white, each..........................6

All varieties, single and double, mixed, 4 pkts 10c., 1 pkt..........................5

Anisodontae, large-flowered; 2 feet high, anchor; with handsome, double, white flowers; useful either in the garden or for winter bouquets; cut before the buds open. Companions of Zinnias. Each................5

Gomphrena globosa, a very fine annual, very desirable as a bedding plant, making a gorgeous and continuous display. Colors white, carmine, fuscous colored and variegated. The dwarf varieties are fine for pots. Cut when fully developed. Gomphrena aurea bears orange flowers. The colors separate each..................5

Everlastings and Grasses in complete mixture, 3 packets 25 cents, 1 packet..........................10
**Ornamental Annual Vines.**

The annual vines here offered grow quickly from seeds, and are very effective when trained upon strings about the porch, doors and windows, or when used to cover summer houses and trellises or form screens for a walk or unsightly fence or building. They are among the most useful plants in giving a cozy, home-like appearance to a place, and their cultivation should be more common. Support should be given early. If neglected till vining begins, the plants become stunted and injured in growth.

---

**Cardiospermum in Variety.**

Mixed, 4 packets 10 cts., 1 packet 3 cts.

Known as Balloon Vine because of its balloon-like seed vessels. As trellis vines for graceful greenery no plants excel those of Cardiospermum. Everybody admires them. They grow eight feet high, and quickly cover their support. They can be highly recommended.

Hirsutum, new................................. 6
Hallacaabum, the older species ............... 5
Special mixture, 4 pkts 10c, 1 pkt............ 3

Mr. Park: A nice vine for a screen is Cardiospermum. We plant it with Cypress vines, and both grow nicely together. It will climb up a string or over a bush and grow to quite a good height if trained to do so, or, be content to creep along over anything it comes to. It is easy to grow, and is not dense and cumbersome as some other tender vines.—Mrs. Christine Sturkey, Jefferson Co., Mo., Nov. 8, '05.

Mr. Park: Why is so little said concerning Cardiospermum, or Balloon Vine? It is a curious, half-hardy, annual, climbing plant and covers considerable space.—G. E. P., Queens Co.

---

**Cobaea Scandens.**

Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

This is a beautiful vine growing quickly to the height of from twenty to thirty feet. Both foliage and flowers are graceful and attractive. The leaves are extended into long, graceful tendrils which attach themselves to a string or wire or branch, and the large, bell-shaped flowers are produced continually throughout the season. If grown in a pot it will bloom in the house. In the South the vine is hardy and will bloom for several years. Easily started from seeds, which should be planted edgewise, and not too freely watered till growth begins. The original species has purple flowers, and is the handsomest of the lot. The plants thrive particularly on the south side of a wall or building.

Macrostemma, new ................................ 5 | White, greenish white ...... 5
Purple, 4 packets 10 cents, 1 packet .................. 3

Mr. Park: Of all the climbers, I have none that give me so large a return for my trouble as the Cobaea Scandens. It is equally as good for out-of-doors as for house culture. It has pretty foliage and large, bell-shaped flowers that open a clear green, but turn to a lovely purplish blue.—Amanda Gray, Johnson Co., Ill., Oct. 11, 1905.

Mr. Park: I planted your Cobaea Scandens seeds in March in the kitchen window. Early in May I set two of the plants by my porch. They covered it and ran up the sides of the house. There were blossoms on the vine by July 10th. Night frost did not hurt it a bit, and now, Nov. 6th, there are still flowers on the wall vines. I set it in rich, loose soil, and watered several times with liquid manure. It was a wonder to all who saw it, and no one knew what it was.—Mrs. Christine Sturkey, Jefferson Co., Mo., November 8, 1905.

---

**Abobra viridiflora**, a lovely rapid-growing perennial gourd vine; flowers green, succeeded by pretty fibert-sized scarlet fruit; roots tuberosus and can be kept over winter ........................................ 3

Cypress Vine in Variety.

Complete special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

An exceedingly handsome vine, growing from eight to ten feet high, valuable for a trellis or to ornament the pillars of the veranda. The foliage is a rich, dark green, feathery in appearance, and decorated throughout the season with a profusion of bright, delicate star-like flowers, scarlet, white and rose in color, beautiful and attractive. The seeds should be sown in a seed box and the soil kept rather dry after the first watering. Do not transplant until the weather becomes warm.

Quamoclit cocinea, scarlet............... 5  Quamoclit hederaeas, ivy-leaved........... 5
Alba, pure white.......................... 5  Kerberi, late-blooming..................... 5
Hosa, fine rose............................ 5  Mixture of all sorts, 4 pkts.............. 5

Mr. Park: I grow a Cypress Vine on the south porch every year. I give it plenty of water, and it grows 10 to 15 feet high, and is so fine and lacy that everyone who sees it is delighted.—Jennie M. Bamer, Glasford, Ill., Oct. 7, 1905.

Mr. Park: My Cypress Vines from your seeds were beautiful. What is more graceful than their delicate, fern-like foliage and white star-shaped flowers. If I could only have one vine in my garden I would choose Cypress.—Mrs. J. Hagerman, Sag. Co., Mich., Oct. 23, 1905.

Mr. Park: A Cypress Vine last spring gave quite a pleasurable surprise. I planted a circle at the roots of a dead peach tree, and it was covered with little red and white stars.—Miss Mary Robinson, Cedar Co., Ia., Oct. 11, 1905.

Gourds and Cucumbers in Variety.

Complete special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Gourds are ornamental in foliage, flowers and fruit, and can be used very effectively about the garden. The use of the Dipper, Dish, Bottle, Sugar Trough, Egg and Club Gourds is indicated by their names. The latter has fruits from two to three feet long, and is sometimes advertised as Japan Cucumber, but is generally called Hercules Club. An Italian florist says, "This Gourd furnishes quite an excellent dish; cut into pieces three inches long, take out the seeds, fill in a stuffing of meat, etc., boil, and serve with tomato sauce." Will you have some? The small, fancy Gourds are showy on the vines, and excellent toys for children. The Dishcloth Gourd has showy yellow flowers, and network of the Gourds is useful for fancy work, and for scouring and washing. The Thousandweight Gourds make excellent pies. The various species of Cucumis are handsome vines. All are interesting and ornamental, and worthy of set out when the weather becomes warm. In the South, plant the seeds where the vines are to grow.

Lagenaria vulgaris, mixed........... 5  Lagenaria, Lemon or Orange, and

Apple-shaped, yellow, red-striped, each........... 5

Mr. Park: Last spring I bought of you a package of Gourd Seeds and they all grew well. Last week I took the Gourds (fancy) to our Fair at LaSalle, and secured 2d prize and a medal on them—all of which goes to show that Park's seeds are all right. There were six competitors.—Wm. Shaw, LaSalle Co., Ill., Oct. 3, 1905.

Mr. Park: Last spring I planted a package of your mixed Gourds, and my Goose Egg climbing a tree, and the crooked Gourds for geese. I am the popular grandmother with the children of the little village as long as my Gourds last.—Marie Ferguson, Tualumne Co., Calif., Nov. 3, 1905.

Mr. Park: I planted your Hercules Club Gourds, and one measures 32 inches. No one believes that a Gourd will grow that length unless they see it. Everyone says, "My! I never saw anything like it!"—Mrs. Merritt Abbey, Peoria Co., Ill., Oct. 11, 1905.

Park's Special Mixtures.—These mixtures are not the odds and ends of some wholesale seed house, but are prepared at my establishment under my careful personal supervision, from the best named varieties in well-balanced proportion. You never make a mistake by buying Park's Special Mixtures. They cannot be surpassed.
Hyacinth Bean—Dolichos.
Complete special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Hyacinth Beans (Dolichos) are beautiful, vigorous vines, that bear large clusters of showy, bean-like blue, white and variegated flowers, followed by shining purple seed pods. The plants are as easily grown as Corn Beans, and are excellent for covering summer houses, fences or old trees, or for a porch screen. Seeds and pods are edible.

Lablab Purple. .......................... 5 Soudanensis, new, purple......... 5
Lablab White ............................. 5 Atrosguine TRANSACTION, white and purple.. 5
Giganteum, vigorous.......................... 5 BicortortuB, white and purple..... 5
Special mixture of all sorts, 4 packets 10 cents, 1 packet...................... 3

Mr. Park: If anyone wants vines to let them plant Dolichos or Hyacinth Beans to have them and the Scarlet Runner together, and such a wealth of flowers that it may be followed. —Mary E. Youngs, Grant Co., Wis., Nov. 4, 1903.

Mr. Park: Last spring I planted mixed Dolichos seeds near an old fence. Now the plants are 30 feet high and the scarlet flowers almost cover the fence. —Mrs. C. J. Marshall, Bradford Co., Pa., Oct. 10, 1904.

Mr. Park: I planted Variegated Hop in the centre of my Pansy bed and gave it an A-shaped trellis, which is completely covered on both sides. Everyone who saw it said "How lovely!"—Mrs. True Harmon, Cass Co., Neb., Oct. 19, 1904.

Mr. Park: Your Variegated Hop grew wonderfully fast and the leaves were beautifully colored.—Mary Overboll, Miller Co., Ark., Oct. 27, 1904.

Humulus—Variegated Hop.
Price, 4 pkts. 10 cts., 1 pkt. 3 cts.
A Japanese annual of rapid growth, and one of the most showy and useful of climbers, on account of its dense foliage, blotched and marked with creamy white. Sow the seeds early where the plants are to stand, and furnish string support. Plants start readily and grow from twenty to thirty feet high in a season.

Mr. Park: Anyone desiring a handsome vine for a porch should try your Variegated Hop—it pleases all who see it. Although an annual, it seeds itself freely, so there are always plenty of plants after it is once sown.—Mrs. Mary C. Bramhall, Bradford Co., Pa., Oct. 10, 1904.

Mr. Park: I planted Variegated Hop in the centre of my Pansy bed and gave it an A-shaped trellis, which is completely covered on both sides. Everyone who saw it said "How lovely!"—Mrs. True Harmon, Cass Co., Neb., Oct. 19, 1904.

Mr. Park: Your Variegated Hop grew wonderfully fast and the leaves were beautifully colored.—Mary Overboll, Miller Co., Ark., Oct. 27, 1904.

Ipomoea in Variety.
Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Much like Morning Glories in foliage, flower and habit. The vines are all of rapid growth, and fine for trellises, walls or screens. All are easily raised.

Coccinea, scarlet............... 3 Lutea, yellow.......................... 3 The above bear small flowers that remain open for several days; vines rapid in growth and beautiful.

Raderacea, the Ivy-leaved
Morning Glory; mixed colors .............................................. 3
Limbata elegans,ma.rich blue with white border........ 3 Fine for pots in winter.
Alba, white........ 3 For Cypress Vine see page 41. I ask your special attention to my Giant Clustered, Improved Common and Japan Morning Glories. See next page.

Loasa lateritia, a showy annual vine; orange flowers; foliage covered with stinging hairs........ 6
Lophorpernum scandens, a handsome vine, the root of which may be wintered in the cellar. Velvet foliage and large, tubular rose flowers. Sow in a window, early, to bloom in summer. On a pot trellis it blooms well in winter........ 6

Maurandya.
Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

A dense, graceful vine, growing six feet, covered with lovely bell-shaped flowers in autumn. Entirely too much neglected.

Antirrhiniflora, blue... 5 Barclayana, blue........ 6 Barclayana, white........ 5 Encycla, rose........ 6 Purpure, purple........ 5 Semperiflora, blue...... 5 Special mixture of all sorts, 4 packets 10 cts., 1 packet........ 3

Mr. Park: I must tell you of my Maurandya. I have one that covered the top of a small tree and grew over six feet wide, just from one little tiny black seed. It has bloomed ever since July and is full of bloom now. Oct. 16. It is the loveliest window vine I ever saw.—Mrs. Wilson, Garfield Co., Okla., Oct. 30, 1905.

Mr. Park: Maurandya is pretty and stands severe frost.—Mrs. E. S. Y., Pen. Co., Me., Oct. 24, 1904.

Moon Flowers. Easily grown from seeds. Bons
Nox has clusters of small flowers, and Mexican White has large flowers. Both are very fragrant and free-blooming. Separate or mixed..... 5

Mina lobata, a quick-growing vine much like Ipomoea coccinea, but bearing racemes of scarlet flowers not unlike scarlet Salvia at a distance..... 6
Morning Glory, Giant Clustered.

Easily grown from seeds, and the most desirable and beautiful of all Morning Glories.

**Special mixture, 4 pkts. 15 cents, 1 pkt. 5 cents.**

The engraving represents a rare Morning Glory of surpassing beauty—one which excels the old-fashioned and Japanese varieties so far that a comparison with them would be an injustice to it. It is variously known as Ipomoea Lobata orculata and I. Violacea Vera, but the common name, Giant Clustered, seems appropriate, for it is a giant in vine, foliage, flowers and clusters. It will grow vigorously to the height of 30 or 40 feet, clothed with dense, rich foliage, and throughout the entire season is a glorious mass of white and sky-blue flowers, shading to white at the centre, often strikingly marked with distinct pinkish violet rays. These are borne in huge, long-stemmed clusters produced at the leaf axils, and stand out above the foliage, showing the magnificent, large flowers in the most attractive manner. The clusters show buds and flowers in various stages of development, and new flowers appear every morning in wonderful profusion all over the vine. No person who has once cultivated this grand vine will discard it. All other Morning Glories in common cultivation are insignificant beside this elegant sort. You may form some idea of its beauty from this description, but when you see the blooming vine in all its glory you will exclaim, "The half was never told." By all means add this grand vine to your seed order, start the seeds in a window box and set out to cover a trellis or fence, or the pillars of the piazza. When in bloom you will thank me for urging you to try it, for it will probably afford you more pleasure than any other flower about the home. Special colors, 3 cents per packet; special mixture, 4 packets 15 cents, 1 packet 5 cents.

**Note from a Foreign Journal.**—This Ipomoea (or Morning Glory) is worth all the trouble and care that can be lavished upon it. It is a most glorious thing. —G. G. Reed, in English Garden, Oct. 14, 1905.

**Morning Glory, Park's Improved.**

For a quick-growing, beautiful vine the improved old-fashioned Morning Glory still claims a prominent place. The large, fresh, silky-flowers appearing every morning in all the richest shades of red, white and blue, often variegated and striped, give an added charm to the early mornings of summer and autumn. Special mixture, all colors and varieties, 4 packets 10 cents, 1 packet 3 cents.

- Carnine
- 3 Lilac
- 3 Royal purple
- 3 White
- 3 White striped violet
- 3 Tricolor
- 3 White striped rose

All varieties, special mixture, 4 pkts 10 cents, 1 pkt 5 cents. Morning Glory, double, in fine mixture, per pkt. 5 cents.

**Morning Glory, Improved Giant Imperial.**

The Japanese Morning Glory vines show big flowers in new colors, the result of special attention given to developing and improving this class of flowers. These vines grow rapidly, and in a warm, sunny situation bloom abundantly. Special mixture, all the fine sorts, 4 packets 10 cents, 1 packet 5 cents.

- Adonis, bright purple, white throat
- Aglaia, crimson, white throat
- Antelope, blue flowers, rosy throat
- Aphrodite, white, enormous flowers
- Asteria, copper, white throat
- Ceres, crimson, white border
- Cleopatra, carmine, white border
- Euphrosyne, white, rosy throat
- June, beautiful sky blue

- Lena, dark, light blue, red
- Satin Rose, foliage spotted white
- Princess, white, crimson specks
- The above varieties, mixed, 4 packets 10 cents, 1 packet 3 cents

**Colatta Varieties.** Huge flowers, curled margins.

- Alba, pure white
- Carmines, carmine red

- Diana, dark blue, white border
- Colitta varieties, splendid mixture, 4 packets 10 cents, 1 packet

**Micans Varieties.** Smooth foliage, gorgeous flowers.

Four packets 10 cents, 1 packet.

Special mixture of the above improved sorts, 4 packets 10 cents, 1 packet.
Sweet Peas are indispensable. If you can have but half a dozen annually, a border of these charming flowers should be included. The improved varieties we offer were grown for me by a German specialist, and imported. The seeds all grow, and the vigorous, branching vines become a mass of pea-green foliage covered with long-stemmed clusters of large flowers of the most varied and beautiful colors. The fragrance emitted is delicious and enchanting. Certainly there can be no finer strain of Sweet Peas than that of which I offer seeds, and my complete mixture cannot be surpassed. The mixture of shades, as well as my complete mixture, is prepared and established from the finest named varieties. They will all yield marvelous shades and markings. Those who have been cultivating the common varieties will find the new large-flowered and large-clustered sorts I offer a revelation. For hedges or trellises they cannot be excelled; for bouquets and fragrance they have no equal.

No. 1. Shades of White. This packet includes all the new, chaste shades of white, as pearl white, pure white, cream white, flesh white and porcelain white. Blanche Burpee, Emily Henderson, Mrs. Rankey, Queen of England, Mont Blanc, Pure White, Butterfly, each, 8 cents per oz.; per packet .......................................................... 3

No. 2. Shades of Red, includes bright red, carmine, scarlet and crimson, represented in many tints. Invincible Scarlet, Invincible Carmine, Prince of Wales, Stanley, Mars, Salopian, Lady Penzance, Duke of Clarence, Duchess of Edinburgh, Boreatton, Captivation, Firefly, each 8 cents per ounce; per packet .................. 3

No. 3. Shades of Dark Blue, includes black blue, dark blue, violet and purple in many tints. Captain of the Blues, Emily Eckford, Grand Blue, Indigo King, Monarch, Navy Blue, Black Purple, Captain, each, 8 cents per ounce; per packet ........................................... 3

No. 4. Shades of Light Blue, includes azure blue, lavender blue and sky blue in many tints. Countess of Ranord, Codogon, Dorothy Tenant, Emily Eckford, Gray Friar, Griel Hamilton, Princess May, The Queen, Light Blue and Purple, Captain Clark, Dolly Varden, each, 8 cents per ounce; per packet ........................................... 3

No. 5. Shades of Yellow, pure yellow, orange yellow, salmon yellow, cream yellow, sulphur yellow. The colors are not well defined, but the packet includes all the best yellow shades known. Bronze King, Chanceller, Gorgeous, Lemon Queen, Mrs. Eckford, Oriental, Lady Beaconsfield, each, 8 cents per ounce; per packet ........................................... 3

Sow in a trench as early as the ground can be worked, and cover only one-fourth inch deep; later as the vines grow, draw soil in till the roots are well protected. As warm weather a mulch the ground with stable litter. Give wire or brush support early. Cut the flowers freely to prevent seeding and prolong blooming. Order and plant early. The dwarf sorts are not so desirable as the others, but are useful for contraints. The white is preferred for pots.

Mr. Park: I planted two ounces of your large-flowered Sweet Peas last Spring, and had a glorious display. The flowers were so large, produced on such long stems, and were of so many hues and colors from pure white to bright crimson—pink, purple and maroon. They lasted until every other green thing was gone. Surely nothing is more sweet, more delicate, or more beautiful than your Sweet Peas.—Mrs. H. Arno, Mommouth Co., Me., October 9, 1905.

Mr. Park: My Sweet Peas this year were the finest I ever had. I think every seed came up. The flowers were very large, single and double, fragrant and of many colors and hues.—A. Dobbie, 62 W. 69th St., Oct. 6, 06.

Mr. Park: I had a row of Sweet Peas 15 feet long, with wide poultry fencing fastened to well-braced posts at both ends. They climbed high above the fencing and were handsome.—Mrs. H. Moore, Portage Co., O., Oct. 7, 95.

Scarlet Runner.—An elegant vine for a warm, dry situation. In a dry season it will grow where many other vines will suffer. Flowers rich scarlet, in large clusters. If cut freely the plants will bloom throughout the season. Fine for summer houses or arbors. The seeds are excellent for cooking. I can also supply white and variegated. 5¢ packet.
Tropæolum, Giant Climbing.
Complete mixture, lb. 75 cts., 1 lb. 20 cts., oz. 6 cts., 4 pkts. 10 cts., 1 pkt. 3 cts.

THE new Giant Climbing Nasturtiums are as desirable for the flower garden as Sweet Peas. They grow vigorously, have beautiful, clean foliage, begin blooming early, and bloom all the season. The flowers are borne in great profusion, are very large, of silky texture, brilliant in color, and very fragrant. Indeed they possess all of the elements of a first-class vine, and can be used to decorate old fences or buildings, as well as to form a showy hedge or an attractive trellis clump. My seeds are superior, and my mixtures unsurpassed.

Atropurpureum, crimson
Chameleon, variously colored
Dunet's Orange, bright orange
Edward Otto, rich bronze
Flammulum, scarlet and yellow
Lobster, white, very pretty
Pearl, whitish, very pretty
Lob's Climbing Nasturtium.—Lobb's Climbing Nasturtiums are considered even handsomer than the most robust varieties. Easily grown from seeds, and fine either as pot plants or bed or border.
Ass Gray, yellowish white
Atropurpurea, dark purple
Aurea, yellow
Brilliant, dark scarlet
Cardinal, red
Caroline Smith
Chalkianum, yellow, red spots
Chameleon, Brilliant, dark scarlet
Lob's Climbing, mixed, 1 ounce 15 cents, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: I have a bed of Nasturtiums every year, but have never had anything to compare with what I raised from your seeds this summer. There was every shade "from grave to gay," and every day I had all the blossoms I could pick.—Mrs. H. Jenne, Sullivan Co., N. Y., Nov. 4, 1905.

Mr. Park: Oh, my Nasturtiums were fine, the best collection in town, so velvety and fragrant, no two alike. I had a fresh bouquet every morning.—M. E. B. Latherbale, Lyon Co., Ia.

Tropæolum Peregrinum, the beautiful Canary-bird Flower. This is a lovely vine of easy growth, reaching twenty feet in one season. In autumn it is covered with a profusion of yellow flowers bearing a fancied resemblance to a miniature canary bird. Four packets 10 cts., 1 packet 3 cts.

Note.—The Canary Flower is without a rival in lightness and elegance; indeed, one might say it is peerless among yellow flowers. It is a valuable garden vine, thriving in sun or shade, and unsurpassed for festooning. It rarely fails to succeed well.—English Flower Garden.

Thunbergia Alata.
Special mixture, 4 packets 10 cents, 1 packet 3 cents.
Handsome vines six feet high, covered from June till October with bright, showy flowers. Elegant for trellis or low screen. Are easily grown from seeds. Like a warm and sunny situation.
Buffy, white........ 5  Pure white.................. 6  Orange.................. 8
Yellow.................. 6  White, eyed.................. 6  Orange, eyed.............. 6

Mr. Park: Thunbergia Alata is a valuable vine that certainly merits general cultivation, as it commences to bloom quite early in the season and blooms constantly until frost. It makes a nice vine for a porch, with its myriads of pretty flowers and clean foliage.—Grace Owens, Joliet, Ill., October 10, 1905.
THESE are sometimes denominated "The poor man's flowers," because when once established in the garden they will take care of themselves. The Biennials die after blooming, but are mostly reproduced by self-sowing. The hardy Perennials live for years, and often increase in beauty with age. These are choice flowers entirely too much neglected. As a rule the seeds are more tardy to germinate than seeds of Annuals, but if given sufficient time there will be little reason for complaint. I urge my patrons to start a large bed of Perennials, because I feel confident they will be pleased when the flowers bloom, and thank me for my importance.

**Aquilegia--Columbine.**

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

Hardy perennials. Flowers both single and double in form, and of all shades of red, white, blue and yellow. The sorts offered are mostly large-flowered. All bloom in the spring, and some continue to bloom all summer. My complete mixture will show a great variety, and will please all who sow it.

- *California hybrida*, yellow with orange spurs
- *Canadensis*, scarlet and yellow
- *Chrysantha*, everblooming, yellow
- *Deltoides*, Both Novae Atrosanguinea, Purpurea
- *Echinacea*, orange, striped
- *Eryngium*, various colors
- *Flos, Deltoides*, Both Novae Atrosanguinea, Purpurea
- *Gentianopsis*, various colors
- *Lutea*, white, striped
- *Microphylla*, white, striped
- *Pulchella*, white, striped
- *Regnellidium*, white, striped
- *Sylvestris*, white, striped

A complete mixture, 4 packets 10 cents, 1 packet 3 cents.

**Adlumia Cirrhosa.**

Mixed colors, 4 packets 10 cents, 1 packet 3 cents.

Charming vine
with delicate
fern-like foliage
and waxly pink
and purple flow-
er clusters in
great profusion.
The vines will
grow 20 feet high,
a mass of foliage
and bloom, and in
dense shade--even
where the sun
never reaches.
Furnish string
support. A grand
pillar plant for
the north porch.

Mr. Park: For a delicate perennial' climber nothing can surpass the Adlumia. It is easily grown from seeds. The first season it grows a foliage resembling Maiden-hair Fern, fine for floral work, the second season it is still more beautiful with its clusters of white flowers, which are of almost everlasting, and fine for floral work.--A. M. S., Pawnee Co., Neb., Nov. 10, 1903.

**Armeria, Giant.**

Mixed colors, 4 packets 10 cents, 1 packet 3 cents.

A fine hardy perennial, 2 feet high, with large heads of rose-colored flowers. A choice garden perennial that deserves more attention.

Mr. Park: I bought a packet of Giant Armeria seeds of you last spring, and have several nice, thrifty plants.--Mrs. Mary Coleman, Lincoln Co., Neb., Nov. 10, 1903.

**Rheionema Grandiflorum** (Lebanon Candytuft).--A trailing plant from the Lebanon mountains. Of easy culture; spikes of rosy white flowers continually produced. 4 pkt. 10cts, 1 pkt 3c.
These are beautiful hardy perennials of easy culture. C. Medium is the Canterbury Bell, a grand garden flower. C. calycanthem is the cup and saucer shown in the engraving. C. carpatica and C. pyramidalis are fine for pots as well as garden beds. C. fragilis is fine for baskets.

**Varieties of Campanula Medium.**

**Single Varieties.**

Blue .... 8 | White .... 8 | Blue .... 8 | White .... 5
Lilac .... 5 | Rose .... 5 | Lilac .... 6 | Rose .... 5
Striped .... 6 | Mixed .... 6 | Striped .... 6 | Mixed .... 6

The above Single and Double varieties in splendid mixture, 4 packets 10 cents, 1 packet.

**Calycthemia Varieties.**

Blue, splendid.... 8 | Pure white, fine .... 8 | Rose, rare color..... 8 | Striped, beautiful ..... 8

Calycthemia or Cup and Saucer Varieties in splendid mixture, 4 packets 10 cents, 1 packet.

Special mixture of Single, Double and Calycthemia varieties, carefully proportioned, 4 pkts 10c, 1 pkt.

**Other Species of Campanula.**

**Carpatica,** 1 ft. high, beautiful cup-shaped flowers during July and August, mixed.

**Frangipani,** an elegant, free-blooming, drooping sort; fine for pots and baskets.

**Grandiflora,** 2 feet high, flowers 2 inches across, showy; in bloom June and July.

**Macrantha,** 6 ft. high, broad leaves, open flowers; a splendid sort.

**Mirabilis,** new; not unlike the old Canterbury Bell very fine.

**Pyramidalis,** handsome per. species, blue and white, each 5 cts.; mixed, 4 pkts 10 cts, 1 pkt.

**Pericallis,** large-flowered, blue and white, each 6 cts., double 50 cts., mixed, 4 pkts 10c, 1 pkt.

**Turbinata,** blue and white; of dwarf habit; very pretty, mixed.

Mr. Park: I got a 3-cents packet of your Campanulas or Bell Flowers last spring, and this spring I had such lovely flowers of all colors——pink, blue, purple and white, double and single, and so easily raised. —Mrs. W. A. Wood, Maquoketa P. O., Ia., Oct. 19, 1895.

Mr. Park: I would like to tell you about the beautiful Canterbury Bells I raised from your mixed seeds. The colors were beautiful, pink, white, blue and rose, some single and some double. The Cup and Saucer variety were especially handsome. I wish the floral sisters would try your seeds. —Mrs. M. Gibson, Los Angeles, Cal., Nov. 6, 1905.

Mr. Park: All who want something fine should plant Campanula Calycanthem or Cup and Saucer. We had great clusters of blue, white and variegated ones from your seeds, and I do not think we ever had a flower before that was admired so much. They do not bloom the first year, but are little trouble, and are well worth waiting for. They bloom at the same time as Gypsophila, and the two combine effectively. —J. J., Crawford Co., Ill., Nov. 8, 1905.

**Carnations, Garden.**

Finest special mixture, 4 packets 10 cts., 1 packet 3 cts.

Showy and deliciously fragrant garden perennials. Flowers very double and of many rich colors, often superbly variegated. The seeds I offer are of the best quality, and will yield the finest flowers. They cannot be surpassed.

Choice Garden Carnations in splendid mixture, 4 packets 10 cents, 1 packet.

Mr. Park: I raised Carnations from your seeds—the mixed varieties. They were the prettiest I have ever grown. One a double scarlet, so large it burst open; another a double pink, so pretty and sweet; another double, almost white, with some blottches of red, and several other pretty ones. —Mrs. N. Eugene Hankin, Guilford Co., N. C.

Mr. Park: I raised 14 nice Garden Carnations from a 3-cent packet of your seeds. The flowers are beautiful and very fragrant.—Mrs. M. Gibson, Los Angeles, Cal.

Baptisia Australis, blue.... 5 | Centaurea candicans, white.... 5 | Cederonora cana, purple.... 5 | Cineraria candicans, white.... 5

Delphiniums, Orchid-flowered.

The new hybrid Orchid-flowered Peren-

nial Delphiniums, or Larkspurs, are of sur-

prising beauty in the perennial garden.

They grow from four to six feet high, bear-

ing long, thickly-set spikes of large, attrac-

tive flowers of the richest colors. A plant

is fairly represented in the engraving here

given. The seeds are not difficult to start,

but mostly require from three to five weeks

the germinate. A few of the plants will

bloom the first season if started early.

Remove the flowers as they fade to pre-

vent seed formation, or cut the spikes freely.

The plants will then bloom continuously.

A group or bed of these flowers in bloom

is gorgeous, and always calls forth the en-

thusiastic praise of all who see it.

Celestial, light blue with white centre; large, showy

spikes

Ultramarine, rich dark blue with black centre; ele-

gant long spikes

Violetta, superb reddish violet with fine white cen-
tre; beautiful tresses of bloom

Azurea, lovely shade of light blue with distinct

black eye; fine large spikes

Rubra, reddish violet with black centre; large flow-
cers, handsome spikes

Atrocorulea, very dark blue; long, dense spikes; very

ttractive

Special mixture of the above, 4 pkts 10 cts, 1 pkt

3

New Hybrid Delphiniums.—These are noble, a-

tractive hardy perennials, deserving of general cul-
vation. They are extremely effective with their long

stalk spikes of soft, pleasing colors, varying through

almost every shade of blue, from the palest silver

to the deepest indigo, many possessing also a pink or

purple tinge, while the centers vary from pure

white to brown and black, the full flower in shape re-
ssembling a bee. They are perfectly hardy, and grow

and flourish in almost any soil or situation.—English

Notes.

OTHER PINE DELPHINIUMS.

Casaicum, blue

Truncatum, fine

Cardinalis, scarlet, large, fine

Hendersoni, rich blue

Chinensis, mixed

Complete mixture, all sorts, 4 pkts 10 cts, 1 pkt

2

Gypsophila Paniculata.

Splendid mixture, 4 packets 10 cts., 1 packet 3 cts.

One of the most graceful plants, the sprays appearing as fairy willows with

umbrellalike stems. The plants grow

two feet high and are covered with myriads of bloom, making a cloud of white; attrac-
tive in clumps, and when cut imparting to bouquets or designs a most harmonizing

effect. Readily started from seeds.

Mr. Park: I would advise your patrons to get Gyp-

sophila paniculata. Once started it is there to stay

standing all kinds of exposure and drought. No gar-
den is complete without it, and no flower can take its

place in ornamentation in cut flowers.—M. A. Acly, Fer-
gus Co., Mont.
Hollyhock, Park’s Superb Double.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

When well-grown from a fine strain there is no more handsome or attractive garden flower than the Double Hollyhock. Whether in a double row or a group the blooming plants are gorgeous, and are well shown by my artist in the accompanying fine wood engraving.

In my seed of this very superior strain, the plants of which grow from five to six feet high and become solid stems of foliage and rich double flowers of a wonderful variety of shades. They are certainly unequalled. When started early in pots and set out in May some of the plants will bloom in autumn. By all means start some of these fine Hollyhocks. They will delight you.

Pure white.......... 5 | Scarlet.......... 5 | Sulphur yellow 5
Bright rose.......... 5 | Salmon rose.......... 5 | Golden yellow 5
Pale yellow.......... 5 | Crimson.......... 5 | Dark crimson 5
Light apricot.......... 5 | Cherry red.......... 5 | Yellow white 5
Peach.......... 6 | Purplish lilac 5 | on pur. gr0 5

Special mixture, all sorts, 4 packets 10 cts, 1 pkt 3 cts.

Mr. Parks: Our Hollyhocks stand just back of the fence, with their majestic heads rising in view. I had other kinds of flowers, but the Hollyhocks were my favorites. They lasted longer and yielded more in return for their care than all the rest.

—Mrs. Emma Ridgway, Macoupin Co., Ill.

Park's New Hybrids.

Mixed colors, 4 packets 10 cts, 1 packet 3 cts.

I offer another race of Hollyhocks, most of which will bloom the first season if started early. They show both single and double flowers, and in all the leading shades—white and cream, yellow and orange, rose and red, crimson and scarlet. The plants grow from six to ten feet high, and bloom for several months.

Mixed colors, 4 packets 10 cts, 1 packet 3 cts.

Mr. Park: I want to tell you about my Hollyhocks from your seeds. They did not bloom the first year, as they were planted late; but the next summer you should have seen them—great broad blossoms, and so delicate, in all shades from white to darkest red, single and double. One double one had stripes in the petals, the flowers being compound and very curious—unlike any other flower I ever saw. The single ones were simply immense. They looked like crushed silk.—Mrs. Mary F. Davidson, Clinton Co., Mich., Nov. 25, 1893.

Mr. Park: I have some of the finest Hollyhocks raised of seeds got of you. Some were seven and one-half feet high, and of all colors. Everybody would stop and want me to save them seeds. They were both double and single, and bloomed all summer.—Mrs. Laura Norman, Bosque Co., Texas, Nov. 5 1893.

Linum Perenne.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

One of the most graceful, as well as most free and continuous-blooming of herbaceous perennials is Linum perenne, the hardy Perennial Flax. The plants grow a foot high, and from spring to fall are a waving mass of blue, white and rose flowers every morning if not allowed to bear seeds. They self-sow and a bed of the plants will not die out. The plants are hardy and will endure for several years.

Perenne, Blue ................................. 5 | Perenne, Rose ................................. 5
White, ........................................... 5 | Special mixture, 4 packets 10 cts, 1 pkt 3 cts.

Mr. Park: I wish to speak of some lovely flowers raised of seeds bought from you. One is Linum perenne. I think it is so pretty. Mine bloomed the whole season, from June until frost. It was a mass of lovely blue flowers.—Nan Shimm, Jefferson Co., W. Va.

OTHER SPECIES OF LINUM:

Linum flavum luteum, plants a foot high, symmetrical, and covered with golden flowers for two months. 5
Linum Lewisii, flowers blue, freely borne on bushy plants a foot high. 6
Linum narbonense, a beautiful Flax, bearing a profusion of large, light-blue, velvet-reined flowers; a bed of this sort is splendid, the plants growing 18 to 20 inches high, dense and graceful. 6
Linum, Perennial Flax, special mixture of all species and varieties, 4 packets 10 cts, 1 packet 3 cts.

Pinks, Carnations and Picotees.

Special mixture, all colors, 4 pkts. 10 cts., 1 pkt. 3 cts.

These are all beautiful, deliciously-scented flowers. The plants grow from a foot to eighteen inches high, endure the winter and become a waving mass of rich bloom. All are easily grown from seeds and bloom the second year. Fine for beds, borders and pots. Give a sunny exposure.

Carnations, for borders, splendid large, double flowers, highly perfumed and in all the leading colors from white to dark crimson; also various kinds of plants hardy, very floriferous, and long-blooming. I offer a high-class strain, finest mixed colors, 4 pkts 10 cents, 1 pkt. 3 cts.

Carnation, Finest Double, from Stage flowers, finest seeds to be obtained mixed colors..........................10
Carnation, Comtesse de Paris, yellow double, cut large all from two little 3-cent packets of seeds. They commenced to bloom in April, and are now, Oct. 16th, full of flowers and buds. — Mrs. Wilson, Garfield Co., Ills., Nov. 10, 1905.

Pinks, Park's Everblooming.

The new hardy Pink, blooming throughout the summer; flowers large and handsome, single, semi-double and double, in fine colors, richly scented and beautiful. Cut freely to prevent seeding. Mixed, 4 pkts 10 cents, 1 pkt. 3 cts.

Picotee, French, fine bedding plants, 4 pkts 10 cents, 1 pkt. ............... 3
Picotee, Finest Double, from Stage flowers, a superb strain, mixed mixture........................................... 10
Pink, Double Garden, mostly double and semi-double, blooming in May and June; large, fragrant flowers, in various shades; mixed mixture..10 cents 1 packet........................................ 3
Pink, Hardy Garden, double, white, lovely........................................ 5
Pink, Park's Everblooming, shades of red, mixed........................................ 5

Mr. Park: One of the most satisfactory plants I have is the old-fashioned clove-scented Pink. It is a hardy perennial, blooming in May and June, the flowers sweet and beautiful. The foliage forms a mat of lovely green.—H. E. S., Soldier, Kans., Oct. 6, 1905.

Mr. Park: Last year I purchased some Pink seeds of you. I sowed them in boxes in May and when the plants were large enough transplanted them in the garden. They were pink, white, two shades of red and scarlet. They have been a constant succession of flowers from early spring until late fall, neither drought nor hot sun affected their bloom. The scarlet ones are especially beautiful and glow like rubies in a setting of green.

Free does not injure them.—Mrs. H. C. Calhoun, Washita Co., Okla., Nov. 11, 1904.

Pinks, Carnations and Picotees, special mixture, single and double, all colors, 4 pkts 10 cts., 1 pkt. .................. 3

Platyodon.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

From Manchuria we have a beautiful Bellflower sometimes known as Campanula grandiflora, sometimes as Wahlenbergia, and sometimes as Platyodon. I list it under the latter name. The plants grow from a foot to eighteen inches high, erect in form, and bear at the summit a cluster of large, cup-like blue and white flowers, single and semidouble. This is a hardy, tenacious perennial, and one of the finest garden flowers in existence. It will take care of itself when once established.

Large-flowered white, 5 cents
Large-flowered blue, 5 cents
Large-flowered semi-double, blue, 5 cents
Large-flowered semi-double, white, 5 cents
All varieties, single and double, special mixture, 4 packets 10 cents, 1 packet.................. 3

Mr. Park: My Platyodons from your seeds are so fine that I wish all who raise flowers would try them. They are perfectly hardy and come up every year. I also have some others, but they are poor compared with the beauty of those raised from your seeds.—Mrs. Lillie Baker, Taylor Co., Tex., Oct. 38, 1904.

Platyodon.—The Platyodon is a valuable plant, growing about three feet high. It is a hardy perennial and requires no care—only a place to grow cutting and quite distinct in form and color.—Hattie E. Mead, Chittenden Co., Vt., Oct. 27, 1905.

**Poppy, Perennial Hybrids.**

Special mixture, all varieties, 4 pkts 10c., 1 pkt 3c.

Glorious garden flowers are the New Hybrid Perennial Poppies, a splendid collection of which I offer in colors. The plants are hardy and last for years. They grow two or more feet high, clothed with handsome foliage, and surmounted with enormous, rich-colored flowers, six to twelve inches across, varying from creamy white through shades of orange scarlet to dark, glowing crimson. They bloom in June, and at that time nothing in the garden is more attractive. The seeds are slow in starting and should be given several weeks to germinate.

**Princess**

White, Rose and Scarlet, each 5 cents.

Special mixture of all colors, 4 packets 10 cents, 1 packet 3 cents.

**Primula, Hardy Perennial.**

Special mixture of many sorts, 4 packets 10 cents, 1 packet 3 cents.

I would ask special attention to the hardy Primroses I offer. They are beautiful in foliage, beautiful in bloom and beautiful in fragrance, and a bed or border of them in the garden is always enthusiastically admired. Most of the species are readily started from seeds, and most of them are hardy plants if grown in a cold frame. They deserve general cultivation, and will doubtless become popular when better known.

**Phlox, Hardy Perennial.**

Finest mixture, 4 packets 10 cents, 1 packet 3 cents.

**Peas, Hardy Perennial.**

Special mixture, all colors, 4 pkts 10c., 1 pkt 3c.

Grand, hardy vines, blooming all summer when cut freely. Flowers large, in one clusters. Excellent for a trailing mass or for covering an old stump or stone heap, as the vines bloom very profusely. Red, White, Rose and Scarlet, each 5 cents.

Special mixture of all colors, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: My Perennial Peas from your seeds were quite a success this year. They grew and flowered until they were eight feet tall, and everybody admired them. — Mrs. B. Johnston, Huron Co., Oct. 11, 1904.

**Golden Gem...**

**All kinds mixed...**
Pyrethrum—Perennial Cosmos.

Single and double, special mixture, 4 packets 10 cents, 1 packet 3 cents.

The New Hybrid Pyrethrum are sometimes called Perennial Cosmos, on account of their Cosmos-like flowers and feathery foliage. The plants grow two feet or more high and bloom during summer, the large, showy flowers being of many shades, from rosy white to deep crimson. A few of the plants will produce double flowers. I offer a fine strain of the new, large-flowered hybrids. They are splendid garden flowers and should be generally grown.

Large-flowered, crimson 5
Large-flowered, white 5
Large-flowered, rose .. 5
Double, mixed .. 5
Large-flowered, special mixture single, 4 packets 10 cents, 1 packet .............. 3

Mr. Park: For three Seasons I have had your Perennial Cosmos or Pyrethrum growing in my yard. Each season they have been finer and bloomed longer and more profusely. I have crimson, pink and white. They are all single, but they are hardy and beautiful. I stir the soil around them, and when using manure water on other plants I give them a drink and they well repay me for it. I mean to have some of the double ones, though it does not seem possible for them to be finer than the single ones. Tell the flower friends that they will not be disappointed. Mrs. Oscar Whitcomb, Middlesex Co., Mass., Nov. 19, 1902.

Giant Sweet Williams.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The Sweet William, Dianthus barbatus, has been greatly improved since our grandmother’s day, and we now have larger flowers in larger clusters, and in a greater variety of colors and variegations. All are richly scented, are easily started, and for several years the plants will make a grand display in the garden. If kept from bearing seeds they will bloom almost continuously. If cut down after the early crop of bloom fades, new stems will push up and bear flowers in the autumn. I offer a very superior strain of seeds.

SINGLE SORTS

Nigrescens, very dark 6
Oculus, eyeled ............. 5
Albus, pure white .......... 5
Hunt’s margined ............ 5
Dunnet’s crimson .......... 5
Song and double, mixed, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: Your Sweet Williams are beautiful. All who have seen them say they are the finest they have ever seen. The plants are perfectly hardy, and the flowers very fragrant. Everyone should have a bed of these lovely flowers, as they are easily raised from seeds and need very little care. Mrs. E. A. Perry, Iowa Co., Wis.

Mr. Park: In beds or in the hardy border this good old plant is equally beautiful, and should be grown in quantities in order to enjoy the different markings and forms. The flowers have been very beautiful, and the large form, both double and single, and brilliant colors of the Sweet William to-day bear little resemblance to the old sorts. A rich soil and plenty of moisture while growing is essential. The flowers are produced in large numbers and are very lasting. Seeds are freely produced and germinate readily. They may be raised with ease.

Clifford N. Raynor, Suffolk Co., N. Y.

Wallflower, Non plus ultra.

Single and double, all colors, finest mixed, 4 packets 10 cts., 1 packet 3 cts., Wallflowers are prized for their fine habit, handsome flowers and delicious fragrance. The plants are hardy in porous, well-drained soil, and bloom early in spring. The seeds I offer are from a superb European collection, embracing cream, canary, golden yellow, blue, brown, red, crimson and violet, all large-flowered and handsome. Single sorts mixed or double sorts mixed, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: I wish you could see my Wallflowers raised from your seeds. They are just double. I can truly recommend them. Jessie Ransome, Chautauqua, N. Y., Nov. 15, 1903.

Also as Diascydion.
Seeds of Choice Window Plants.

THOSE who succeed with the common annuals will find such pot plants as Abutilons, Asparagus, Carnations, Cinerarias, Cyclamen, Geraniums, Lantanas, Heliotrope and Primroses of easy culture from seeds. Achimenes, Begonias, Gloxinias, Gesneriads and the like have much smaller seeds, and the plantlets require more skill in handling. I supply full cultural directions with the seeds, however, and any careful person may expect good success by following the instructions on sowing and after-care.

Asparagus, Decorative Species.

Complete Mixture, 4 pkts 10 cents., 1 pkt 3 cents.

Among the most fashionable as well as beautiful foliage, basket and pot plants for the window are the various species of Asparagus. They are easily grown from seeds, and will bear ill treatment and neglect that would destroy many of the less tenacious plants. All of the species have fine, plume-like foliage, and are of charming effect. They are plants for everybody, and are highly satisfactory under ordinary conditions. The new one illustrated, A. decumbens, like the others, has elegant foliage, and appears well when made up with Sweet Peas or other flowers in bouquets. It is one of the best ts.

Plumosus nanus, compact with lace-like foliage delicate and beautiful; per packet.............. 5
Plumosus robustus, a vigorous-growing variety, with large sprays on strong stems.............. 5
Acutifolius, a fine sort with feathery sprays; not common, but very pretty.................. 5
Sprengeri, the popular vase plant, will droop in graceful festoons five feet, and show a rich mass of verdure. It can also be successfully trained over a trellis; per packet............. 5
Decumbens, the new species from the Cape of Good Hope; a herbaceous perennial with tuberous roots, and as easily cared for as the other kinds; a lovely pot or basket plant. (See engraving.) Per packet............. 5
Verticillatus, a hardy species, vining and very graceful for covering a trellis, rare, pretty.. 5
Complete mixture of all sorts, 4 pkts. 10c, 1 pkt. 3

Mr. Park: I am very much pleased with the Decorative Asparagus plants I raised from a packet of your mixed seeds. One of them is different from any I have ever seen before, and is, if anything, even prettier than the Sprengeri. Mrs. P. M. Young, Pencochot Co., Me., Oct. 6, 1904.

Mr. Park: I have a lovely Asparagus Sprengeri raised from your seeds which is a wonder to all beholders. The plant fills a large pot and its beautiful fronds trail down over five feet in length. Mrs. G. Bone, Hardin Co., Ohio, Oct. 26, 1904.

Mr. Park: I raised five plants (three different kinds) from a packet of your mixed Asparagus seeds. They are easily treated and look well in any window, and their fine, graceful foliage is very handsome. Hattie Sargent, Haverhill Co., Mass.

Abutilon, New Hybrids.

Special mixture, 4 packets 10 cents. 1 packet 3 cents.

One of our most desirable window plants is Abutilon, or Flowering Maple. It is a half hardy shrub that thrives under pot culture, and blooms freely in either winter or summer. The foliage is graceful and handsome, and the large, showy flowers in various fine colors hang like bells upon the plant. Decorative Asparagus plants suggest the common name often used, "Bell Flower." I offer seeds of a choice strain of the new, compact, brilliant-colored hybrids, which cannot but please those who sow them. The plants start as readily as Balsams, and you will surely succeed with them.

Pure white.................. 5   Salmon rose............... 5   Special mixture of New Hybrids.................. 5
Deep yellow.................. 5   Bride, 4 pkts. 10 cts., 1 pkt........ 3

Mr. Park: My Abutilons raised from your seeds are over two feet tall and are such steady bloomers. I would not be without them. The flowers are larger than those of the Fuchsia and as brilliant in color. They are as easily grown as Geraniums, and bloom freely in winter. Jessie Sharp, Adams Co., Ohio.
Begonias in Splendid Variety.

Special mixture, 4 packets 10 cents, 1 packet 5 cents.

Begonias are as important a class of flowering plants, for pots in the window or sheltered beds on the lawn. The plants bloom colorfully for months, and while showy in flower they are equally attractive in foliage. They are easily cared for and are sure to bloom. The tuberous sorts bloom mostly in summer, and the fibrous-rooted ones in summer and winter.

**Tuberous-rooted Begonias.**
- Bright red
- Bright pink
- Pure white
- Bright scarlet
- Bright orange
- Double mixed

**Fibrous-rooted Begonias.**
- Bijou
- Schmidti
- Semperflorens, white
- Anna Regina
- Rex

Mr. Park: I guess every seed of the 5-cent Begonias packet came up. The flowers shone from pure white to dark red, with different shaped and greatly variegated foliage. —N. Perry, Outagamie Co., Wis., Oct. 11, 1886.

**Coles, New Fancy leaved.**

Special mixture, 4 packets 10 cents, 1 packet 5 cents.

The new Coleus hybrids are grand foliage plants for either pots or beds. They are very easily raised from seeds, and the leaves are of many shapes and sizes, and all richly colored, blotched, spotted, veined and marbled. I can supply the choicest kinds separately, or all in special mixture. My seeds are saved by skillful Coleus specialists in Germany, and imported. There are none better, and plants from them will be a revelation to those who know only the older Coleus.

**Calceolaria, Hybrid Herbaceous.**

These easily-grown but much neglected window plants are, in their improved form, as beautiful as Orchids, the varieties being of many superb colors, and often spotted, blotched and striped in the most pleasing and picturesque manner. The seeds are small, but as easily cared for as those of Gloxinia, and the only insect likely to trouble them is Aphis, which can be effectually kept down by sprinkling tobacco dust upon the soil in which they are raised, dusting it upon the leaves when infested. I offer seeds of the very best strains in cultivation. Started in spring or early summer the plants will bloom the following winter and make an elegant, novel display in the window.

Large-flowered Tinged and Spotted... 5
Self-colored, mixed.................. 6
Painted and Margined............... 5
Fancy Striped........................ 6
New Dwarf, mixed.................. 6
Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: From a three-cent packet of your Calceolaria seeds I raised plants enough for myself and two friends. Everyone admires their lovely blossoms, and strangers passing by stop to inquire what they are. Mrs. Libby, Somerset Co., Me., Oct. 19, 1904.

Mr. Park: I have had excellent success in raising Calceolaria from your seeds. I sowed them according to your cultural directions, and had a lot of plants from one packet of seeds, and am very much pleased with them. Mrs. F. M. Young, Penobscot Co., Maine, October 6, 1904.

Mr. Park: I have eighteen fine plants of Calceolaria raised from a three-cent packet of your seeds, and the spotted, pocket-shaped flowers are most beautiful. Mrs. C. C. Kent Co., Mich., Oct. 4, 1904.

**Carnations for Winter.**

For winter-blooming I offer a strain of Carnations easily grown from seeds, and bearing large, double, richly-scented flowers of all the choice shades of white, rose, red and yellow, as well as variegated. The seeds are sown in the spring, and when large enough the young plants are bedded out in a sunny spot in the garden, kept well watered during dry weather, and the blooming shoots pinched out as they appear. In August or early September they are potted and removed to the window or conservatory, where they will bloom freely throughout the winter. Avoid the common garden Carnations for the window. They will not prove satisfactory. Finest mixture, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: From one three-cent packet of your seeds I raised a whole windowful of Carnations. Their blooms were beautiful and about as fine as the florists' Carnation, while there were so many handsome colors and shades. A. R. L. Cortland Co., N. Y., Oct. 4, 1904.

Mr. Park: Among my house plants I have some lovely winter-blooming Carnations grown from your seeds! They make fine window plants, and furnish so many fragrant blooms for cut flowers. Mrs. F. R. Stilson, Ingham Co., Mich., Oct. 24, 1904.

Mr. Park: Very Winter-blooming Carnations from your seeds were grand. They were so fragrant. One flower was alone worth the cost of the seeds. Mrs. F. T. Piercy, Gilmer Co., W. Va., Oct. 13, 1904.

Mr. Park: I had good luck with the Winter-blooming Carnation seeds bought of you. I planted them the 18th of April, and I think every seed germinated. The plants grew nicely and are now loaded with buds. Mrs. Laura Knight, Morgan Co., Ill., Oct. 21, 1904.

**Convolvulus Mauritiiacus.**—A handsome vine for a bracket pot or basket, very easily grown from seeds, and bearing an abundance of small, blue, Morning Glory-like flowers upon pendant leafy sprays. The seedling plants soon come into bloom, and are showy for a long time. Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

**Cuphea.**—Shrubby greenhouse species bearing long, Chelone-like flowers of rich scarlet and gold, and making a fine display in beds in the garden in summer and in pots in the window in winter. C. Platcentra, C. Resili, C. Eminiens, C. Strigulosa and others, separate, 6 cts. per pkt.; mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.
Cineraria, Park's Fine Hybrids.
Special mixture, 4 packets 10 cents, 1 packet 3 cents.

I ask special attention to the splendid strain of Large-flowered Cineraria Hybrids I offer. They are among the most generous and beautiful of window flowers. None are more attractive, and few are more easily grown. The seeds start readily, and plants begin to bloom in nine or ten months. To avoid green fly, put tobacco siftings or chopped tobacco stems upon the soil. Shift into larger pots as the plants grow, and shade from mid-day sun. The seeds offered are from a very superior strain, and can be depended upon to produce plants of fine form, and flowers of grand size and colors.

Cineraria Polyantha Stellata. I also offer the new floriferous Star Cinerarias. These are very graceful, the flowers being smaller, of various forms, and show many colors and varieties. They are fairly shown in the engraving. They are taller than the Choice Hybrid varieties, but far more free-blooming, and are very beautiful. I offer a first-class strain. Finest mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: My Cinerarias from your seeds were greatly admired. One was of the richest purple, one a deep crimson with yellow centre. They bloomed freely, bearing from twelve to twenty large blossoms continuously for over two months. Mrs. E. J. Bailey, P. Q., Can., Oct. 13th.

Cineraria Polyantha Stellata.

Chrysanthemum, Veitch's Japanese.
Finest mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

It is not commonly known that the popular Chrysanthemums exhibited at fall shows may be successfully raised from seeds. If started early in spring the plants will bloom in the autumn. The seeds germinate promptly and the plants should be given a shady place and plenty of water to promote their development during the summer. Keep them in pots, shifting as often as the roots begin to crowd. The flowers are very double and of many shades of white, yellow, rose and red. I offer first-class seeds. Finest mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: From a packet of your Chrysanthemum seeds I raised seven fine plants. They are now coming into bloom and are as handsome as Chrysanthemums can be. Allen H. Taylor, Burlington Co., N. J., Oct, 5, 1904.

Mr. Park: I was much pleased with the Chrysanthemums raised from your seeds. They were very double and just covered with blossoms. They live through very severe frosts. M. E. C., Oxford Co., Me., Oct. 9, 1904.
Cyclamen, New Giant-flowered.

Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

The Cyclamen is a very satisfactory plant or the window, blooming well in winter and having exquisite, attractive flowers in rich and beautiful colors. No plant is easier to start from seeds, and bloom can be expected in eighteen months from sowing. The seeds require a month to start. I offer a superb strain of the finest large-flowered varieties in all the choice colors. My mixture contains all the colors well proportioned.

White with red eye............ 8 James Prize, fragrant........ 8
Dark red.......................... 8 Pure white.......................... 8
Dark blood red................. 8 Mixed, 4 pkts 10 cts., 1 pkt. 3

Butterfly Cyclamen.—The new Papilio or Butterfly Cyclamen is a novelty of great beauty. The flowers are fringed, as shown in the engraving, and come in the colors White, Rose, Red and White with Red Eye. I can supply the colors separately at 10 cents per packet of four seeds, or in special mixture in packets of five seeds at 10 cents, or 5 packets for 25 cents. Almost every seed will grow.

Mr. Park: From one 5-cent packet of your Giant-flowered Cyclamen seeds I have twenty-one fine plants. I think every seed germinated, but as I sowed the entire packet in a 10-inch pot some died from being too crowded.—Mrs. R. D. Moore, Jackson Co., Ga., Oct. 25, 1905.

Mr. Park: One year ago last spring I raised eight plants of Giant Cyclamen from seeds purchased of you. Last winter three of them bloomed, just enough to show their beauty, although the tubers were only about one inch in diameter. At present they measure two and one-half inches across and are full of buds, which will soon make a grand display. The foliage is lovely, and when in full bloom, the plant is a great sight. I find them very easily raised from seeds, and shall never regret the little trouble they were to me.—Mrs. F. R. Stillson, Ingham Co., Mich., Oct. 24, 1905.

Mr. Park: I sowed a packet of your Cyclamen seeds, and every seed grew.—Alice L. Hale, Linn Co., Mo., Oct. 11, ’06.

Cyperus—Umbrella Plant.

Finest mixed, 4 pkts. 10 cts., 1 pkt. 5 cts.

One of the most desirable foliage plants for the window, growing several feet high, dense, attractive and even more graceful than a Palm. Water freely while growing and avoid root-crowding. After blooming water sparingly, rest for a few weeks and repot. Seeds start readily and the plants soon become fine specimens.

Alternifolius, the old sort, see engraving......... 5
Papyrus, very handsome sort................. 5 Special mixture, 4 pkts 10 cts., 1 pkt............. 3

Mr. Park: From one 3-cent packet of your Cyperus seeds I raised at least fifty plants, and oh, how fast they grow.—Mrs. K. U., Perry Co., Mo., Oct. 7, 1905.

Francoa Ramosa.

Price, 4 packets 10 cts., 1 packet 3 cts.

A greenhouse perennial of easy culture, belonging to the Saxifrage family. Grows two feet high, has fine lyrate foliage, and pure white flowers freely produced on long, branching spikes. The seeds start readily, and if sown in April will produce plants that will bloom freely the next season. Plants do well bedded out in summer, and can be wintered in any frost-proof room. 4 pkts 10 cts., 1 pkt 3 cts.

Eupatorium Weinmannianum

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

This new plant can be grown in the garden, where it attains the height of ten feet, branching and becoming a dense bush, literally covered with its clusters of white, sweet-scented flowers. In a pot it is not so large, but becomes a compact, symmetrical plant, blooming beautifully in winter, and eliciting much admiration and praise. It deserves a trial. Price, 4 packets 10 cents, 1 packet 3 cents.
Gloxinia, New Giant Hybrids.
Special Mixture, 4 pkts 10 cts., 1 pkt 3 cts.

I offer a strain of very beautiful larger flowered Gloxinias. The plants are robust and free-blooming, and the flowers much larger and finer than those of the ordinary kinds. Seedling plants bloom in from five to ten months after the seeds are passed, showing many colors from white through the rich shades of pink to scarlet, and from azure blue to royal purple, some flowers being finely spotted, throated and margined. These seeds are small and require some skill in sowing and watering, but anyone who has had some experience in tending fine seeds need not hesitate to sow Gloxinias. Finest mixtures, splendid Giant sorts, 4 pkts 10 cts., 1 pkt 3 cts.

Giant Cyclops, velvety carmine shaded I broad white border, throat dotted, interior red, per packet.

Giant Goliath, velvety purple-violet, shading to a pure white border, throat delicately spotted, per packet.

Mr. Park: I never supposed that anybody but an expert could raise Gloxinias from seeds, but have found out my mistake. I purchased a 3-cent packet of seeds from you, followed cultural directions, and raised over forty nice plants. They have not bloomed yet, for it was late when I sowed them, but the foliage is beautiful and they have formed plump little tubers that give promise of plenty of bloom later.—Mrs. Costello, Port Co., Ga., Oct. 17, '04.

Mr. Park: Seedling Gloxinias are very easily raised by anyone used to sowing fine seeds. From one packet I obtained all colors and shades.—Mrs. C. A. L., Somerset Co., Md., Oct. 19, 1904.

Mr. Park: I raised thirty fine plants from one 3-cent packet of your Gloxinia seeds.—L. M. Brandt, Middletown Co., Oal., Oct. 19, 1904.

Geranium, Finest Zonale.
Splendid mixture, 3 packets 10 cts., 1 packet 3 cts.

Geraniums are easily raised from seeds, and seedlings are more robust and healthy than plants from cuttings, while the flowers and clusters from a first-class strain are even finer than most of the named varieties. The seeds I offer cannot be surpassed in quality, and those who sow them will be more pleased with the results. They were carefully saved from the newest, best-improved types, and the plants will bear very large, round flowers in splendid globular tufts upwards of a foot in diameter, and in superb shades of scarlet and crimson, rose, salmon, cream, veined pink, blush and pure snowy white. Splendid mixture, 4 packets 10 cts., 1 packet 3 cts.

Mr. Park: I bought a 3-cent packet of Zonale Geranium seeds. I raised fifteen fine plants. Some of them produced the prettiest blooms I ever saw, and there is one especially fine—a very large single pink, shaded white. It is so handsome everyone wants a slip from it.—Mrs. W. J. Jeffries, Colpepper Co., Va., Oct. 6, '04.

Mr. Park: The largest-flowered and most beautiful Geraniums I ever saw were raised from a 3-cent packet of your seeds.—Rose H. Heft, Hock Co., O., Oct. 7, '04.

Grevillea Robusta Pyramidalis.—A very graceful and satisfactory pot plant for the decoration of the piazzas in summer, and the room or window in winter. The leaves are serrates and charmingly arched, are of a silvery shade of green, somewhat coriaceous in texture, and quite well injured. Plants are of pyramidal growth, start readily from seeds and soon become fine specimens. It is sometimes called Australian Silk Oak, and is of the easiest culture. 4 pkts 10 cts., 1 pkt 3 cts.

Mr. Park: My Grevillea robusta from your seeds is perfect in shape. It is very striking with its beautiful finely-cut, drooping leaves, and attracts the attention of everyone.—A. E. Story, Cisy Co., La., Oct. 5, 1905.
Heliotrope New Giant.

Special mixture, 4 pkts 10 cts. 1 pkt 3 cts.

The new large-flowered French Heliotropes are a great improvement upon the old-fashion-
d sorts, the plants being more robust and flor-
tuous, while the flowers are of large size and
eone in huge clusters. Plants grow readily
rom seeds and like a warm sunny place.
large-flowered, white in splendid variety. .......... 6
large-flowered, violet in splendid variety. .......... 5
large-flowered, light blue in splendid variety. ....... 5
large-flowered, dark blue in splendid variety. ....... 6

Mr. Park: Your new large-flowered Heliotropes are
omething extra fine. I succeeded in raising several beau-
ful specimens from half a packet of seeds. I am de-

Mr. Park: My Heliotrope seeds came up good, and I had
o plants which bloomed all summer and autumn. Mrs.

Impatiens Sultani Hybrida.

Special mixture, 4 pkts 10 cts. 1 pkt 3 cts.

This is the Zanzibar Balsam, improved in form
and colors. The plants start readily from seeds
and begin to bloom as early as the Garden Bal-
sam, becoming bushy and symmetrical, and
covered with bright, waxy flowers of various
shades from salmon white to dark purple until
frost. The plants like a rather sunny place, and
are fine as single specimens when planted out
as well as showy in a group or border. As a pot
plant this Balsam is hardly excelled, being easily
cared for, and blooming uninterruptedly for
many months, summer or winter. In a sunny
room of even temperature it is one of the best
winter-blooming plants known, and never fails
to give unbounded satisfaction.
Rosea bright rose, splendid..... 8 | Queen, whitish salmon..... 8
King Albert, pinkish carmine, 5 | Mixed, 4 pkts. 10 cts. 1 pkt. 3

Mr. Park: I wish all flower lovers would try your seeds of
Impatiens Sultani if they want something that blooms the
year round and always looks fresh and clean and has no insect

Jerusalem Cherry.

New Hybrid mixed 4 pkts. 10 cts. 1 pkt. 3 cts.

Lantana, New Dwarf.

Fine mixed, 4 pkts. 10 cts. 1 pkt. 3 cts.

Beautiful bedding and pot plants, very free bloom-
ing, easily grown from seeds, and do well in a sunny
place. Always in bloom under favorable conditions,
and much prized. Finest mixed, 4 pkts 10 cts. 1
pkt. 3 cts.

Mr. Park: I have good suc-
cess with all of your seeds,
especially Lantana. No flower
I ever had gives me so much
satisfaction. My plants bloom
continuously, and sometimes 10
or 20 clusters. May Preston,

Morrenia Odorata

A graceful evergreen vine of rapid growth, the
leaves heart-shaped, pointed, green above and
silvery beneath; flowers white star-like and very
fragrant. A good vine for window trellis. Price, 4
pkts. 10 cts. 1 pkt. 3 cts.

Passiflora.

Passion vine, starts easily from seeds, and splendid
for a trellis, or summer-house in summer; flowers
odd and beautiful. Protect by lifting and keeping
in a frost-proof place, where the winters are severe
Blue, scarlet, etc. in special mixture or separate,
per packet, 5 cts.
The Magnificent New
FRENCH GIANT PRIMROSES.
Complete Mixture, 3 pkts 12 cts., 1 pkt 5 cts.

The new strain of the Chinese Primrose developed in France is conceded by lovers of Primroses to be superior in vigor and symmetry of growth, while the flowers, borne in huge clusters, are giants in size, attractively fringed, and freely and continuously produced; and show a range of the most distinct and beautiful colors. The French are very successful cultivators of this class of plants, and in past years many very beautiful popular varieties have been brought out by specialists. The race here offered, it is to be hoped, surpasses all previous introductions, and I heartily urge all my friends to give this new race of Primroses a trial, believing that they will be pleased with the results. I am glad to be able to offer the seeds at so low a price, being fortunate to secure a fine stock from a specialist, at a special price. Finest mixed, 3 packets, 12 cts., 1 packet 5 cts.

Giant Mallow-leaved Varieties.
Lady Randolph Churchill, pure white, the large flowers in splendid clusters; vigorous and free blooming; per packet ........................................ 6
Princess Louise, rosy white; an elegant, large-flow- ering kind, the plants showing a mass of attrac- tive flowers; per packet ........................................ 6
Empress, blue; the flowers of large size, finely fringed; plant symmetrical and profuse-blooming; pkt ........................................ 6
Emperor, copper-color; very showy and handsome, in large compact trusses; plants of strong habit, bearing many trusses per packet ........................................ 6
Marquis of Lorne, rose; very delicate and effective, plants covered with massive clusters; per packet 5
Soleil D’Empel, pure white, with dark brown stems and elegant foliage; one of the finest varieties; pkt 5
Defiance, rich bright red; one of the darkest and most striking of Primroses; showy, beautiful; pkt 6
Special mixture of the above mallow-leaved sorts, 3 packets 12 cents, 1 packet ........................................ 6
Complete mixture of Mallow and Fern-leaved sorts, 3 packets 12 cents, 1 packet ........................................ 6

Giant Fern-leaved Varieties.
The Queen, rosy white; the flowers large, finely fringed, delicate and beautiful; splendid foliage; per packet ........................................ 5
Angelica, pure white, fringed flowers borne in showy trusses; foliage deeply lobed and feather-like; per packet ........................................ 5

Cuprea, coppery rose flowers, odd in color and quite showy, a handsome, free-blooming sort; packet 5
Leopoldi, pure rose, elegantly fringed both in foliage and flower; one of the best; per packet ........................................ 5
LaRose, very pretty light rose-colored flowers in fine clusters; foliage fringed and feather-like; per pkt ........................................ 5
Special mixture of above Fern-leaved sorts, 3 packets 12 cents, 1 packet ........................................ 6

The seeds of French Giant Primrose I offer are imported direct from the Primrose specialists in France who developed this splendid race of large-flowered varieties. I offer them with confidence believing that they will prove entirely satisfactory to my patrons. They are at least worthy of a trial.
Primula Stellata Pyramidalis.
Special mixture, 1 packet 10 cents, 3 packets 25 cents.

The New Hybrid Star Primrose, shown in the engraving, is a grand winter-blooming pot plant, surpassing in free-blooming and attractiveness even the well-known Chinese varieties. The plants grow from a foot to eighteen inches high, becoming a pyramidal mass of showy flowers of many colors, and make a fine display throughout the winter season. No pot-plant has been so much praised in England for its beauty and usefulness as the Primrose, and for several years the English seed dealers have retailed the seeds at very high prices. A few plants will fill a window, and their giant form and floriferous grandeur never fail to elicit the highest words of praise. I have pleasure this year in offering splendid new named varieties, and at prices that will certainly make them popular. Those who are fond of winter-blooming Primroses should not fail to add a collection of these new Star varieties to their list.

White Star, improved, pure white, dark foliage...... 10
Alba floribunda, super, white.......................... 10
Giant white, large; dark foliage.......................... 10
Hybrid white, extra fine................................. 10
White Queen Star, pure white, very free-blooming... 10
Lady Emily Dyke, similar to preceeding; very fine.. 10
Salmon Pink, charming salmon color; dark foliage.. 10
Miss Irene, very handsome; light rose, green foliage 10
Special mixture of all the choice varieties a superb combination, 3 packets 25 cents, 1 packet 10 cents.

Mr. Park: I must tell the floral sisters about my Primula hybrida pyramidalis stellata that I raised from a package of seeds that I bought of you. There were only ten seeds, but I raised nine plants. The seeds were up ten days after I planted them. I gave some to my friends, and what I kept were covered with blossoms all winter and summer. Some had sixteen and eighteen flower stems on, and tier after tier of blossoms. They were simply grand. All should try them, as they bloom more freely than the Chinese Primroses. Emma Head, Forest Co., Pa., Nov. 1903.

Primula Forsbei, the Baby Primrose, one of the most dainty and free-blooming of pot plants. Easily grown from seeds, and comes into bloom in three or four months after starting. Flowers mostly lilac with yellow centre, and produced in whorls continuously. Charming. Lilac, Magenta and Compacta separate, 5 cents each, or in special mixture 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: I planted a packet of your seeds of Primula Forsbei in April and saved six plants, and now they are beauties—such dainty sprays of delicate flowers and buds. They are easily raised and greatly admired. Mrs. Wm. Saliter, Ogle Co., Ill., Nov. 1, 1903.

Primula Obconica, New Giant. A rival of the Star and Chinese Primroses for winter-blooming is the New Giant Primula Obconica. This sort has flowers almost equal in size to those of the old Chinese kind, while they come in plain and fringed forms, and bear huge clusters held above the foliage on strong stems. I supply white, rose, lavender and carmine, plain or fringed, at 6 cents per packet, or all in special mixture, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: Too much praise cannot be given my plants of Primula obconica raised from your seeds. The flowers are so dainty and beautiful. Mrs. E. J. Bailey, P. Q., Canada, Oct. 13, 1905.

Mr. Park: Here is a photograph of our Primroses. It shows how easy it is to have a windowful of the most beautiful winter-blooming plants. These were raised from seeds bought of you last spring. Had I waited a week or ten days the picture would have looked like a large bouquet, the buds developing into each large flowers and of all colors. The plants have been in bloom all winter and have been admired and praised every day. People promenade past my north window to see the grand display. I am going to try the highest priced seeds of others along with yours next year to see if there is any difference.—Arthur G. Thompson, Danville, Ind., March 22, 1902.

Later.—Mr. Park: I tried the high-priced Primrose seeds of other seedmen with yours, and find the greatest difference is in the price. The $0.35 and 50-cent packets had a few more seeds in than your 3 and 5-cent packets, but the two kinds, planted in the same boxes in small rows, grew and bloomed so near alike you could see no difference in the plants or flowers. I can recommend your low-priced seeds to be fully equal to those sold at the highest price by other dealers.—Arthur G. Thompson, Danville; Ind. Jan. 3, 1904.

I offer first-class seeds of the finest strain of Chinese Primroses known, supplying these separate varieties at the extraordinary low prices quoted.

Complete mixture of all varieties 4 packets 10 cents, 1 packet.

Those preceded by a star can be supplied with either mallow-leaved or fern-leaved foliage. All are fringed.

Mr. Park: I raised eight lovely Chinese Primroses from one 3-cent packet of your seeds. One was pure white and the rest were each a different shade of red, from a pale lavender pink to a deep rich red. And bloom—I never see anything like it! They just bloomed all winter, and were as handsome as could be.—Mrs. Wm. L. Jeffries, Culpeper, Co., Va., Oct. 6, 1904.

Mr. Park: I never had anything prettier than the Chinese Primroses raised from your seeds. They bloomed for ten months in succession and had such bright, cheerful colors. They have such exquisite foliage they would make lovely window plants even if they never bloomed.—Mrs. M. Graybill, Davie’s Co., Mo., Oct. 9, 1904.

**Solanum grandiflorum**, a very handsome vine from Jamaica, grows fifteen feet high, bearing beautiful trumpet flowers seven inches long, peach-colored, succeeded by egg-like fruits of sweet, sub-acid flavor. Give a large pot of loamy soil, and water freely until a good growth has been made, then withhold water entirely till the leaves drop off from drought; after this keep barely moist till signs of renewed growth, when, the water supply increased, the foliage, buds and flowers will soon appear. Per packet, 10c.; 5 packets 9c.

**Solanum Seaforthianum**, an elegant, free-blooming vine, the flowers blue in large panicles. May be bedded out in summer, and winter in the house. Easily grown from seeds; will climb fifteen feet high and bloom continuously summer or winter. Price, 4 packet, 10 cents, 1 packet 5 cents.

**Sutherlandia frutescens**, a leguminous, shrubby pot plant from South Africa; flowers scarlet, in axillary racemes, and very handsome; fruit a curious, papery, inflated, many-seeded pod; grows three feet high. This plant does best in a compact of loam and peat, and is easily raised from seeds. Per pkt 25c.

**Scutia fru tongia**, leguminous vines of great beauty, both in foliage and flower; flowers pea-like, in racemes and blue, purple, red, white and yellow in color. Plants start readily from seeds, and thrive in a mixture of sandy loam and peat. Finest mixed, 6 packets 30 cents, 1 packet 5 cents.

**Solanum Weatherillii**, improved hybrid of Jerusalem Cherries; bushy plants covered with showy, fruit elegant for window pots, 4 packets 10 cts. 1 packet 3 cts.
I take much pleasure in offering my friends seeds of a very fine strain of Streptocarpus, one of the most beautiful, free-blooming and decorative of pot plants. The plants are easily grown from seeds, as Glxiniias, and require about the same treatment. Seedlings begin to bloom in five months from the date of sowing, and the exquisite Achimene-shaped flowers are borne in clusters, displaying lovely shades of white, rose red, violet and blue, all superbly penciled, bocahed and shaded. The skilful window gardener who wishes something new, rare and beautiful should not fail to try this grand new flower. I offer seeds as follows:

- Hybrid Streptocarpus, red and rose colors: 5 packets
- Hybrid Streptocarpus, violet colors: 2 packets
- Hybrid Streptocarpus, white colors: 5 packets
- Streptocarpus Wendlandi, blue flowers: 5 packets
- Streptocarpus polyanthum, lavender: 5 packets
- Streptocarpus Achimene-flowered, mixed: 5 packets

Note.—The beautiful Streptocarpus Hybrids, are remarkable for the abundance and continuous succession of their bloom. The flowers have been brought to a very high state of perfection by careful culture and hybridization, and are now far in advance of the older varieties both in richness of color and in size and form. As pot plants they are highly decorative. Few plants are so easily managed as Streptocarpus. Sow the seeds in sifted, pressed soil in moderate heat, pot and grow with plenty of light and a little shade in sunny weather. They do well in turfy loam with leaf-mould and sand added. Should aphides trouble them fumigate with tobacco.—English Florist.

**Streptocarpus, Charming Hybrids**

**Smilax, Boston.**

*Price, 4 pkts 10 cts., 1 pkt 3 cts.*

This is a beautiful vine for a window trellis or for training upon strings. The foliage is graceful, shining green and very pretty. Its sprays are lovely to mix with delicate flowers for personal adornment, and if the long strings are cut they can be used with fine effect to drape a room or hall. Easily grown.

**Torenia, New Giant.**

*Finest mixture, 4 pkts 10 cts., 1 pkt 3 cts.*

A splendid pot plant of easy culture. Flowers large, blue, white, lavender and yellow. A lovely summer-blooming window or porch plant. I offer only the new improved large-flowered varieties, of globular habit and far surpassing the older kinds in size and colors.
SEEDS OF HARDY SHRUBS AND VINES.

Most shrub seeds require from a month to three or six months to start. Some even its dormant for a year or more. Soow where the bed or box will not be disturbed till the seeds have time to germinate.

WORM.

Abicus Praecox, the rich Scarlet Prayer Bean... 5
Ajuja metalica crispa, hardy bedding or pot plant... 5

Amaranthus caudatus handsome foliage plant... 5
Atriplex canescens, expression fashion foliage plant... 5
Bignonia grandiflora, hardy shrubby vine... 5
Basil, Sweet Bush, fragrant, for window pots... 5
Borecole, curled and variegated, mixed... 5

Capsicum, Ornamental Peppers for window plants, Prince of Wales, Tom Thumb and Little Gem, mixed... 5
Caterpillars, Large, Small, Striped, Hal... 5
Caterpillars, Snails and Worms, mixed... 5

If you do not have enough of these get a mixture of seeds and raise some. They are curious and interesting, and not deprecatious as the more common ones are.

SNAIL.

Cadonopsis grandiflora, slender, annual climber, flowers bell-like, yellowish green veined purple... 5
Convolvulus aureus, yellow Morning Glory... 5
Cupania, spotted, annual... 5
Dasylium acrotrichum, a greenhouse evergreen, plant eight feet high, leaves two feet long, flowers white, in a dense, cylindrical panicle... 5
Gossypium, Cotton, upland variety, 1 k c e rich soil... 5

Medical. Turfina and Decandolle, Snails in mixture... 5

Polygongum Posombu a foot high, densely clothed with glossy green leaves, from which emerge small, rosy panicles of Nectar... 5
Polyperthus callosa, 12 inches high, showy foliage covered with rose-illiac flowers... 5
Primula from a bulb, fine... 5

Eucalypta tabensis, dwarf, large blue flowers... 5
Sutherlandia fruitescens, pot shrub, red flowers... 5
Tegytria Lycioides... 5

Zea Japonica variegated foliage, green white, bronze and pink striped, ten feet high, a fine clump... 5

POOPULAR MIXTURES OF FLOWER SEEDS.

Mixture of Annuals.—Contains chiefly seeds of flowers blooming the first season. The mixture embraces over 120 genera, and the average would perhaps be five species and varieties to each genus, thus representing fully 500 kinds. Price 10 cents per packet.

Mixture of Biennials or Annuals & Perennials.—Contains seeds of more than 25 genera, and represents perhaps 50 species and varieties. Price 10 cents.

Mixture of Seeds for the Window Garden.—Contains seeds of more than 25 genera, and represents perhaps 125 species and varieties. 10 cents.

Mixture of Climbers.—Contains seeds of a dozen different genera, about 50 varieties. Price 10 cents.

Mixture of Everlastings and Grasses.—Contains seeds of the leading flowers and grasses used for drying for winter bouquets. Price 10 cents.

Mixture of Fragrant Flowers.—Contains seeds of more than a dozen genera, representing about 50 kinds of our most fragrant flowers. Price 10 cents.

Mixture of Edging Plants.—Contains seeds of about a dozen genera of low-growing flowers, suitable for edging beds. There are 50 or more species and varieties represented in this mixture. Price 10 cents.

Mixture of White Flowers.—These are excellent where a moonlight display of flowers is desired. They are also suitable for gardens. A good mixture of species and varieties. Price 10 cents.

Mixture of Nearly All Varieties.—This is what we advertise—a mixture of 1,000 varieties and colors. Price 10 cents per packet. Those who secure this packet will be surprised at the wonderful variety of flowers to be obtained therefrom.

Choice Vegetable Seeds.

I can supply Choice Vegetable Seeds of the kinds here listed at the prices attached. All of these seeds are fresh and tested, and can be relied upon. I offer them with entire confidence as to their vitality and quality.

Artichoke, Jerusalem, tubers, 20 cents per pound, prepared for sowing at which rate 12; per peck, $1.50 per bushel. The tubers are prolific, and excellent for pickles, also for feeding stock.

Arugula, or Rocket, from Lawrence Globe. A delicious French vegetable, the bracts of the immense flower-heads being boiled and used as Asparagus. Bears $2.50 per peck. Per package 5 oz., 50 cents.

Asparagus, Palmetto, considered the best variety; large, early and of superior quality; for packed or for pickling. Per package 6 oz. 45 cts.; 1 lb., $1.00. Two-year-old roots $1.75 per hundred, by mail.

Beans, Lima, Selber's Early, Early Jersey, King of all. (curled), Large White, also Burpee's bush. Packet 5 oz. 15 cts.; 1 lb., 25 cents.

Beets. At the prices named these Beets will be delivered to you larger and better than the average Beets of all Europe for pickling. Per package 10 lb. $1.50; 25 lb., 4 dollars.

Beets. Early Bassano, Crosby's Egyptian, Crimson Globe, Eclipse, Edmund's Early, Long Blood Red, Victory, Per packet 1 lb., 60 cts.; 5 lb., $2.00; 10 lb., $3.50, by mail.

Borecole, purple Cape. Per package 6 oz., oz. 20 cts.; 1 lb., 35 cents.

Carrot, Scarlet Horn, Chantenay, Long Orange, Oxheart. Pkt. 3 oz., 6 oz., 10 cts.; 1 lb. 25 cts.

Chickory, Large-rooted, leaves used as Salad; roots roasted and ground largely used as a substitute for Coffee. Per package 1 oz. 15 cts.; 1 lb., 50 cts.

Collards, Georgia Pinkhead, leaves cooked as substitute for Cabbage in the South. Per package 1 lb., 35 cts.

Cress, curled, used as salad. Per package 5 oz., 10 cts., $1.00.

Corn, Early White, two or more oz. per package 5 cts., 1/2 pint 20 cts., quart 30 cts.

Corn, Salads, large-leaved, grown in fall for winter and spring use, as substitute for Lettuce. Packet 5 oz., 25 cts., $1.00.

Dandelion, Large-leaved French, used as greens. Packet 5 oz., 25 cts.

The leaves used for garnishing, also as greens.

Kohlrabi, Green, or Water Turnip, Yellow or White. Per package 6 cts.; $1.00 per 10 cts.; 1 lb., 75 cents.

Kohlrabi, Early Purple Vienna, a choice sort, early and tender, well adapted for winter use. Packet 5 oz., 20 cts.; 1 lb., $1.25.

Lettuce, Big Boston, Boston Market, Golden Queen, Perfedted Salamanter, Marvel, New York, Improved Winter White. Per package 5 cts.; 1/2 lb., 75 cts.; 1 lb., 50 cts.

Tomato, Atlantic Prize, Improved Beauty, Earlana, Ignatius, Stone, Ponderosa, Golden Queen, Golden Tomato, round-striped, yellow, with white seeds. Packet 5 oz., 25 cts.; 1/2 lb., 60 cts.

Miscellaneous.—Evergreen Broom Corn, 1 lb. mailed, 20 cents; 25 lbs. or more by express, not prepaid, 50 cents; 25 lbs. or more by express, not prepaid, 1 lb. per lb. White Dutch Clover for Bee Pasture and Lawns, 1 lb. 25 cts. In bags, 25 cts.

Park's Superior Lawn Grass, the best of all lawn grass mixtures; makes a fine lawn the first season, and will produce a permanent blue lawn, 5 bushels at 50 cents, a bushel 50 cents. 20 bushels $1.25, bushel of 10 lbs. $1.50. Five bushels will seed an acre, or for a patch 40 by 40 feet. For renovating a lawn now half this quantity.

Your Vegetable Garden for 15 Cents.—For 15 cents I will send Park's Floral Magazine, a year and these 10 packets, enough for a small family garden: Improved Edmund Beet, Select Early Jersey Wakefield Cabbage, Excelsior Late Flat Dutch Cabbage, Early White Spinach Cucumber, Improved Boston Lettuce, Wetherfield Radish, and Burpee's Prolific White Turnip Seed, 1 lb. 50 cts.

Mushroom Spawn, fresh, 2 lbs. per 20 cents; by mail, 8 lbs. $1.00, prepaid; not prepaid.

Nasturtiums, Giant Climbing, with large, varied flowers and large seeds which are fine for pickling. Mixed colors. Oz. 6 cts.; 1/2 lb., $1.00.

Okra, pods used for soups, stews, etc. Dwarf Pro-life and Long Green. Pkt. 5 oz., oz. 6 cts.; 1/2 lb., 30 cts.

Parsley, Early Curled, Champion Moss Curled, Beauty of Parterre. Pkt. 5 oz., oz. 6 cts.; 1/2 lb., 30 cts.

Packets: Early Jersey Wakefield, New Jersey, or Walter Raleigh. Peck 75 cents, bushel $2.00, barrel $4.50, purchaser paying freight or express charges.

Rhubarb or Pie Plant, Victoria. Packet 5 oz., oz. 6 cts.; 1/2 lb., 30 cts.

Park's Superior Lawn Grass, the best of all lawn grass mixtures; makes a fine lawn the first season, and will produce a permanent blue lawn, 5 bushels at 50 cents, a bushel 50 cents. 20 bushels $1.25, bushel of 10 lbs. $1.50. Five bushels will seed an acre, or for a patch 40 by 40 feet. For renovating a lawn now half this quantity.

At My Risk.—Remit at my risk by Money Order, Express Order, Draft or Registered Letter.
Splendid Summer-Bulbs

The bulbs I offer are all first-class. All are of the larger sizes, and should not be classed with the small, inferior stock advertised by some firms at a low price. All are delivered by mail, guaranteed, at the prices quoted.

Alstroemeria. All with both straights as follows: 1 bulb 3 cts., 6 bulbs 10 cts., 12 bulbs 15 cts., or $1.00 per hundred, mailed. By express, not prepaid, 70 cts. per 100, $6.00 per 1,000.

Giant Hybrids. The finest of all Gladiolus. The colors are the most brilliant, and the mixtures the most varied, embracing the latest creations of the hybridist as well as the best of the earlier sorts—shades of White, Pink, Red, Yellow, and Blue, in the richest variations. Price, 5 cts. each, 35 cts. per dozen, $3.00 per hundred, mailed. By express, not prepaid, $2.40 per hundred.

Tuberoses, Double, Excessiori Pearl, large bulbs, 4 cts. each, 25 cts. per dozen. A splendid mixture. Spike flowers, the centre tinged or spotted. Grow a foot high, and a clump of them always shows flowers. Price, 5 cts. each, 35 cts. per dozen. By express, not prepaid, $1.00 per hundred, $12.50 per thousand.

Zephyranthes, Pink, also White. Each, 10 cts., $1.00 per dozen. Half hardy bulbs.

OTHER BULBS, also Hardy Bulbs, as Tulips, Hyacinths, etc., are my Bulb Catalogue, issued in Autumn. Free to patrons. Address: GEO. W. PARK, LaPark, Pa.
THE CHOICEST

...ROSES...

PRICE—Fine well-rooted plants, Mailed, 10c, each; $1.00 per dozen.

FOLLOWING is a list of the Choicest Everblooming and Climbing Roses, 26 sorts, and a list of 12 finest Hybrid Perpetuals. I will mail a plant of any variety for 10 cents, or 13 plants, your selection, for $1.00. The whole lot, 38 plants, with seven additional Roses, my selection, will be either mailed, prepaid; or expressed with soil, not prepaid, for only $3.00. They will be mailed latter part of April or early in May, guaranteed to reach you safely. Special: For $1.00 I will mail a garden Rose collection, my selection, 18 plants of the best varieties for bedding. I have a large variety of Roses and can supply many sorts not here described. My plants are strong, well-grown and sure to please the purchaser.

THE BEST FOUR ROSES

Mamam Cochct, pink, rose pink with silvery shadings; very large pointed bud, immense open flower, exquisite in form and fragrance; splendid for beds, and unsurpassed for pots; certainly the queen of Tea Roses.

Etoile de Lyon, deep, golden yellow; buds and flowers of enormous size, freely and luxuriously produced, the best yellow Rose for general cultivation.

Mamam Cochct, white, a sport from pink Mamam Cochct, having all of its good qualities, but with white flowers; a charming white rose.

Beats, You can make no mistake in buying these four Roses. Altogether they are unsurpassed in beauty of bud, flower, fragrance, free continuous blooming, vigor, foliage and hardiness. Only 20 cents for the lot. If you have any of them select substitutes from the list below.

Choice Hard Everblooming Roses

Bessie Brown, white, faintly flushed pink; deep and full, with large, broad petals; beautiful.

Bon Silene, rosy crimson, delightfully fragrant; choice old rose.

Bridesmaid, clear, shining pink; fine buds, long, strong stems, blooms freely; one of the best.

Clothilde Sempert, white, with peach centre; very double, deliciously fragrant; strong, healthy grower; continuous bloomer.

Duchesse de Brabant, soft rose, large, full and fragrant; plant vigorous, free-blooming and healthy.

Giverny a Teplitz, rich, dazzling crimson, very sweet, produced in masses; plant strong, ever-blooming, flowers on long stems; fine.

Hermosa, exquisite deep pink, of fine shape; profuse-blooming and beautiful; one of our finest Roses.

Ivory, chaste, ivory-white; deep buds and superb large flowers on long, stiff stems; an exquisite sort.

Katerina Augusta Victoria, pure white, without tint, immense buds, and full, double flowers of surpassing beauty; free bloomer.

La Detroit, shell-pink shading to soft rose-pink at centre; massive flowers of handsome form, with a charming tea fragrance; vigorous and free-blooming; a splendid sort.

Mamaison, rich flesh-color; flowers of great size, full, double, and freely produced, for beds or pots; old but choice Rose.

Marchel Niel, a climbing sort, with enormous golden-yellow buds and blooms of surpassing beauty and fragrance; does well South.

Meteor, velvety-crimson, large, full-double, beautiful in both bud and flower; stems robust, will set well with rich foliage; splendid.

Marie Vau-Hautte, yellow shaded rose; extra large, double, of fine form and exquisitely fragrant; excellent for beds; hardly equalled.

Mme. D. Mattrat, sulphur yellow; graceful buds and open flower borne continuously throughout the season; a splendid new sort.

Mme. Abel Chatenay, pink, tinged salmon, petals gracefully curved; a new, magnificent Rose.

Papa Gonuier, dark carmine, fine large buds, lovely semi-double flower, showy; constant bloomer.

Pink La France, very large, rich pink, super, semi-overflowed; choice old Rose; unfailing for pots or beds.

Sour de Pierre Notting, rich shades of cream, orange and peach; with petals edged carmine, harmoniously blended; a choice sort.

The Bride, pure white, sometimes tinged delicate flesh; beautiful.

Crimson Rambler, vivid crimson; flowers double, fragrant; sets large clusters, plants of climbing habit.

Reine Marie Henriette, rich crimson, handsome, full double, a choice climber, showy, beautiful.

Choice Hybrid Perpetual Roses

Anna de Diesbach, clear brilliant rose; pointed buds, clear of blooms; lovely.

Ball of Snow, delicate blush, changing to snow-white; double.

Clio, delicate satiny-pink; immense flowers of perfect form; a new sort.

Captain Christy, delicate pink, deeper color toward the center.

All of the above Roses are well-grown and in fine condition. All are hardy, and cultural directions will accompany them. For large beds I can supply the plants by the hundred at special rates. I hope all our patrons will let us have their orders and the orders of Rose-loving friends. I believe we have the finest Plants and we will send them, and the liberal treatment Address, George W. Park, LaPark, Lanc. Co., Pa.
